He service when he squarely refuses to court the mob, but courageously invites its abuse while he goes quietly about his work.

NEW YORK REAL ESTATE RECORDS.

The Francis bill providing for the appointment by the District Attorney of a commissioner of records in the County of New York has passed the Assembly and gone to the Senate.

The condition of the real estate records in New York County has been a cause of just complaint for many years. Many of the record books, indexes and maps are in a disgraceful state of dilapidation.

Means of remedying the present conditions in the Register's and County Clerk's offices have long been discussed among lawyers and real estate owners. The county officials having charge of the records are frequently changed, and they have other important duties, so that these officials have done nothing to relieve the evils of which complaint is made.

FOR FOREST RESERVES.

It is earnestly to be hoped that the representations made this week to Congress in favor of the creation of White Mountain and Appalachian forest reserves will have effect.

There is in New Hampshire a tract of forest covered mountains which presents scenic splendors scarcely less precious than Niagara itself. In addition, that region supplies the sources of the most important water power now in use on this continent and contributes indispensably to the fertility of one of the most richly productive agricultural and horticultural regions.

Similar in kind, and scarcely less urgent in degree, is the proposal for a second national forest reserve in the Appalachians. There, also, scenery, residence and resort, agriculture and industry are interested. If the need seems less urgent to some, at present, than in the White Hills, the proportionate cost is also less, while the certainty of future need is unquestionable.

HOW TO HONOR THE BRAVE.

In anticipation of this week's ceremonies at Annapolis President Roosevelt evidently became impressed with some of the obligations which rest on the present generation, and the convictions which were thus inspired were uttered with his characteristic directness and energy.

PARTINGTONOFFSKY.

The Slavic Partingtons, and what not, perched upon patters and with mops in hand, are still trying to sweep back the rising tide of civilization. They have been in congress during the week, opposing the programme of the Constitutional Democrats of the Douma, and we must think, of the Czar himself.

their "Little Father," but he refused to see them. Then the trouble began. On May 10 next the historic sequel to that incident will be enacted.

Up to the hour of going to press no report has come to hand of any application of discipline to the lecturer who predicts a tidal wave and the earthquake for Havana next month. The Cubans evidently have greater self-control than had been supposed.

THE MARINE GAS ENGINE.

At the last meeting of the Institution of Naval Architects in London, Mr. Thornycroft, the well known builder of engines and small steam craft, discussed a comparatively new form of motor for marine service.

The great recommendation of the internal combustion motor, its economy, is more conspicuous with small engines than large ones. To develop 70 horsepower by gas Herr Capitaine needed only one-third as much fuel as when he employed steam.

THE TALK OF THE DAY.

"The Los Angeles Times" of last Saturday was a successful example of journalistic enterprise. It contained a graphic account of the behavior of the crowds in San Francisco the day after the earthquake, probably the most humanly interesting story that will be told of the sufferers from the great calamity.

Erskine—"Tell me," requests the young person, entering the study of the gray-bearded philosopher, "what is the difference between friendship and love?"

FLORID SENTENCES.

Music, the poet has remarked, is the savage's breath. But modern science has embarked upon a somewhat novel and horticultural way of looking at the human voice.

A LESSON TO DEMAGOGUES.

The Herast idea of government, which is in many respects similar to that which prevailed in France about a century ago, was the exercise of the right of petition, consisted in moving in a mob on Versailles or the Tuilleries, or in a desecrated setback yesterday.
