

RAILROADS ARE READY

CAN HANDLE ALL CROWDS.

More than Million Visitors Expected Here on Hudson-Fulton Opening.

The city is already filling up with the crowds coming to the Hudson-Fulton celebration, but the Hudson-Fulton is not expected until the end of the week.

No trains have been added to the regular schedules of either of these systems, but an unlimited number of special sections has been added to each.

The railroad officials say experience shows that on such an occasion the crowd begins to gather at the stations far in advance of the time.

The New York Central and the New Haven have taken as the basis of their plans the method that was used for the Dewey celebration.

The great homeward rush is expected at about the time the last regular train starts, at 12:30 a. m.

The same plan is to be followed by the Erie Railroad and other roads having their terminals in Jersey City.

Mr. Tansley, chairman of the art committee of the Republican Club, has written an account of the Revolutionary activities on the site of Bryant Park.

Mr. Tansley's account says that on the morning of September 15, 1789, the field now occupied by Bryant Park and the Public Library was the scene of a skirmish.

PICNIC'S FATAL ENDING.

Gasolene on Launch Explodes and Causes Panic.

A Mount Clemens, Mich., Sept. 19.—Theodore Engelder, Jr., eighteen years old, son of the pastor of the local German Lutheran Church, was drowned; Ray De Kay and Ray Groesbeck were badly burned about the hands and twenty-two seniors of the Mount Clemens High School, many of them, had a narrow escape from death when the 44-foot gasolene launch Saratoga, on which the party was returning from a picnic at Tashmoo Park yesterday, burned to the water's edge in the mouth of the Clinton River.

An explosion of gasolene caused the fire, and a panic ensued. Young Engelder jumped overboard in ten feet of water, and his body has not been recovered. De Kay and Groesbeck, owners of the launch, fought frantically to prevent boys and girls from following their companion overboard to almost certain death.

When the launch grounded they fought the panic-stricken crowd back from the rail, while the fastened a life preserver about each of the girls and dropped her overboard into the shallow water. Then the boys were each provided with a preserver and De Kay and Groesbeck, after having done all in their power, left the boat.

The excursion steamer Palos, two miles away, sighted the flames and crowded on all speed to the rescue. The survivors were nearly exhausted from their experience and the cold water when taken on board.

NEW SCHOOL OF JOURNALISM.

Department Created by New York University Will Open September 30.

A department of journalism has been created by the New York University, in charge of men identified with its school of commerce who have had practical newspaper experience. The instructors are Professor Joseph French Johnson, who was formerly head of the school of journalism at the University of Pennsylvania; Frank J. Warne, who is to be the director of the new department, a practical newspaper man of many years' experience; G. B. Hollister, of "The New York Evening Sun" and a graduate of Yale University; A. W. Atwood, financial editor of "The New York Press"; and Professor W. H. Lough, Jr., formerly of "The Wall Street Journal."

The courses will all be given between 8 and 10 p. m. in the University Building, at Washington Square, beginning September 30. Eight courses are announced. They comprise news writing, including some practice in copy reading and proof reading; current topics and sources of information; editorial and business management, advertising and circulation; the writing of special articles and editorials; the law of libel and copyright.

The criticism directed against the teaching of journalism at the University of Pennsylvania, "the basis of the claim that it can be taught only through actual experience. My experience, however, both as a practical newspaper man and as a teacher, makes me confident that a university can be of great service to any young man or woman who wishes to do newspaper work. Many of the young men who will enter the new school of journalism at the University of Pennsylvania in the fall are now doing very successful work, and I am quite certain that their university education and training have made them much better newspaper men than they would have been without it."

PIKE'S PEAK FOREST STATION.

To Test Feasibility of Artificial Regeneration of Pine Forests.

Washington, Sept. 19.—With a full fledged forest experiment station high up on Pike's Peak, in addition to the one at Flagstaff, Ariz., the Bureau of Forestry will endeavor to minimize "the injury resulting from mistaken practices" in its domain. An outline of the work proposed to be accomplished at these stations, which are similar in design to agricultural experiment stations in the different states, was made public to-day.

Already the feasibility of artificial regeneration of pine forests has been proved by the tests of a detailed study of natural and artificial regeneration of such trees as Douglas fir, Engelmann spruce and the junipers is planned also. Tests will be conducted with a view of introducing trees superior to the native growth in various sections.

One problem to which much attention will be given will be that of the growth of immature trees left on an area of logging.

DWINDLING FOREST RESOURCES.

Alarming Situation Disclosed by United States Bureau of Forestry.

Washington, Sept. 19.—A startling situation has developed as the result of a taking of stock of the forestry resources of this country, according to Treadwell Cleveland, Jr., expert in the Bureau of Forestry, in a bulletin made public to-day, entitled "The Status of Forestry in the United States."

It has shown, Mr. Cleveland declares, that we are still destroying the forest as we use it; that we are taking from it every year three and a half times as much wood as is added by the new growth. It has shown that less than one-third of the growing tree felled by the lumbermen is ever used at all, so that two-thirds of all the timber cut is simply destroyed.

It has shown, Mr. Cleveland continues, that over 99 per cent of the forests in private hands—which comprise three-fourths of all the forest land and four-fifths of all the wood—has been devastated by destructive use and the sweep of unchecked fires, while less than 1 per cent is properly handled for successive crops or effectively protected from fires.

It is stated further that the forest as a resource is rapidly being obliterated.

After calling attention to the fact that it is not use which destroys the forests, but waste, the report declares that the problem is to be solved not by disease, but by wise use and protection.

LAY CONVENT CORNERSTONE.

The cornerstone of the addition to the Convent of Jesus-Mary, at No. 225 West 14th street, was laid yesterday afternoon by the Right Rev. Thomas F. Cusack, Auxiliary Bishop of New York. Father McNiff, of the Jesuit Order, preached the sermon.

FAREWELL AT ISLAND

BANDS' LAST SERENADE.

Police Broom Sweeps Resort Clean Before Dawn of Sunday.

Pessimists who think that there is no sentimental interest attached to the business of contributing to the gaiety of nations at Coney Island should have braved the coolness of a typical September evening and been among those present last night when the farewell serenades were given from the Luna Park to Dreamland across the avenue and started in on the first bars of "Way Down on the Swanee River." There was many a quaver in the rendition of the old tune, and many a tear was shed by the spectators of the ceremonies which marked the writing of "Flins" on the Coney Island.

When the last note of the old darkey song had died out on the keen air and Slaffer's Dreamland band had replied with "My Old Kentucky Home," both bands went across the avenue and repeated the serenade and response in front of Luna Park. Uniting forces, they then proceeded to the Coney Island station and to the firehouse and serenaded the patrons and guests of the Luna Park.

Under the command of Borough Inspector Holahan, District Inspector O'Brien and Captain Fenelly, of the Coney Island station, one thousand weary patrolmen who had been on duty for twelve consecutive hours were formed into a huge broom.

The broom was given a vigorous sweep of the beach and local officials marched abreast in the direction of the west end depot, sweeping all before them. Even the proprietors of small stands along the way were compelled to close up and join the movement. Several men dropped out from the platoons to see that instructions were carried out during the night.

Efforts to evade the edict of the police were thwarted. The plea that the Culver depot was the point of departure was silent and deserted as it is on a winter night. The confetti in the streets produced the effect of a bleak winter morning with the ground snow covered.

Only one serious accident was reported on the last night of the fall festival. Robert Greer, of No. 1238 Stebbins avenue, The Bronx, was thrown out of a car on the Whirlwind as it was rounding a sharp turn of its roadway as it passed the depot.

In the Coney Island court yesterday morning ninety-two prisoners were arraigned on the charge of disorderly conduct. All were arrested for rowdy actions the night before. The Coney Island station was taxed to its utmost capacity, and many of the prisoners spent the night in the Bath Beach or Sheepshead Bay stations. Magistrate Tighe handed out 50 fines to all who pleaded guilty, and continued the cases of the others. A large number could not raise the money to pay the fine, and it was not until late yesterday afternoon that the last of these was hauled off to the Raymond street jail.

KILLS HIMSELF AND HIS SON.

Man Was Despondent Because His Wife Was Critically Ill.

Chicago, Sept. 19.—Despondent because of his wife's illness, John F. Reich wrenched a gas fixture from the wall of his home and ended his life and that of his six-year-old son by asphyxiation here to-day.

Mrs. Reich is critically ill at a local hospital, unaware of the death of her husband and son. In a letter Reich explained that he had killed his son because he was afraid his wife would not be able to keep him with her because of her serious illness.

AGNOSTIC OUTTALKS EVANGELIST.

Former Spoke for Nearly Seven Hours in the Open Air.

Cleveland, Sept. 19.—A. Goldfeld, an agnostic, won the long time preaching contest on the public square here to-night, defeating Lawrence Schmitt, an evangelist.

Goldfeld preached for 6 hours, 44 minutes and 30 seconds, and his opponent's time was 32 minutes and 30 seconds shorter. Both men left the platform utterly exhausted, speaking in whispers after concluding their long talks.

From the start the odds were against the evangelist, but he was not less animated by a patrolman who had an idea, so he said, that the evangelist was going to sell something in violation of the city ordinance. Fully ten thousand persons stood in the square during the contest, and each speaker was greeted with cheers by his partisans. Traffic on the street lines was obstructed for a time.

Schmitt is disappointed with the result and wants another contest under more favorable circumstances.

MONSIGNOR FALCONIO REVIEWS 10,000.

Indiana and Ohio Catholic Societies Parade in Indianapolis.

Indianapolis, Sept. 19.—More than ten thousand persons marched in the parade of the Central Verein here this afternoon. The pageant, participated in by Catholic societies of Indiana and a portion of Ohio, was one of the most notable Catholic demonstrations ever held in this city.

Immediately after the parade the delegates to the Central Verein gathered in St. Cecilia Hall, where an address of welcome was made by Peter O'Holler, chairman of the local committee, and another by Mayor Bookwalter.

FALCONIO MAY BE CARDINAL.

Rome, Sept. 19.—It is stated that Monsignor Falconio, the Apostolic Delegate at Washington, will probably be made a cardinal at the January Consistory, and that he will be succeeded by Monsignor Aversa, the Apostolic Delegate to Cuba.

ROWDY KILLS A DETECTIVE.

Des Moines, Iowa, Sept. 19.—In a running fight with John Schmeizer here to-night, Frank Delmege, a city detective, was shot and instantly killed. Schmeizer received two bullets in his body, but it is thought he will recover.

KAHLER

COMFORT SHOE

WOMEN'S SHOES 4.50 MEN'S SHOES 6.00

DR. P. KAHLER & SONS

Superior Chiropodists. Allments of the feet treated.

CONDITIONS IN HAWAII.

Congressmen Sail for Home—Needs of Islands.

Honolulu, Sept. 19.—The United States Congressmen who have been making a trip in the Hawaiian Islands left here on the Pacific Mail liner Mongolia for San Francisco to-day. During their stay they made a thorough inspection of the needs of the archipelago, visiting the islands of Hawaii and Maui and the volcanic island of Kauai. They inspected the Hilo breakwater and the Pearl Harbor naval site, as well as many sugar plantations.

The Congressmen were cheered as they boarded the ship for home, thousands of Americans and natives lining the wharf.

At a farewell reception given last Thursday night by Prince Kalaniana'ole, Territorial Delegate, two thousand guests were present. Former Queen Liliuokalani was in the receiving line, as were also the consuls of various foreign countries, federal and local officials and army and navy officers.

The Hawaiian royal jewels were on exhibition. The Congressmen expressed their appreciation of the reception and the warmth of their welcome by the people of the islands.

The Congressmen on their trip have been impressed by the work of the public schools, which, they say, are moulding the mixed population into homogeneous citizens.

Congressman Albert F. Dawson, of Iowa, in an interview given here says that the greatest needs of the islands are improved transportation facilities with the mainland of the United States, better roads, more railroads and a safe harbor in each island of the group.

NEW SOCIALIST VIEW.

Germans Show Signs of Aiding Government Measures.

Leipzig, Sept. 19.—The annual convention of the Social Democratic party, which adjourned yesterday, showed that the so-called revisionist wing was stronger than at any previous convention. The debates and the votes taken at the convention clearly indicate that the Socialists are growing more willing to accept a programme for the gradual transformation of society through co-operation with the government and the political parties.

The debate of the course taken by Socialists members of the Reichstag in voting favor of an inheritance tax, showed that the convention favored this action, whereas the traditional tactics of the Socialist party had been to refuse all possible taxes to the government as it is now constituted.

The convention voted down a resolution which sought to commit the party against any form of co-operation with the Liberals, an action which the Berlin Radical organs say foreshadows a Socialist-Liberal alliance.

The convention adopted a resolution declaring a boycott on brandy in order to prevent the agrarian distillery owners from reaping advantages from the recently adopted brandy tax. The anti-brand party has been greeted with enthusiasm by the Socialist newspapers, which predict as a result a notable diminution in the consumption of brandy.

RUSSIAN POLICE CLOSE MEETING.

St. Petersburg, Sept. 19.—The police closed an electoral meeting to-day which was being held in the interests of Nicolaï N. Kuttler, ex-Minister of Agriculture, who has been nominated for the Douma to fill the vacancy caused by the expulsion last May of M. Kolubakkin. The police took this action because Professor Mitukoff, leader of the Constitutional Democrats, in his speech said that Russia was a limited monarchy.

BELGIAN CANALS INSPECTED.

Antwerp, Sept. 19.—Senator Theodore E. Burton, chairman of the National Waterways Commission of the United States, accompanied by several of the other commissioners, spent to-day inspecting the Willebroeck canal, which runs from Brussels to the River Rupel. They will visit the Charleroi canals to-morrow, and on Tuesday Bruges and the new port, Zeebrugge, arriving in Paris on Tuesday night. The commission has some valuable data in Belgium, where the canal system is excellent.

ICE BREAKER TOWED INTO PORT.

St. John's, N. F., Sept. 19.—Short of coal and provisions, the newly built Canadian government ice breaker, Earl Grey, arrived here to-day on her maiden trip, in tow of tugs. The Earl Grey was bound from Barrow to Quebec, but ran short of both fuel and coal, and on making land yesterday sent a dispatch to this port for tugs to tow her here. Five years ago a similar mishap befell the Canadian government steamer Scotia, and she was towed into this port by the steamer Furber, to which a salvage award was subsequently denied because the Scotia was the property of the British crown.

HAWAIIAN VOLCANO ACTIVE.

Honolulu, Sept. 19.—Reports received here by wireless said that the volcano Kilauea is extraordinarily active. Lava is rising fast and is now only 100 feet from the rim of the crater.

A BRITISH STEAMER DAMAGED.

Halifax, Sept. 19.—With her forepeak full of water, the British steamer Hoyle Bank, Captain King, from Sheet Harbor, N. S., for England, with a cargo of lumber, arrived in port to-day for repairs. The Hoyle Bank was coming out of Sheet Harbor on Friday when she ran ashore and stove a hole in her bow. The Hoyle Bank registers 2,150 tons and was formerly the steamer London.

LUMBER WORTH \$250,000 BURNED.

Midland, Ont., Sept. 19.—Fifteen million feet of lumber, covering fifteen acres of land in the Chew Brothers' yards here, was destroyed by fire this morning. The loss is estimated at \$250,000. The mill caught fire but was saved. Several firms own the lumber, partly insured.

ARRESTED FOR PLANTER'S MURDER.

Columbus, Ga., Sept. 19.—Blood stained clothing found at the cabin of Henry Betts, a negro, led to the arrest to-day of himself and four other negroes, charged with the murder of J. W. Smith, a wealthy planter of this city, whose body, covered with gash wounds and knife wounds, was found yesterday half hidden under earth and brush in the recesses of a swamp twelve miles southeast of this city.

Smith left here on horseback last Thursday and the next day his riderless horse arrived at the plantation, the saddle all covered with blood.

SUICIDE FOUND BY WIFE.

Rochester, Sept. 19.—James Greene, seventy-five years old and a lifelong resident of Cochocton, Steuben County, hung himself in his barn this afternoon, and was found later by his wife. He had been despondent because of ill-health.

Distinctive

Auto Coats for Men

& Women

Both barometer and thermometer are given to playing September tricks, and it is certainly the part of wisdom for those exposed to the outdoor changes incident to Fall weather and the use of the auto, to provide adequate protection for the person.

Fall Auto Coats, as presented by us, are thoroughly adapted for immediate wear—warm, but not weighty; always comfortable—never burdensome.

Models by O. Strom et Fils and La Belle Jardiniere, of Paris—for both of whom we are American representatives; also our own exclusive creations.

Auto Coats for Men, 15 to 50.00

of Rosebery cloths, wax cloths, chevots, worsteds, Mackintosh cloths, or Hyde Grade Sateen.

Auto Coats for Women, 20.00
