

## RIVAL HORSE SHOWS WILL OPEN THIS WEEK IN MADISON SQUARE GARDEN AND THE AMERICAN MUSEUM OF NATURAL HISTORY.

Full of life and fashions strictly up to date will the former be, while the latter will display bones, fossile and equine styles a millions years old, which show the remote original of the horse, intermediate stages and the finished product.

NEOHIPPARION, AN EXTINCT HORSE OF GREAT SWIFTNES.  
(From painting by Charles R. Knight.)

THE RACEHORSE OF TO-DAY  
Skeleton of the great Sysonby, which won about \$200,000 in stakes for James R. Keene. Bones arranged as they were when he was running at top speed.

HYPHIPPIUS, THE FOREST HORSE.  
Beneath him a skeleton of Eohippus for comparison as to size. Hypohippus was about forty inches high and his side toes touched the ground.

ECHIPPIUS, THE "DAWN HORSE" OF THREE MILLION YEARS AGO.  
Above him is the skull of a modern horse for comparison as to size.
