New York Daily Tribune

THURSDAY, MAY 23, 1901.
THE NEWS THIS MORNING.

FOREIGN.—Shamrock II had all her spars carried away last night by a heavy breeze off the Solent.

DOMESTIC.—Rapid improvement continuing the condition of Mrs. McKinley. It was decided to start for Washington on Saturday.

THE EDISON STORAGE BATTERY.
In his talk to the American Institute of Electrical Engineers on Tuesday evening Dr. Kennelly showed that some of the expectations which have been excited in regard to the Edison storage battery are likely to be realized.

GOVERNMENT IN HAWAII AND PORTO RICO.
The annual report of Governor Allen of Porto Rico will probably be accepted by the devotees to cant phrases as a revelation of a deep and wicked desire to enslave the Porto Ricans and undermine American constitutional liberties.

WEST POINT AGAIN.
Recent acts of insubordination at the United States Military Academy have been severely punished by the dismissal of five cadets and the suspension for nearly a year of six, while the infliction of minor penalties on a number of others is likely to follow.

agreed to discharge them and give up attempts to administer the law, as the only way to save the government the disgrace of travesties of justice. Experience in Porto Rico has also emphasized the lesson of the folly of putting untried people to working our complicated constitutional machinery of justice.

It is indispensable that the discipline at West Point should be rigid and that it should be rigorously enforced. It is equally imperative that it should be enforced with scrupulous justice, and if reason for complaint on that score has existed a lawful method of laying the facts before the department has always been available.

A CLOSE CALL.
A really serious misfortune, which came nearly by a national and international tragedy, has befallen Sir Thomas Lipton and his new yacht. During the early trials of racing craft accidents are not uncommon, the latest calculation being an imperfect guarantee of strength in every part.

STANDING IN OPEN CARS.
Alderman Delano's proposal, which has been adopted by the board, for an investigation into the nuisance of standing in open cars, and for the framing of an ordinance prohibiting it, is altogether commendable.

PERSONAL.
Marathon M. Ramsey, fellow by courtesy in Johns Hopkins University, who has been appointed professor of Spanish in Leland Stanford University, California, is a graduate of Columbia University.

THE HARVEST OF THE WATERS.
The catch of mackerel this season not far from the eastern entrance of Long Island Sound is reported to be exceptional in quantity and quality. An acute observer said long ago that the supply of food in the oceans, lakes and rivers of the globe is so abundant that it could alone furnish sustenance to the peoples of the earth for countless generations.

THE MINISTRY AND HUMANITY.
President Rush Rhees of the University of Rochester makes some pertinent remarks about preachers and preaching at the recent commencement of the Rochester Theological Seminary. Noting the fact that the training of the average theological seminary is apt to keep students for the ministry out of touch with the real world of men and women into which they are so soon to be sent as teachers and guides, he finds in the active ministry much that tends to increase that state of aloofness.

discussing Cuba's future.
FACTIONAL DIFFERENCES—JUAN GUALBERTO GOMEZ AS AN ORATOR—
THE QUESTION OF MORTGAGES.
Getting ready for the future government of Cuba seems to cause a good deal of friction among those who are most interested. The tone of the newspaper discussion as well as of the discussion in private and in the secret sessions of the convention is bitter. Yet in the meantime the people are moving forward. Having made up their minds that the Platt amendment is to be adopted, the mass of the population are much less disturbed than the radical politicians are willing to believe.

It seems to be generally agreed that, whatever other elements of a tunnel there are in the loudly exploited scheme for a private line in competition with the rapid transit road to Brooklyn, it is at least hollow.

The report that thousands of acres of the Hackensack meadows have been sold gives rise to conjectures that a general crusade for the extermination of the clouds of mosquitoes which summer breezes sometimes waft over to Manhattan on heated nights may have been begun in earnest.

The recent shooting of a boy fugitive by a New-York policeman appears to have been unjustifiable. The officer had no sufficient reason to suspect that the boy had been guilty of any grave crime or to suppose that he was a desperate offender, who must be captured at any cost.

Chinese boxers and American boxers also seem to be resting. Our professional pugilists are no longer in great demand for the elevation of the stage, and as nearly all of the legislatures of the United States have adopted severe laws against prizefights, the thick-fisted Anaks are obliged to take it out in talk.

HOUSECLEANING CAROL.
The melancholy days have come—the saddest of the carpers on the clothesline and incessant whacks we hear. The carpets in the kitchen and the beds are in the hall.
