New-York Tribune.

SUNDAY, OCTOBER 30, 1910.

This newspaper is owned and published by The Tribune Association, a New York corporation...

THE NEWS THIS MORNING.

FOREIGN.—Following Premier Briand's utterance in the Chamber of Deputies that he would have used illegal means...

DOMESTIC.—Henry L. Stimson spoke at enthusiastic meetings at Ticonderoga, Whitehall, Ballston, Henderson Falls, Glens Falls, Saratoga Springs, etc.

STOCKS.—Stocks were weak. Grahame-White won the international aviation trophy for England at Belmont Park, Leblanc, of the French team, fell when he arrived at Acapulco, Mexico.

THE WEATHER.—Indications for today: Fair. The temperature yesterday: Highest, 49 degrees; lowest, 27.

VOTE FOR THE PARK.

Another step in the work of securing for the people of this state the finest pleasure ground in the world was taken yesterday, when Mrs. Edward H. Harriman, in fulfillment of her promise...

EXIT THE GRANDFATHER CLAUSE.

The Democrats of Maryland have been preparing for several years for a tilt with the Fifteenth Amendment to the federal Constitution. They have twice submitted to the voters franchise amendments to the state constitution...

"GENIUS" AS AN EXCUSE.

We do not know what genius is. Psychology has not yet found a solution of the mystery, and consequently we lack as yet even an exact dictionary definition of the phenomenon. Rousseau was a genius and so was Napoleon; yet the two had absolutely nothing in common so far as the genius itself was concerned.

THE PUBLIC LECTURES.

To the Editor of The Tribune. Sir: The New York Board of Education is an up-to-date institution and has inaugurated public lectures to help the people. Permit me to offer a few suggestions.

THE TALK OF THE DAY.

Dr. W. A. Evans, Chicago's Health Commissioner and leading phreologist, is out with a new batch of "healthgrams." "Too much fresh air is just enough," says Dr. Evans, and the biggest bedroom in the world is not big enough to sleep in if the windows are shut.

THE ROOSEVELT BOGIE.

To the Editor of The Tribune. Sir: The writer is a young man by home training ought to be an Independent Democrat. After reading about all of the New York City newspapers on the state campaign now under way he concludes that it is not for the man of the name of Theodore Roosevelt at least two-thirds of the independent papers here which are now supporting Dix would support Stimson.

MEASURING OF CITY WATER.

Engineer Makes Certain Suggestions. Anent the Meter Problem. To the Editor of The Tribune. Sir: In a recent issue you publish an interesting article headed "Water Wastage Enormous." As an engineer I have been watching the New York methods of handling the water meter problem for the last two years, and I wish to call your attention to some of my observations.

THE DIPLOMATIC CORPS.

Washington, Oct. 29.—The Minister from Peru and Mrs. Pardo, who spent the summer at Blue Ridge Summit, Penn., will arrive here to-morrow and again establish the legation at the Shoreham for the winter. AMONG THE FEATURES OF THE HORSE SHOW AT MADISON SQUARE GARDEN WILL BE AN EXCEPTIONALLY LARGE NUMBER OF OFFICERS REPRESENTING THE CAVALRY OF THE UNITED STATES AND OF FOREIGN ARMIES.

All of them will ride in the uniforms of their respective regiments, and they will include French dragoons and lancers, English husars and

and take into consideration only their exceptional temperment when inquiring into the cause of their strange doings outside the field of their appointed work. But here again we are confronted with a vagueness of definition so great that the one expression, especially with the adjective "artistic" tacked on, is used, unchallenged, as an alternative for the other in order to avoid repetition in a well turned phrase of defence and justification. What is this "artistic temperment"? People all too often mistake a taste for a talent, and this artistic temperment may be either. In fact, it usually appears not to advance beyond the taste, in which case it is most assiduously cultivated as an explanation and an excuse until it becomes a habit; an innocuous one, perhaps, such as, for instance, forgetting dinner engagements, or a reprehensible one, that of domestic cantankerousness, first of all, not to forget lofty contempt of good manners, right feelings and the community's accepted standards of right and wrong.

The whole subject has as yet been allowed to float in such an atmosphere of vagueness of definition and understanding that only a slight suggestion can be made here of the beginning of an attempt to weigh more closely and to apply considerable more common sense to the validity of both "genius" and the "artistic temperment" as explanations of all and excuses for actions that occur fully as often in the lives of those who lay no claim to the possession of either.

THE SIMPLE TRUTH.

Those Republicans who mistakenly feel that by voting for Mr. Dix for Governor they may be doing indirectly a service to President Taft should study the following sentences from Senator Root's speech last Friday night:

It is said that we must consider now the nomination for the Presidency in 1912. Well, Mr. Taft is President of the United States—a Republican President, a strong, wise, considerate and fearless President. If he continues to me as good a President as he is making now, he will be the natural and inevitable candidate of his party in 1912 unless one thing shall happen—that the people of the United States shall repudiate the administration of Mr. Taft by such a crushing and overwhelming defeat of his party that it will be apparent that Mr. Taft cannot be re-elected.

The Democratic party cannot bring about such a result, but Republicans can by their adverse votes. After election people don't scrutinize the multitude of reasons which may have contributed to the result. They see only the general party ticket and the name of the candidate, and if it should happen that the administration can hold its own party together the national convention would lead them out of the wilderness, they might go to Mr. Roosevelt, they might go to one of the far more radical leaders who are now looming up on the political horizon in the North and Middle West.

No one who wishes to see the Taft administration succeed and President Taft renominated and re-elected can further those wishes by voting for Mr. Dix.

PROPHETIC.

About this time look out for prophecies for the coming year. Superstition, latent during a brief period in the last quarter of the nineteenth century, and therefore believed to be dying by optimists, is lifting its head again with all the old-time trustfulness and hopes and fears. Mother Shipton smiles to Mme. de Thèbes across the interregnum of logic. We shall hear soon from the Parisian sibyl what we may expect in 1911. Meanwhile, her English confrère, "Old Moore," is already on the spot with his annual prognostications, tabulated month by month.

January will be uneventful for the world at large, but England will have a new government. Conservatives, take notice. In February Spain will startle the world, and Uncle Sam had better follow suit. Uncle Sam had better prepare for May, when China will awake near China, while in June our present problem will reach an acute phase. It usually does not until later in the heated term, at least not in New York and last summer it did not boil over at all here. However, forewarned is forearmed. In the same month Ireland will brighten up things with a Donnybrook fair sort of diversification. Continental European politics will help newspaper editors through the dull days of August, and renewed German disturbances will carry them through September. Furthermore, England will have another spy scare in October. There will be a rising in the Balkans in November, too late in the season to achieve much, and the year will close with a calamity at sea. Then the year 1912 will open auspiciously, which must be welcome advance information to some of our pessimistic contemporaries.

The prophet makes several definite statements, only one of which, that of an airship accident, can be safely made a guess. "Old Moore" must be assumed to believe in his own powers of divination as much as those who hang upon his words. Most of his other prophecies, however arrived at, will unquestionably be disproved, but the public that believes in this sort of thing is inextricably patient and of amazingly short memory. It never remembers the failures of its prophets, it ever considers his faith justified by single accidental hits. And therein lies the secret of the endurance of the prophecy industry to this day.

THE TALK OF THE DAY.

Dr. W. A. Evans, Chicago's Health Commissioner and leading phreologist, is out with a new batch of "healthgrams." "Too much fresh air is just enough," says Dr. Evans, and the biggest bedroom in the world is not big enough to sleep in if the windows are shut. "The Evening Post" says that under Dr. Evans' guidance "Chicagoans are rapidly learning how to be healthy. They are learning the importance of fresh air, are finding out how to avoid disease and are seeking to discontinue the other life in Chicago and have good health, despite city conditions."
