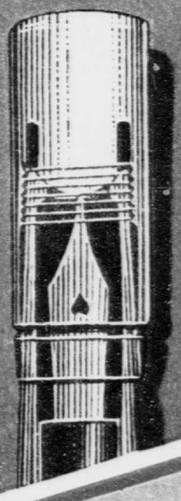
The Supremacy of Waterman's Ideals is unquestioned wherever there are civilized people

Three Standard Styles

We believe everyone wants a fountain pen and will buy one when these three styles are understood and their perfection realized. Their lasting usefulness is established all over the world.

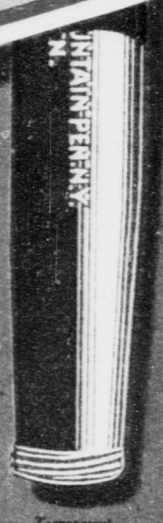
The Pen with the Clip-Cap

There are only five parts to a Waterman's Ideal. Four are hard rubber and made with the finest finish under such precision and care that all fit together to an infinitesimal fraction of an inch. The Gold Pen is the fifth part and in that is the perfection which makes all writing a pleasure.



The patented Spoon Feed is the greatest invention ever made for writing. The ink in the barrel is controlled absolutely from the first to the last drop contained. Writing without dip, skip, blot or blemish.

Waterman's IDEAL Fountain Pen



Transparent View

Safety Style

(In Centre)

A pen that can be carried, filled, in any position and cannot spill. The nib very handily screws down in the barrel and the cap seals the pen like a cork. Easily filled and cleaned.

The best pen for ladies.

Self-Filling Style

(At Right)

Provides the additional convenience of filling direct from the ink bottle, by the slight and convenient movement of the piston end.

"Ye Foggy Booke" on request

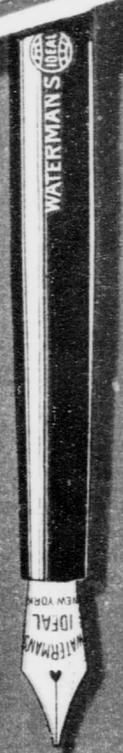
Cone Cap Style

(At Left)

The standard for a quarter-century. Large ink capacity. Easily filled and will write twenty thousand words with one filling. Practical shape and well balanced. Restful for the writer's fingers. All sizes. Plain at $2.50 upwards and Gold or Silver mounted styles. Clip-Cap 25c extra.



Waterman's Ideal Ink is the best grade ever produced.
