CORN CROP FIGURES. Estimate of 3,011,000,000 Bushels Made by Leading Authority.

The Jones-Ingalls corn production estimate for the year 1906 was issued yesterday. It is for 3,011,000,000 bushels.

Three conditions are brought out in this crop report. First, general stand, second, few empty stalks, third, size and perfect filling of ears.

It requires these three conditions to make a bumper crop. In obtaining 3,011,000,000 bushels we use the government acreage of 86,000,000, but admit the probability of error in this acreage, and would prefer to eliminate 2,000,000 from this total.

is increasing, especially in the surplus corn states, and this requires more land for pasture; yet the government seems inclined to increase acreage in these states. If this position on acreage is correct, there must be deducted about 12,000,000 bushels from the above total.

"In the estimate last year we were 200,000,000 bushels under in the last year figures. The movement of corn in the government seems to have favored this estimate. Should the above figures prove approximately accurate for 1906, the country must either feed more the coming year, or otherwise have a heavier marketing next season."

STOCKS GENERALLY LOWER.

PRICES DECLINE ON MODERATELY HEAVY DEALINGS.

Bank Statement Figures Show Big Gain in Cash and Reserve—Chances Against Further Heavy Gold Imports.
