Scientists Apparently Effect One in Mice by Using Serum.

Buffalo, Jan. 13.—Scientists connected with the cancer laboratory of the University of Buffalo have discovered a serum which has been used successfully in curing cancer in mice.

Dr. Roswell Park, the well known surgeon, who has made a long study of cancer and cancerous diseases, has been in constant touch with the University of Buffalo scientists who made the experiments, and this afternoon he made the following statement for publication:

I am thoroughly conversant with all that has been done at the University of Buffalo in the way of curing cancer in mice, and I can substantiate all that has been said by the university scientists to the effect that they have cured cancer in mice.

The experiments at the university were confined to about fifteen mice, although between one hundred and fifty and two hundred had been inoculated with the disease, so that all had it.
