

BLACKBURN ROVERS KEEP SOCCER LEAD

Lively Contests on English Fields in the Games of the Three Leagues.

TOTTENHAM HOTSPURS WIN BEFORE A CROWD

Bradford Eleven, the Surprise of Second Division, Beats Bardsley by Odd Goal.

London, Nov. 22.—Blackburn Rovers, in deadly earnest to keep the lead in the first division of the English Association Football League, entertained Sheffield Wednesday to-day and after a splendid game defeated the visitors by a score of 2 to 2.

Tottenham Hotspur made amends for their defeat the previous week by severely beating Everton before a crowd of 50,000 supporters by a score of 4 to 1.

The surprise of the second division was Bradford, tackling Barnsley away from home and winning after a splendid game by the odd goal in three.

Sheffield Wednesday, who were the first to be relegated, were defeated by a score of 2 to 0.

Woolwich Arsenal again rose to the occasion, and playing on their own ground, beat Birmingham 1 to 0.

Clapton Orient did well to share the points with Lincoln City at Lincoln.

Swindon Town was called upon to make a big effort in its Southern League game at home against the improved Brighton and Hove team.

The Queens Park Rangers appear at last to have got into their stride, and before a big crowd of their own supporters inflicted a severe defeat on Crystal Palace by a score of 3 to 1.

Watford and Portsmouth, playing away from home, both did splendidly to win their games, by the same score, 3 to 1.

West Ham United, who were the former champions, were defeated by the Hovers to a nil draw at Bristol.

Southampton, who were the former champions, were defeated by the Hovers to a nil draw at Bristol.

Swindon Town, who were the former champions, were defeated by the Hovers to a nil draw at Bristol.

HEINS DISCARDS HIS "DODO" BALL

Believes Good Bowler Can Get as Many Strikes with Fair as Unfair Sphere.

PRACTISED AND SAW ERROR OF HIS WAYS

Fought Long Against Ruling of Association That Stripped His Team of Honors.

William Heins, ranked as one of the best bowlers in the East, has discarded his far-famed unevenly balanced sphere and hereafter will use exclusively a ball which, as near as possible, will be balanced on the center.

It will be recalled that in the Metropolitan championship of 1911 Heins rolled as a member of the Corinthian team, and while at the time the use of the ball was not questioned a protest was lodged against the sphere when Heins and Fred Pump were about to roll their two-man matches shortly afterward.

In the meeting of the New York Bowling Association at which the decision of the tournament committee was submitted Heins admitted that his ball was unfair, but he did not sufficiently explain his attitude that all bowling balls were, in the strictest sense of the word, unfair.

Even up to the beginning of this season Heins persisted in the use of this instrument, and as a consequence was not permitted to represent his own academy, the Harlem Palace, in the Greater New York individual tourney.

Heins, however, has adhered to a strictly technical interpretation of the rule and refused to let the ball down for the admission of the unbalanced ball.

"I am convinced," said Heins, "that the arguments I have made in favor of the unbalanced ball are futile. I took occasion the other day to look up some of the bowling I had done with and without this sphere. It caused me to think long and hard. I can see no reason now why I should ever have used this particular kind of ball, when my own legitimate sphere has stood me in such good stead.

"I recall the time, some five or six years ago, when the Harlem Circle rolled 1,122 at the Harlem Circle Alleys and equalled what was at that time the world's five-man record for a single game. I was only a substitute on the team, and remember that it was the first time in the East had not been let down for the admission of the unbalanced ball.

"That same year I won the average in the 'Telegram' three-men, using a wooden ball, with figures of 214 for twenty games, and the year following captured the first prize with a 210 average for twenty games. A year later I once more stood at the top of the list, with 209 for twenty games, using the rubber ball, and although I was first in the 1910 averages, I figured only 193. I used a loaded ball, then. I have not won first average since with the instrument of which I used to be so proud.

"In the season of 1907 and 1908 I averaged 225 for twenty games in the Harlem League, using a rubber ball. In the Greater New York and Intercity in 1907, of which record I am proud, I averaged 302 for nearly three hundred games on various alleys and with the regular ball. In 1908 I averaged 198 for nearly three hundred games with the regular ball.

"I used to think that the unbalanced ball gave me a distinct advantage in that I could obtain a greater number of strikes with it. That was true on certain alleys, where I knew every splinter and joint in them, but when it came to alleys I had never seen before I found that the more evenly balanced ball was the better I could do. I have lost a number of matches through missing spares.

"With the evenly balanced ball I find that, while I may not bunch strikes, and fly to giddy heights as I used to, it is a more dependable arrangement.

"I therefore have the opportunity of making a spare and something more on the extra ball it brings me. I believe the good bowler can get as many strikes with the fair ball and I know it will do far better spare work, which, after all, is the science in bowling.

"I'm rolling the game of my life right now and I'm using as perfect a ball as can be obtained. Some people seem to think that I'm lost without it, but if they do I'm open to a proposition for any kind of a match, provided half the games are rolled on my own alleys.

"If a man can do as well with a proper ball as he can with a 'dodo,' then why not be on the clean side and give up the 'dodo'?" They kept me out of the greater part of the year because of my ball. I hope to get in next season, and believe me, if it is in my power I expect to go to Atlantic City for the national tournament, and no matter what others will do I shall stick to my own ball, now that I have become more proficient in its use. I think my friends will agree with me that I have taken the right tack.

"What is even more remarkable about the foregoing interview with Heins, outside of the consideration that he has gone back on the ball he championed so long, is the fact that all the prominent bowlers in the country, most of whom are of lesser weight, there is no one who generally has less to say. In fact, he is known as 'Silent Billy.'

Swindon Town, who were the former champions, were defeated by the Hovers to a nil draw at Bristol.

Swindon Town, who were the former champions, were defeated by the Hovers to a nil draw at Bristol.

English Papers Approve Ban on Rhodes Scholars

"A Double-Edged Weapon, Which Must Be Cautiously Used," Is One Opinion.

PROTESTS BRITISH LADS

All Agree That Athletes from Overseas Cannot Be Classed as Freshmen.

London, Nov. 22.—The action of the Oxford University athletic committee in debarring Rhodes scholars from freshmen sports by closing the University Club to men over twenty-four years old has excited comment pro and con in the London newspapers.

"The Evening Standard," which is usually quite anti-American, takes the stand that the ruling is logical, saying: "The reason is obvious. The Rhodes scholar is often not a freshman at all, and is very far from being a boy. He has been two or three years in college in the United States or the dominions before coming here, learning jumping with his study, and naturally is too strong for the British lad of nineteen, who has had to pursue athletics amateurishly in the intervals between study of the classics and compulsory cricket."

"The object of the Rhodes benefaction was to bring the best all around men from overseas, not to create school professional athletes. The English ideal has always been sport for recreation, pursued by young gentlemen who have other interests in life."

"This may not be the best method to achieve making records or winning points in the Olympic games, but it is the right spirit to cultivate in our schools and colleges."

"The Rhodes scholars are not sent to Oxford to win prizes, but to associate in their studies and amusements with our young men, and to carry back with them the influence of the best kind of culture the Old Country affords."

TIGERS CAN'T KEEP UP THE PACE OF N. Y. A. C. GUNNERS

Princeton Team Badly Beaten in Five-Man Team Match at Travers Island.

Princeton University were badly beaten by the gunners of the New York Athletic Club at Travers Island yesterday. The Tigers were no match for the Winged Foot experts, who won a five-man team race by 93 targets.

The aggregate totals were 423 to 340 targets in favor of the Travers Island ninjas. R. L. Spotts was the high gun of the winning team, breaking 94 out of a possible 100 targets. The cleverest Tiger was D. G. Turner, who had a total of 34 "kills" to his credit.

It looked liked old times at Travers Island yesterday. Twenty-two gunners were on the firing line, and in addition to the team shoot they decided a lengthy programme of weekly fixtures. Practically every event ended in a tie, and it was necessary to have a shoot-off before the winner could be announced.

The Travers Island trophy saw a tie among Dr. E. R. De Wolfe, H. H. Duden, and Dr. Culver. All had full scores of twenty-five targets. In the shoot-off Dr. De Wolfe kept up his good work, and again had a full total, winning from Mr. Duden by three targets. The high scratch prize went to R. L. Spotts, and for the first time this season the high handicap shoot ended in a tie.

The scores follow: INTER-TEAM SHOOT—100 TARGETS A MAN Princeton Univ. Strings of 25 targets. Total, 340. N. Y. A. C. Gunners. Total, 423. R. L. Spotts, 94; H. H. Duden, 93; Dr. Culver, 92; Dr. De Wolfe, 91; Dr. G. Turner, 34.

NOVEMBER CUP—25 TARGETS—HANDICAP. Names of the competitors, their handicaps, and their scores.

SHOOT-OFF—25 TARGETS—HANDICAP. Names of the competitors, their handicaps, and their scores.

CLUB TROPHY—25 TARGETS—HANDICAP. Names of the competitors, their handicaps, and their scores.

ACCOMPLISHMENT CUP—25 TARGETS—HANDICAP. Names of the competitors, their handicaps, and their scores.

SHOOT-OFF—25 TARGETS—HANDICAP. Names of the competitors, their handicaps, and their scores.

SHOOT-OFF—25 TARGETS—HANDICAP. Names of the competitors, their handicaps, and their scores.

Metropolitan Organization Is Favored to Re-establish Chess League

Efforts Being Made to Have the Manhattan Chess Club Start Movement.

LONDON FURNISHES MODEL

Efforts Being Made to Have the Manhattan Chess Club Start Movement.

In certain quarters attempts are being made to revive the establishment of a metropolitan chess league, similar to the one which provided some interesting and exciting team matches between the leading metropolitan chess clubs, including the now defunct City Chess and Metropolitan Chess clubs, of this city, and that of Newark, N. J. As will be remembered, in addition to these clubs, the Manhattan, the Brooklyn and the Staten Island Chess clubs were represented in the league, and the first and only series of team matches played resulted in a victory for the Brooklyn Chess Club's team.

That such a combination of clubs, if properly managed, will produce keen rivalry among the clubs and incidentally contribute much toward popularizing the game, is evident. If any proof is needed club managers are respectfully requested to inquire into the doings of a similar organization in London, where there are more active chess players to be found than in the rest of the civilized world.

The trouble in New York and the reason why the once established Metropolitan League went to the wall is that most of the first rate players belong to nearly all the principal clubs in the city, and naturally difficulties arise in the selection of the teams, because none of the clubs like to have their members play against each other. But, inasmuch as the Manhattan Chess Club permitted one of its members to play for Brooklyn in its interclub matches, played last year and two years ago, ways and means might also be found to distribute first class players who belong to more than one club in an equitable manner, and thereby make it possible to bring about a series of team matches, which doubtless will prove as interesting as any similar encounter arranged in previous years.

It is to be hoped that the directors of the Manhattan Chess Club, the leading organization in this city, will deem it worth while to start a chess league in the right direction, and that other clubs would not be slow in accepting any feasible and equitable plan.

Following are the scores of two games, recently played in the match at Vienna, which, as was stated in The Tribune last week, was won by Dr. Tartakower.
