

## PROW OF UNCLE SAM'S "CONCRETE BATTLESHIP," SO CALLED, AND TYPE OF THE MIGHTY WEAPONS SHE WILL CARRY.

Drawing shows one end of the elliptical fort with thick walls of concrete, now being erected on the little island of El Fraile, in Manila Bay. Below is a gun of the 14-inch style, and for purposes of comparison a body of twenty-one mounted troopers is placed in juxtaposition. The fort will carry two of these 14-inch guns, each 53½ feet long. For additional details see article inside.
