SUNDAY, APRIL 1, 1906.

THE NEWS THIS MORNING.

CONGRESS.—Senate: The Senate was not in session today. House: Private claims bills were considered.

FOREIGN.—The Moroccan police and bank questions were settled at a conference of the French and German plenipotentiaries at Algiers.

DOMESTIC.—At a conference at the White House among the President, Senators Allison, Dooliver, Cullom, Clapp and Attorney General Moody...

CITY.—Stocks were strong. Six laborers were injured by the collapsing of a wall of the old Broadway tuberculars.

THE WEATHER.—Indications for to-day: Fair and calm; temperature yesterday: Highest, 46 degrees; lowest, 35.

PEACE IN THE SOFT COAL FIELD.

The annulment by the United Mine Workers' convention of the ill considered Ryan resolution, followed by an acceptance of the Pittsburg Coal Company's offer to pay an advance of 5.55 per cent in wages, assures a more or less general peace in the bituminous coal field for the next two years.

Many of the operators in Ohio, Indiana and Illinois are still committed to a continuance of the present wage scale. Yet it is clear that they cannot long maintain their position, and that, even if they close their mines, there can be no serious soft coal famine.

tons and West Virginia 38,000,000 tons. On the other hand, Illinois mined about 38,000,000, Ohio 25,000,000 and Indiana about 10,000,000. These three states are thus credited with less than a quarter of the total output.

THE MOROCCO SETTLEMENT.

The controversy over Morocco is settled. The international conference at Algiers yesterday reached an amicable agreement upon the disputed points of police and financial control.

There is no occasion to enlarge greatly upon the question of victory or defeat as between France and Germany. Each has gained something, and each has conceded something.

Early in the controversy, it may be recalled, the German Colonial Society and the Pan-German League urged that the imperial government should insist upon Germany's having at least one Moroccan port for her own and also important commercial and territorial concessions.

TO STOP FILIBUSTERING.

Cordial approval is to be given to the shrewd and energetic efforts which are being officially made to prevent the smuggling of contraband munitions of war into the Dominican Republic.

THE GREATEST OF EMPIRES.

The census of the British Empire, which was actually taken five years ago, but which, because of the unprecedented magnitude of the work of analysis and tabulation, has only just been published, affords an impressive reminder and justification of Webster's eulogy—"a Power to which, for purposes of foreign conquest and subjugation, Rome in the height of her glory is not to be compared."

CLINGING TO THE SOIL IN FRANCE.

The cry of "Back to the land" which is much heard and may be profitably heeded in some places, has no force in France. There the people are clinging to the soil in a manner perhaps unrivaled in the world.

HER FIRM STAND.

An Iberian maid of fair and fat, Knew emphatically where she was at; Said she: "Bring your beaux, I'm not making of them; But, sure, for me own, I stand fast."

world has known and the greatest of which the measurable future has promise, save—in some respects only—the great republican realm which is an offshoot of the same British stock.

FOR A PURE BALLOT.

While New York is discussing bills for the prevention of corrupt practices at elections Connecticut has been passing some, and it is encouraging to learn that citizens of both parties are aroused to see that they are thoroughly enforced.

CITY VERSUS SPECULATORS.

The enlargement of Bronx Park by the acquisition of ninety-two acres on its northeastern boundary, including the ancient little village of Brouxdale, should not prove costly to this city.

The chief argument advanced by those who urged this addition to Bronx Park was that it would not cost much. It was pointed out that it contained some handsome trees and pleasant stretches of lawn, but it was conceded that all these beauties of nature were so far removed from the crowded districts of the city that few could now enjoy them.

NOTES OF SOCIETY IN WASHINGTON.

THE TALK OF THE DAY.

The Pope objects to a profile portrait of himself. To an artist who wished to paint him in that position, he said: "I want to look straight out from the canvas! I always like to look people straight in the face, not sideways."

THE REV. EDWARD A. HORTON.

The Rev. Edward A. Horton, of Boston, told this story at a recent banquet of the Ancient and Honorable Artillery Company. "A woman went marketing in Faneuil Hall," said the minister. "She stopped before a stall where were displayed fowl so aged as to seem almost unsalable. 'What do you sell those for?' inquired the woman, wondering if the proprietor would dare call them chickens. 'We usually sell them for profit, marm,' was the answer. 'I could never think of giving them away. But, sure, for me own, I stand fast.'"

Mr. and Mrs. Gouverneur Morris are also recording congratulations on the birth of a daughter at Spencer House, West Chester, the country place of Mrs. Morris's parents, Mr. and Mrs. James M. Waterbury.

1,275 and in 1901 there were 2,329. Not only is France, in brief, a distinctively agricultural nation, but also French agriculture is distinctively a highly organized, specialized and developed industry and art.

AT THE WHITE HOUSE.

Washington, March 31.—Senator La Follette, of Wisconsin, called at the White House this morning to urge the President to veto the bill providing for the settling of the affairs of the Five Civilized Tribes, because it contains a paragraph granting certain valuable mining lands near the railroads.
