

YOUNG TO BE TRIED. BENNINGTON EXPLOSION.

Secretary Bonaparte Goes Over Court of Inquiry.

Washington, Aug. 30.—Secretary Bonaparte, in his action to-day on the findings of the court of inquiry in the case of the Bennington explosion, severely arraigns some officers of the vessel for failure to look after the safety valves; orders Commander Lucien Young before a court martial to clear himself of the "charge of neglect of official duty"; directs the court martial of Ensign Wade on the charge of "neglect of duty"; and disapproves the court of inquiry's finding that the Bennington was "in an excellent state of discipline and in good and efficient condition."

Ensign Wade was in charge of the machinery. The action as to Commander Young was taken in view of the fact that the court of inquiry in its findings and opinion did not pass expressly on his conduct and the question of his responsibility for the explosion. Secretary Bonaparte, however, approves the court of inquiry's indorsement of the creditable conduct of all the survivors of the officers and crew of the Bennington after the explosion occurred.

Secretary Bonaparte's indorsement on the court's findings is as follows: The department has very carefully considered the findings and opinion of the court of inquiry, the testimony and exhibits thereto, and the indorsement of the commander in chief of the Pacific Squadron thereon. It has also considered the report of the court of inquiry, the testimony of Lieutenant A. F. H. Yates, U. S. N., and Ensign Charles T. Wade, U. S. N., and the indorsements thereon by the commander in chief of the squadron aforesaid. The questions involved in this inquiry, being deemed by the department to be of exceptional importance, have been weighed with more than ordinary care and deliberation.

The department approves the several findings of fact by the court of inquiry, with the exception of so much thereof as is in the words following: "The fact that on July 25, 1893, the ship was in an excellent state of discipline and in a good and efficient condition, with the exception of her boilers, which were in a condition of neglect, and the use of their age (about fourteen years), and the use to which they had been subjected." This particular finding sustained by the evidence; the proof tends strongly to show that the Bennington, in fact, was in a good and efficient condition and that the Bennington, in fact, was in a good and efficient condition and that the Bennington, in fact, was in a good and efficient condition.

The Secretary then cites and comments upon the various provisions of the navy regulations, and concludes as follows: The foregoing provisions of the regulations, and the facts disclosed by the testimony and exhibits thereto, make it the duty of the department to require the commander in chief of the Pacific Squadron, and the commander in chief of the Bennington, to be held responsible for the explosion, and the department will prepare charges and specifications in accordance with the views of the department hereinbefore expressed.

GEN. WOOD TELLS NEEDS. Says Filipinos Should Go to Work—Sails for His Post.

Boston, Aug. 30.—General Wood, who the United States should develop in the Philippine Islands, are suggested by Major General Leonard Wood, U. S. A., who sailed from New York to-day to resume his command of the islands. They are quoted in an interview published in "The Evening Transcript" to-day, as follows: The need of free trade is obvious. We have taken away from the Filipinos their Spanish markets and have restricted them in their place. Free trade will injure no American industry.

The second need is to get the people back to work in the fields. Our coming to the islands necessarily resulted in the tremendous inflation of prices and wages. The United States poured into the islands many dollars a year for several years, and the result was to raise wages of the people to a way that did their great harm. Now we want to get these people back to work. If the islands are to be developed the nation must get the labor. The impulse for this must come from the United States. There must be American leadership and capital there.

General Wood declared that there was no military or political problem in the islands. "None of us, and none of the Filipinos, are concerned in the political future," he said. "I am sure that the only agitation regarding the future of the islands is found in this country, and if that should cease we, over there, would have very little more about it."

MERCHANTS' TRUST MAY PAY IN FULL. Hudson Valley Railway Securities Said to Have Been Sold Advantageously.

A conference between the receivers of the defunct Merchants' Trust Company and the members of the Credit-Herbert syndicate was held yesterday afternoon at the offices of J. W. Herbert, No. 21 Nassau-st., Douglas Robinson, one of the receivers, hurried down from Boston, where he has been appraising the Equitable property for the meeting. It is understood that the securities of the Hudson Valley Railway Company, owned by the Merchants' Trust Company, were sold to the Credit-Herbert syndicate, but it was stated by the principals in the meeting that no announcement would be made till to-day. It is said that the price obtained was enough to pay the depositors to fall and leave a dividend for the stockholders of the trust company after payment of receivers' fees and expenses.

"PUTS" AND "CALLS" APPROVED. Chicago Board of Trade Votes in Favor of "Privilege" Trading.

Chicago, Aug. 30.—Trading in "puts" and "calls" is to be re-established by the Chicago Board of Trade. By a vote of the members of the exchange, resulting in 503 affirmative and 254 negative ballots, the resumption of this form of trading was decided upon to-day. "Privilege" trading was abandoned here some time ago when the Board of Trade began a crusade against bucket shops. The question of the re-establishment of "puts" and "calls" was raised by believers in that system, who caused the amendment to the rules to be submitted to a vote by the means of a petition. This virtually forced the board to express itself officially on a question covered by the statutes, carrying penalties for violation.

Milwaukee, Aug. 30.—The action of the members of the Chicago Board of Trade to-day in voting to re-establish the system of trading in "puts" and "calls" caused no apprehension in Milwaukee, in which market dealing in privileges has been carried on almost exclusively since prohibitive legislation was put into effect by the Illinois Legislature, thus making any trading of this character in Chicago illegal.

Secretary W. J. Langson, of the Milwaukee Chamber of Commerce, said to-day that no adverse effect was expected to follow the action of the board members in Chicago, and that no matter what action the board might take trading in privileges would continue to flourish in Milwaukee. He stated that the board's action would not conflict with the laws of the land.

DEUTSCHLAND'S FAST VOYAGE. The Deutschland, of the Hamburg American Line, Arrived at Plymouth at 5:40 a. m. yesterday, Having Left New-York on August 24, Crossing the Bar at 1:45 p. m. She Made the Voyage in 5 Days 13 Hours and 35 Minutes.

The Deutschland, of the Hamburg American Line, arrived at Plymouth at 5:40 a. m. yesterday, having left New-York on August 24, crossing the bar at 1:45 p. m. She made the voyage in 5 days 13 hours and 35 minutes. Had the Deutschland sailed the short course, which is about a hundred miles shorter than the course taken by her on this trip, she would have nearly equaled her record of 5 days 7 hours and 38 minutes, made in September, 1901.

THE IRON TRADE. [By Telegraph to the Tribune.]

Cleveland, Aug. 30.—"The Iron Trade Review" to-morrow will say: The glad tidings of peace terms agreed upon between Russia and Japan have come as an assurance of increased industrial activity in those countries in the not far distant future, rather than as a guarantee of immediate increase in orders, although it is reported that representatives of the Japanese government are already in the United States, negotiating for large purchases.

DIVES THROUGH COURT WINDOW. Big Negro Creates a Commotion at Stapleton, When Arraigned.

Joseph Watson, a big negro, who was brought before Magistrate Marsh, at Stapleton, Staten Island, yesterday, on a charge of assault, caused great excitement by diving head first from a courtroom window just as the magistrate was about to hold him for trial at the Court of Sessions. He landed safely, but did not get far from the courthouse before he was captured, and dragged back, resisting vigorously all the way. The negro was arrested for refusing to pay his fare on a street car. It took three policemen to get him back to the courtroom, where he raised an uproar that badly scared the witnesses already there. He was sent to the county jail in a patrol wagon, and will be taken to-day to the Court of Sessions.

GERMANS VISIT ELLIS ISLAND. Royal Commission Here to Examine American Schemes of Colonization.

A commission, representing the Royal Settlement Commission of Germany, headed by Dr. Alfred Hugenberg, and consisting of eleven members, visited Ellis Island yesterday. These men have been here to advise the government to examine the means to be taken here for colonizing the uninhabited portions of this country. They all come from the northeastern portion of Germany.

POINT FOR STANDARD OIL. Boston Judge Refuses to Appoint Commission to Take Depositions of Officials.

Boston, Aug. 30.—Judge Barker of the Supreme Judicial Court, in the suit of Cadwallader M. Raymond against Henry H. Rogers, of New York, and others for \$50,000,000, refused yesterday to grant a motion of the plaintiffs for the appointment of a commission to take the oral depositions of various persons identified with the Standard Oil Company.

FIRST FILIPINO BIRTH AT CONEY. The first Filipino birth at Coney Island occurred in Dreamland yesterday afternoon.

The mother of the child is Mrs. Castro Mordeaz, an Igorot. Mrs. Mordeaz came from Alab, Luzon. Both mother and child are doing well at the Emergency Hospital. The boy's weight was only three and a half pounds at birth, so the doctor, through an interpreter, tried to persuade the mother to have the child placed in the incubator, but she refused to let the child be taken from her.

COTTON BULLS SANGUINE. Confident Prices Will "Measure Values" This Year.

The Southern operators who came here several weeks ago to take part in the movement for establishment of higher prices for cotton are as confident as ever of the correctness of their contention that present prices are materially under the level which would obtain, if the market were a free market. The mills, both North and South, are sold far ahead, some of them into 1907. As a rule, the mills are very small, and in many instances they hold no contracts for adequate supplies of raw material. Under ordinary conditions they might expect to get their supplies at low figures by holding off from buying, but things have changed in the South. The planters have been organized and are prepared to act unitedly in holding their cotton for adequate prices. This being the case, it is not unreasonable to expect that prices for cotton will no longer avoid or ignore the cotton market. The United States normally exports four-fifths of its cotton production to Great Britain, and the sale abroad of this vast quantity of the staple at high figures means bringing into this country a great amount of money.

TRADE IN CHICAGO. [By Telegraph to the Tribune.]

Chicago, Aug. 30.—Navigators of the wheat market were to-day still feeling with the lead for the export bottom, on which they expect the price must rest, but could get no indications other than were afforded by the taking of fifteen boatloads at the seaboard. That small quantity may be shown to have been a mere sandbar, and the market is left drifting about as before, where the lead can find no bottom. Closing prices were as follows: 42c to 44c, and the bulk of the trading was in the way of changing long wheat from September to October, and from October to November. The market was active, and the price of wheat advanced, and the price of wheat advanced, and the price of wheat advanced.

CONSOLIDATION EXPECTED. Plans to Merge Associated Fraternities and National Congress.

Milwaukee, Wis., Aug. 30.—The leading question before the convention of the Associated Fraternities of America to-day was that of consolidation with the National Fraternal Congress. The plan of a conference committee held a long session and agreed on a basis whereby consolidation is expected to be brought about. It was agreed that the name of the new federation shall be the International Fraternal Congress. The basis of representation shall be two representatives for a society having 50,000 members and less, three representatives for a society of 100,000 members, and an additional representative for each 100,000 members, but no society shall have more than four votes in the congress. The governing body, it was agreed, shall consist of an executive committee of seven members, and its power shall be full between conventions, except as to legislation.
