FOR THE SIX-YEAR TERM.

[From The Brooklyn Eagle.] We regard it as fortunate, indeed, as most significant, that every essay toward a third term in the United States has aroused an aversion and a dread which have defeated it. We hope that will always be the case, and we have confidence that the people and the states will soon set a prohibition more than a single term in the Constitution itself, incidentally lengthening the one term from four to six years, with no reelection, as from four to six years, with no reelection. The term could well be lengthened, to reduce strain on a term of the present duration. It could well be made incapable of repetition, to remove from any President the temptation to pervert his service and patronage to the continuance of himself in place and to stir in each party the growth of statesmen fit to make its Presidents.

WITH A TIP ADDED.

[From The Philadelphia Inquirer.] We wish to call attention of the Pullman company that although liquor has been banished from their cars on trains east of Pittsburgh the proposition to introduce the quick lunch on dining cars is an unimproved step in another direction. A "quick lunch" is had enough as it is. A quick lunch at a dining car might prove fatal.
