Entirely
Devoted
to the
Manufacture
of
Waterman's
Ideals

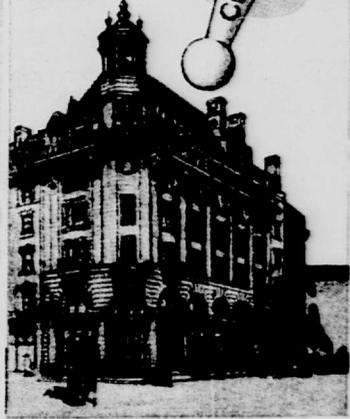

NEW TEN STORY CONCRETE FACTORY
NEW YORK CITY

(Officially Opened September 10th, 1910)

PROVIDING the entire world with its most successful writing implement has builded one of the largest industries in America. In our enormous new factory will center the responsibility of producing over a million pens a year; each one to receive its 210 careful operations of manufacture. These are then to be distributed from one end of the world to the other, into the hands of the people who are to be permanently satisfied to the same extent that has caused our business to double its size every five years of its history. Our production is the work of the very finest craftsman's skill, and the distribution is through our world-wide organization to the representative dealers of every enterprising city and town in the universe.
