Business Notices.

That Up-to-Date, Conservative, Newspapers are appreciated is demonstrated by a comparison of the circulation of the New York Tribune for the month of August, 1901 and 1902, which shows an increase of 15 per cent daily and 10 per cent Sunday. It is still gaining.

New-York Daily Tribune.

SUNDAY, SEPTEMBER 14, 1902. THE NEWS THIS MORNING.

FOREIGN.—The financial condition of France grows steadily worse. The deficit for the year to September 1 being \$29,000,000.

Attorney General Knox left Paris for Cherbourg, where he was to take the steamer St. Paul for America. He declined to talk about the results of his investigation of the Panama Canal title in advance of his report to the President.

Fourteen Jews and four gendarmes were killed as the result of an anti-Semitic outbreak in a public square in the city of Constantinople. Gendarmes closed a school near Brest, France, which had been reopened by the nuns. The American exodus from England, which has been in progress since the outbreak of the influenza epidemic, is reported to have reached its maximum last week.

The convalescence of King Edward is officially declared to be complete. The two novelties of the season, the Secretary of War's Boer tactics and the use of the Secretary of War's Boer tactics, have been approved by the German Foreign Office as successor of Ambassador General von Schulerberg in the post of ambassador at St. Petersburg.

THE WEATHER.—Indications for to-day: Fair and continued cool. The temperature yesterday: Highest, 71 degrees, lowest, 55.

KOSSUTH.

The celebration of Kossuth's centenary, which takes place this week in Hungary, culminating on Friday next, is one that appeals strongly to the American people. Louis Kossuth was not of our race or tongue, and fifty years ago there were few of his compatriots in our land.

CHANGES IN RACING.

The old-fashioned auctioneers on trotting and pacing contests and the ivy mantled, antique practice of "laying up" heats in contests among harness horses have nothing to commend them to the support of the men who want high class sport and nothing else.

stable and trustworthy, as it is the more progressive and prosperous, member of the Dual Realm. In Francis Joseph's assumption of St. Stephen's crown and recognition of Budapest as his royal residence and capital, there seems to be a complete disappearance of Kossuth's ambition. In fact, if we look below the surface, there is in it a splendid triumph for the Magyar cause.

A YEAR AGO, AND NOW.

It is fitting to commemorate this mournful anniversary. The character of McKinley was such that we may regard it, through a year's perspective, with satisfaction and with edification. The circumstances of his assassination were so abominable that we may well regard them, even when long past, with our fullest measure of detestation and hatred.

It is well, then, that the nation shall solemnly commemorate this solemn anniversary. But it will be most profitable to give the day to thoughts of ourselves instead of the latest of our murdered Presidents. McKinley needs no eulogy. All that a grateful and sorrowing nation could say was said a year ago. It was well said. It was worthily said.

CLOTHES AND OTHER THINGS.

It has been an extraordinary summer, the most comfortable for city dwellers and workers—that has been known in years. Of course, there were not wanting wisecracks and statisticians in the earlier weeks of the season to assure us that there was nothing at all remarkable about the weather.

THE TALK OF THE DAY.

The London Board of Trade has commissioned Lieutenant Colonel Horatio A. York, chief inspecting officer of railways for the Board of Trade, to prepare a report on the workings of American railways, with the view of adopting American methods in Great Britain.

CONTROL OF ALBANY PAPER.

Albany, Sept. 13.—It was reported here to-day that "The Times-Union," one of the penny evening newspapers of this city, was to be controlled by the Standard, the Albany paper.

RIFLES IN THE BOER WAR.

In an interesting article by Joubert Reitz, late of the Boer army, in "The Army and Navy Journal," the writer, after discussing the various rifles used in the war in South Africa, says: "Now we come to what I consider the principal weapon of modern warfare—the rifle."

GOVERNOR SHEPHERD'S WORK.

With the lapse of thirty years the work of Alexander R. Shepherd in the development of the national capital has come to be viewed in a far different light from that in which it appeared while in progress. In 1870 the country was comparatively poor, and the expenditure within two years of \$67,000,000 in the paving and beautifying of one city seemed an insane flight of extravagance, which could not be excused and which could hardly be explained on any assumption of good motives.

SAUSAGES IN THE SKY.

Dispatches from over sea say that war balloons of sausage shape have been used freely in connection with the German army manoeuvres. What longings and gnawings of the stomach appetite must have been aroused in the Teutonic ranks as they marched and counter-marched on scanty rations!

CARING FOR THE UNCONSCIOUS.

While the hospital service in every borough of New-York is of inestimable benefit, proofs accumulate that youthful surgeons in ambulances are sometimes overhasty in declaring that unconscious patients in the hands of the police are suffering from drunkenness only.

THE PRESIDENT'S SELECTION.

The President has made an admirable selection in choosing a successor to Judge Cox for district judge of the Northern District of New-York. George W. Ray is one of the best equipped lawyers in that part of the State, and he might have been a justice of the Supreme Court of New-York several years ago if he had not then preferred to remain in Congress.

THE MORE EXTENSIVE USE OF MEATS.

The more extensive use of meats as food is advocated with zeal by the earnest opponents of the eating of large quantities of meat, and the raisers of "goobers" and pecans in our Southern States are looking forward hopefully to an increased demand for their crops.

MISSISSIPPI IS TO HANG IN HER CAPTIVE.

Mississippi is to hang in her native Capitol at Jackson the portraits of "ten natives of the State," and ten names have just been agreed on by means of a popular vote. Now it is found that at least five of the ten—and the five more distinguished—were born in other States.

THE GREENWICH "CIRCUS."

Greenwich, Conn., Sept. 13.—Mr. Hoggon and his assistants of the summer amusement club, though very tired to-night, were more than pleased over the unqualified success attending the presentation of their "Great Circus."

THE TIMES-UNION NOW SAID TO BE CONTROLLED BY MARTIN GLENN.

Albany, Sept. 13.—It was reported here to-day that "The Times-Union," one of the penny evening newspapers of this city, was to be controlled by the Standard, the Albany paper.

it is because there is a special reason supplied in the condition of the general health in the autumn. Do not colds, neuralgia, rheumatism and other ills abound at this season of the year? This question answers itself. The city is full of them; and it is a grave mistake to ascribe them all to sanitary conditions, to the excavations for the subway and the like.

NEW-YORK SOCIETY.

Town is beginning to pick up amazingly, and there is every prospect of an early and a long season. The last week here has been animated. It is becoming difficult again to secure tables at the fashionable restaurants where familiar faces abound. Carriages and automobiles throng the avenue on an afternoon, and in every direction the theatres are opening up and playing to well filled houses.

TALKING OF AUTOMOBILES.

Talking of automobiles, Lenox is up in arms against them, and for once the fashionable set and the people of the town are in unison. Members of the summer colony and the permanent residents have joined forces against the motor and all the enticements of the grounds of the Lenox Club and of the Lenox Golf Club there are large signs saying that no automobiles are allowed on the premises.

TALKING OF LENOX.

Talking of Lenox, it may be mentioned that there is to be no formal fête this year, and it seems probable that this feature of the Lenox fall will pass out of existence. Last year it was abandoned at the last minute on account of the tragic death of President McKinley, and the matter this year has not been mentioned since.

IT WAS FORTUNATE THAT THE RAIN CAME AFTER THE PARADE.

It was fortunate that the rain came after the parade was over. It started about 11 o'clock handsome couple at the head, followed by a chariot drawn by four spirited horses, driven by Frank Mosher, Jr. As the procession started up Greenwich-ave, the crowd struck up "Hail Columbia," and the crowd cheered and flags waved. Eight young women in black riding costumes, Mrs. E. W. Little, Miss Grace Benedict, Miss Helen Downing, Miss Freeman, Miss Arnold, Miss Ackerman, Miss Edith Walsh and Miss Emma Wahl, on their handsome horses, were accompanied by eight men costumed in red coats, white trousers and black riding boots.
