THE NEWS THIS MORNING.

FOREIGN.—A report from Marquis Oyama gives details of the Russian position north of Mukden; there was nothing to indicate the strength of the troops on either side.

THE FLATBUSH SUBWAY WRANGLE.

The wrangle, which at present seems to amount to a deadlock, over the Flatbush subway is much to be regretted, since it portends indefinite delay to a public work of real importance and urgency.

THE KAISER IN MOROCCO.

The visit of the German Emperor to Morocco was the latest, but probably not the last, move in a somewhat delicate diplomatic game which involves some awkward if not ominous situations and which may in a measure be regarded as one of the results of the war between Russia and Japan.

treeless expanse of sward. Probably enough earth could be left, or replaced, upon the roof of the storage yard to maintain a growth of grass. Surely, one of these sites could be adopted, instead of insisting that the yard must be placed just midway between them, where it would ruin one of the choicest bits of urban forest.

In some cases it may be necessary to despoil a park. In this case it does not seem to be. We cannot for a moment believe that it is impossible to construct a subway to Flatbush without putting the storage yard under the park any more than it was impossible to construct one to Harlem without reducing Central Park to an asphalted plaza.

SCHOOL BETTER THAN STREET.

Superintendent Maxwell makes a complete answer to the Tammany school demoralizers who, to deprive the little children of training in what they call "fads," would shorten their school day. He says: "The school is better than the street."

THE TALK OF THE DAY.

Children born between September and February are, some authorities state, not so tall as those born in the summer and spring months, and the growth of children is much more rapid from March till August.

fluence there than any other country. If Russia were at peace and were in the full heyday of her military potentiality, and if France had not so largely exhausted her capital in replenishing the Russian treasury, Germany might not so lightly intrude into the affair.

RUSSIA'S FORMER TERMS.

The belated revelation of the last terms which Russia proposed to Japan before the outbreak of the war is interesting as a contribution to the completion of the record, but it does not in the least degree alter the aspect of the case nor afford the slightest vindication of the Russian side.

thousand miles below the Equator, might they not travel all the way to the South Pole? Indeed, is it taxing the scientific imagination too much to suppose that a wireless telegraph receiver might be actuated at that point, the centre of convergence, even though the waves could not be detected half way between it and the starting point?

hair to a portion of his fortune. He has adopted a political career, like his uncle, Colonel Stevens, and at the last election ran for the New-Jersey Assembly on the Republican ticket, and was elected. Although it is not until to-morrow week that the public road coach Pioneer, run under the auspices of the Coaching Club, will begin its daily trips between the Holland House and Ardrey, the coaching season is already in full swing, and many newly appointed four-in-hands are to be seen every day in considerable numbers, both in the park and on Riverside Drive, a number of them being tolled by young women belonging to the Ladies' Four-in-Hand Club. The coach horses also awaken the echoes of 8th-ave. and disturb the promenades of the members of the clubs that line that fashionable thoroughfare. Alfred Vanderbilt, who has again leased the Towers from Amal Barber at Ardrey for the spring and early summer months, will take turns with Reginald Rivers and G. L. Boleyn in driving the Pioneer, which has been chartered for the first day by Countess Hitchcock, for the day following by James H. Hyde, and for Wednesday by Robert L. Gerry.
