THE WEATHER.—Indications for to-day: Partly cloudy; probably rain.

THE VIRGINIA REPUBLICANS.

The Virginia Republican State Convention, held the other day at Norfolk, seems to have been a tempestuous and belligerent gathering.

In the face of all discouragement within the Republican organization, and in spite of the limitations put on suffrage by the new State constitution, the Republicans of the IXth Virginia District have maintained their strength...

tionally Committee, and Mr. Agnew re-elected as the chairman of the State Committee, the Norfolk convention apparently considered all political responsibilities discharged...

HILL'S VICTORY.

The Parker boom has been galvanized, perhaps even resurrected, and coincidentally the McClellan, alias Cleveland, boom has been put away to rest.

Nevertheless, the meeting of the State committee appears distinctly favorable to Chief Judge Parker. A few months ago he was discussed with all the interest compatible with an entire lack of enthusiasm...

TRANSATLANTIC TRAVEL.

Now that the exact number of passengers landed at New-York in 1903 by the various steamship lines from Europe is known, several notable facts become evident.

JUST VIEWS OF THE WAR.

The war has now lasted a month. It was a month ago to-day that Japan recalled her minister from St. Petersburg.

It is good to see, as we think we can see, the growth of more just and sane views of the war than some that prevailed not long ago.

There is, too, a change in view, and in tone, in this country. We do not mean that those who at first sided with Japan are going over to the Russian side, or that the friends of Russia are now shouting for Japan.

erally throughout the land. It is to be expected that they will be maintained to the end.

SAVE NIAGARA.

The attention which has been concentrated on the Thompson bill since its sudden passage in the Assembly last week, must prevent its becoming a law in anything like its present shape.

The protest and warning of the Commissioners of the State Reservation at Niagara are timely. They say that one-third of the volume of the river has already been given away to power companies on the American or Canadian side, and it is time to call a halt.

We do not think this diversion of water should be permitted on any terms. But even if it can be permitted without injury to the falls, certainly the franchise should not be given away. Niagara belongs to the people of the State.

THE TALK OF THE DAY.

The Simpson Tunnel, one of the greatest engineering works in the world, is rapidly approaching completion.

REVENGE OF THE LAUREATE.

The king called for his laureate. Who trod the throne room shrinking, the laureate said: "Yes, sire," with a look of defiance.

NEW-YORK SOCIETY.

New-York bids fair to be somewhat dull from a social point of view during the next week or ten days, the interval between the close of the opera days, the interval between the exodus from Palm Beach, Aiken and the other Southern resorts to New-York.

WILU.

"Are you wid or agin us?" Of Corea asks Japan. "We're wid," says Corea. "That's very friendly of you."

TO BURN.

"To burn" would be an extravagant statement of the case, but discoveries like that now reported from the upper Yukon are not unusual.

TO TORONTO.

It is obviously the faith of the headkeeper of the Trenton State Prison, George O. Osborne, that while some men are born to be hanged and others achieve that ignominious destiny, there are some who will not have it that way.

cold storage, in addition to the bones. Still, whether any museum would pay \$50,000 for a mastodon is doubtful.

Kansas is struggling with blizzards and prairie fires, but nobody doubts the result. Kansas always comes out ahead.

George Fox or William Penn would not have approved of Philadelphia's interest in the occasional prizefight, and with opportunity either of them would have shied his broad brim into the ring to break it up.

President Smith and seven of his apostles are said to have thirty-three wives. Just think of the Easter bonnet bills!

Lima is bothered with earthquakes almost as often as the average small boy is with stomach ache. She would probably feel lonelier if she did not have at least a mild shake every year.

It is evident that the political simians of San Domingo do not know a buzz rap when they see it.

"My heart is torn" exclaimed Mascagni as he narrated the vicissitudes of his American Odyssey. Patti, on the other hand, serenely goes her way across the continent, followed by suits and critics.

Companies which have electricity to sell for light and power in England are considering the policy of owning and renting to customers small motors for shops. No doubt it would help the sale of current, but as "The Electrical Review" (New-York) remarks, the programme would lock up a good deal of capital which the companies might like to use in other ways.

AT THE WHITE HOUSE.

[FROM THE TRIBUNE BUREAU.] Washington, March 5.—The President gave a dinner to-night in honor of L. A. Frothingham, Speaker of the Massachusetts House of Representatives.

President Roosevelt definitely decided that it will be impossible for him to go to Jackson, Mich., on July 6, to attend the "Under the Oaks" celebration of the semi-centennial of the organization of the Republican party.

The President believes that the most dignified course for him to pursue is to stay at home most of the time and let his friends and supporters do all the travelling and speaking during the campaign.
