In the party, as distinguished from the leaders, this radical wing is in the majority. If, on the other hand, the party was held true to Jeffersonian principles, it would be utterly helpless to deal effectively with the question.

PROGRESS OF THE WAR.

The war in Manchuria really seems to be making progress despite the occasional flights of wild ducks from the portulaca of Shanghai.

FRANCE AND ROME.

M. Combes, in his tournament with Plus X, appears to have drawn one game and to have won another. If we may apply the terms of the chess masters to the controversy between France and Rome, the drawn game was that over the alleged Carthusian bribery scandal.

THE LATIN NATIONS.

Dr. Emil Reich argues plausibly in "The Contemporary Review" that the three great Latin nations of Europe have bright futures.

A DANGER OF INDUSTRIAL EVOLUTION.

The sudden prospect of the shortage of meat supplies on the initiation of a strike in some Western packing houses again brings us face to face with a serious problem incident to the modern consolidation of industrial interests.

Of course, they will answer that the Western packer gives them better and cheaper meats than the local trader. The market man particularly is able to buy the parts he wants all dressed, and sell with little loss.

goon and the consumer would have no trouble. On the other hand, if many separate packers were faced by one union, some employers would certainly grant the demands of the workmen and supply the market.

That is the most serious danger of the consolidation movement. It means putting a community's eggs all in one basket. A strike in the coal mines or the packing houses stops the whole coal or meat supply.

Property owners who have suffered heavy losses from reckless mismanagement of the subway work are uneasy in mind because court decisions up to this time have held the view that neither the contractor in chief nor the city is responsible in damages for the negligence and recklessness which the sub-contractors have shown in so many instances.

Visitors to New-York from small rural cities are astonished to see horsecars still running in so conspicuous a thoroughfare as Park Row and other prominent streets of New-York.

THE TALK OF THE DAY.

Among the lands flowing with milk and honey in modern days Denmark holds a proud distinction. The butter from her dairies brings higher prices in England than any produced by the British butter-makers of any imported from any other nation.

ARCHITECTURAL BEAUTIES.

It is obvious that he must be a man of exceptionally original ideas who can invent any new form of comparison for a thing which he may love.

WHAT'S TO BE DONE?

She sent me back my lock of hair, She sent me back my ring, She sent me back my letters—there were fifty—dead with studs, she said, She asked me to return each note of hers. What's to be done? Oh, hold your breath, my dear, I haven't kept 'em one!

LESSON.

"Teach me to love,"—thus sang the dove Before their wedding day; "Dear, show me how to keep my vow, Oh hold your breath, my dear, I haven't kept 'em one!"

THE TRUST DEED IS SPEAKING.

The trust deed is speaking, the three horse doctors of an Arizona town having entered into a "gentlemen's agreement" to maintain rates.

WAS NOT THIS CHICAGO MERCHANT JUSTIFIED?

"I hear you have discontinued the custom of giving your clerks a raise when they take a wife," said the merchant to a new clerk who had just been hired. "Why so?" "Well, the last clerk was a Mormon and came for a raise four times in a month."—(Croy Times.)

ainly to cause and to maintain a strong sympathy with those great nations of the Southern Europe and to make us hope for the attainment of progress and prosperity.

Bourke-Cockran on Judge Payker's plan at Esopus was remote, unfriendly, solitary, slow. "Boss" Murphy might not get much more imposing figure there.

Doctors who are strong advocates of abstinence from meat in the dog days declare that if the stock raisers men remain on strike until the coming of cold weather the standard of health will show a rise amazingly gratifying. It would be difficult to discover a better opportunity for a thorough test of different systems of dieting.

How inconceivable Colonel Bryan would be were Judge Parker defeated in November—as, by the way, the head of our Court of Appeals is likely to be! Murphy of Tammany Hall, too, might not sink into the lowest depths of despair.

"A painful vacillation marks the dispatches about the rebuff given to the labor delegates at 'Oyster Bay,'" sadly remarks that noted friend and advocate of the laboring man, "The Evening Post." Now that the "dispatches" clearly show that labor was not rebuffed, it is to be feared the pain in the "Post" sanctum will become even more painful.

Indications point to an attempt on the part of the Democratic National Committee to shelve Bryan during the campaign by not inviting him to talk. Mr. Bryan, however, can hire his own halls and do all the talking he wants to, and as he has some interesting things to say he will not lack for auditors.

NEW-YORK SOCIETY.

Definite plans for the gay season at Newport have at last assumed some shape, and society there and elsewhere is on the qui vive. As to the outcome of the subscription list early next month, which has created no small ripple of excitement, the Newport cottagers have been juggling with figures, which is more or less fatal, and they have announced that only two hundred representative people are to be asked to the ball.

Many members of the fashionable set still linger at Tuxedo, and among those who are entertaining house parties there to-day are Mr. and Mrs. Henry W. Burr, Mr. and Mrs. Grenville Kane, Mr. and Mrs. P. Lorillard Ronalds and Mr. and Mrs. Harris Fahnestock. James Brown Potter is likewise there, staying at the club.

WAR VIEWS OF EXPERTS.

Washington, July 16.—A comparative estimate of the Russian and Japanese strategy, as disclosed by the results since the fighting began in Manchuria, finds the military experts here without division in favor of Japanese astuteness and sagacity of movement. Of course, it is taken into account that the Japanese have the advantage of numerical superiority over their adversaries, and that the Russians are correspondingly handicapped; but the Japanese, by all odds, according to military observers, have displayed and exercised rare art in their operations.
