

SAYS NEW YORK HAS DEADLIEST HARBOR

Dr. G. A. Soper, of Sewerage Commission, Arraigns City's System.

FIGURES FOR TYPHOID NOT A TEST OF HEALTH

All Bacilli at Hand in Rivers, Expert Insists, Opposing Bathing Pavilions.

New York has the most unclean harbor of any port in the world, according to Dr. George A. Soper, president of the Metropolitan Sewerage Commission...

The city, on the other hand, has the most efficient health department in the world, according to the same authority...

"It is a question of keeping sewage out of the water or keeping the people out of the water," said Dr. Soper yesterday...

"I am a great believer in water sports. When I was a lad around New York I haunted the docks, and I have trained my small boys so that they can swim across the Hudson..."

"Dr. Simon Baruch has aptly said, 'Manhattan is a body of land surrounded by water. You have only to go to the foot of Broad st. to see a great sewer discharging into the river...'"

"That is what makes conditions such as they are in Newtown Creek, where the foul gases asphyxiated a woman the other day in Wallabout Basin and other points in the harbor..."

"Every great outbreak we have had in this country has always been preceded by warnings. It might have been a minor outbreak of disease, or such an incident as that reported in Newtown Creek..."

"The germs and bacilli of every disease known to medicine are poured into the North and East rivers. That may sound strange until you stop to think that the refuse from all the hospitals goes into the sewers and thence into the rivers..."

"Then every laboratory discards millions upon millions of disease germs in cultures of one kind or another. There are men at work in this city trying to find cures for every known disease, and their waste material goes into the sewers and from the sewers into the rivers..."

"Every great city has had to face this problem sooner or later. Boston had to face it. It is a generation ahead of us. Chicago made a river flow backward to keep from polluting the lake..."

"Philadelphia has tackled the matter in a sane and wholesome way, and Baltimore is completing a great work..."

"Marseilles harbor was formerly as dangerous as Port Said. That city, however, tunneled ninety miles through a mountain to get a vent for its refuse. The improvement is marvellous..."

"The number of deaths from typhoid is not the true test of the health of a water supply or sewage system. That yardstick has been used too long. The best test of the health of a city is the death ratio..."

"The corrected ratio, and not the crude ratio is the number of deaths of all ages per 100,000 inhabitants. The corrected test takes into consideration the ages and sex of the deceased. When that is done here it is found that the death rate is really..."

HIGHER THAN IT SHOULD BE, WHILE THAT OF LONDON IS LOWER THAN THE CRUDE FIGURES MAKE IT APPEAR.

"Here there are a great many more deaths of young people in the prime of life than there should be, while the deaths among the very young and the very old are fewer. In London it is the other way around..."

"There is but one solution. The harbor can be made healthful. Until that is done the policy of the Board of Health against permits for new bathing pavilions should be followed up..."

FIND STORES BAR DISHONEST CLERKS

U. S. Commissioners Hear from Witnesses Checks Big Establishments Employ.

The United States Commission on Industrial Relations, in its inquiry yesterday into conditions in the city department stores, took considerable testimony on the effectiveness with which employees are checked up in matters involving honesty...

Two witnesses, confessing dishonesty, appeared before the commission and told stories of lapses which caused their discharge. George Little, for two years a carpet cutter for the Greenhut-Siegel Cooper Company, confessed he lost his job because he had allowed another employee to put goods in a package he was preparing to take home...

Little said he bought about \$50 worth of carpet and that a friend secreted in the folds of the carpet about sixteen yards of lining...

"I thought it was a good thing," the witness said, "and I fell for it. I paid for the goods and then I was discharged..."

"Did you try to get work elsewhere?" asked W. D. Thompson, counsel for the commission...

"Yes," the witness replied. "I went to Stern's, worked a week and was dismissed because, I was told, my references were not satisfactory..."

"Miss Sylvia Schulman, of Brooklyn, who said she was engaged in clerical work, but refused to tell where, said she had been employed by A. I. Namm & Son, Brooklyn, and after four years was discharged because she 'dared to belong to the Retail Clerks' Union'..."

SAYS CITY BUILDING GOT OUT OF PLUMB

Stone Co. Sues Contractors for \$268,070, Charging Faulty Steel Work.

Alleged negligence and faulty work on the steel structure of the \$12,000,000 Municipal Building, which caused it to get out of plumb, is the basis of a \$268,070 breach of contract suit brought in the Federal District Court yesterday by the Mount Waldo Granite Works Company...

According to the Mount Waldo Company, its contract with the Thompson-Starrett Company began March 28, 1910. The Mount Waldo Company began setting the stone July 11, 1910. According to the contract the company was to have on hand at all times 75,000 cubic feet of stone...

Between October 6 of that year and April 11, 1911, the plaintiffs allege they brought down 250,000 cubic feet, which amount was far in excess of that called for...

Works had continued up to the seventh floor, June 15, 1911, according to the complaint, when, owing to the carelessness, negligence, faulty and unskillful work of the defendants in the steel structure, which got out of plumb, the granite work came to a sudden stop...

and the plaintiffs were obliged to recut the blocks and pay storage on the supply on hand until February, 1912. When the work was completed, the plaintiffs allege, the Thompson-Starrett Company had paid them only \$1,921,771 out of \$2,000,000...

The cornerstone of the Municipal Building was laid by Mayor McClellan in December, 1910. In the summer of 1911 there was a sudden hitch in the supply of the stonework. Later it was explained that labor troubles in the Maine quarries were responsible...

Soon after laying the cornerstone it was charged that the Bridge Department had not bored down to bedrock and in consequence that the north end of the building was on wet sand and sinking rapidly. This was denied by Commissioner O'Keefe, although the Thompson-Starrett Company was put to delay and expense in correcting defects in the steel structure said to have been caused by settling of the foundation...

There will be a real aviation party at Stelway Beach, Long Island, next week, when John E. Sloane, president of the Sloane Aeroplane Company, of this city, launches what he says is the most luxurious flying boat ever constructed...

Mr. Sloane, who is wed Miss Madeline Edison, daughter of Thomas A. Edison, this month, has invited a number of society friends to be present when the boat is shot into the water, and the affair is to be complete, champagne christening and all...

Since his entrance into the field of aeronautics Sloane has worked persistently to interest society people in the new sport, and he intends to follow up the launching of the new craft with a series of social events in which aviation will play a prominent part...

There will be aviation teas, where, instead of dancing, the guests will go for thrilling rides through the air. Pleasure trips and cruises by the air route also are included in his plans for the summer. In addition to these activities, Sloane announces that he will establish an aerial ferry between New Rochelle and Larchmont, where flying boats will be run on a regular schedule...

The new boat embodies many new features. The hull is of wide strips of mahogany, running from nose to stern, and the seams are packed with Irish linen and marine glue. In length the hull measures twenty-three feet and the beam is three feet...

The interior of the cockpit is lined with polished mahogany and fitted with cushioned automobile seats. Four passengers can be accommodated, and they will be protected from wind and spray by shields. "It'll fit the next one up so that the passengers can play bridge while in the air," said Sloane last night...

Mr. Sloane is a graduate of Columbia University and a member of the Columbia University and Aero clubs. He is a grand-nephew of the late Charles O'Connor, and the late ex-Mayor William R. Grace, as well as a first cousin of Mayor Mitchell. The Mayor will be invited to attend the launching of the boat...

10 STEPS; 1 TABLET FOR EACH; HE DIES

Horse Doctor, Suddenly Insane, Poisons Drink and Three Women Go to Hospital.

Mrs. Stella Reilly and her aunt, Mrs. John McFlanagan, were guests yesterday afternoon of Mrs. Elsie Dolan in her apartment at 389 East 136th st. Also in the apartment was William Timmerman, a veterinary surgeon, who had lodgings there. The women sent for a pitcher of beer and then left it on the dining room table. When Mrs. Reilly went for the beer a moment later she met Timmerman striding slowly out of the door...

At every step he took a tablet from a small bottle. He took ten steps and ten tablets. Then he showed her the label on the bottle. "See?" he said; "it's bichloride of mercury, all right..."

Mrs. Reilly thought he was joking. Timmerman went out and left the women drinking the beer. They had taken only a few swallows of it when they became ill. One of them struggled to the street, called Patrolman Van Voort and told him what had happened...

Just then Van Voort sighted Timmerman and started after him, catching him just as he was climbing on a Third av. trolley. Timmerman collapsed as the policeman seized him. Van Voort took charge of the man and sent Patrolman Mooney back to the house...

Mooney found the women scarcely conscious. He gave them quantities of milk and ordered an ambulance from Lincoln Hospital, where they were taken. Timmerman was hurried to the same institution...

There it was found that he had taken ten tablets of seven and a half grains each of bichloride, or a total of seventy-five grains. He died early this morning. Under orders from the coroner the beer was held for examination. It is believed that Timmerman, taken insane, poisoned the beer and then decided to take his own life. The women are expected to recover...

MACMECHEN HEADS AIRMEN'S SOCIETY

Sponsor for Pegoud's Proposed American Tour Is Made President.

The Aeronautical Society, which has been without a president ever since W. Irving Twombly was dropped from that post last year, at a meeting last night elected T. R. MacMechen to the office...

Mr. MacMechen is an authority on dirigibles and is actively interested in bringing to this country the French aviator, Pegoud, whose American tour has been discouraged by Orville Wright. Other officers elected: Frederick W. Barker, William J. Hammer, E. D. Anderson, C. W. Howell, Jr., and Louis R. Adams, vice-presidents; E. La Rue Jones, secretary, and Lewis R. Compton, treasurer...

After the election of officers, Leo Kronau, head of the Austrian Airship Company, of Vienna, gave a lecture on dirigibles. His talk was illustrated with an interesting collection of motion pictures showing Zeppelin balloons in action and other foreign aeronautical scenes...

William Dubliner, an electrical engineer, of this city, spoke on the use of wireless apparatus in connection with aeroplanes and dirigibles. He described some instruments invented by him, which have been adopted by several governments. Among them is a device by which messages can be received in an aeroplane by means of a tiny light which goes on and off, thus giving the code signals and obviating the difficulty which the noise of the motor would cause in a regularly transmitted message...

Grace, as well as a first cousin of Mayor Mitchell. The Mayor will be invited to attend the launching of the boat...

MORE PAY TO STOP TIPS

Pullman Company Urged to Give Porters Decent Wages.

San Francisco, June 11.—"It is up to you to stop these practices and pay your men decent wages," was the ultimatum delivered to-day by John M. Eshleman, president of the California State Railroad Commission, to Richmond Dean, general manager of the Pullman Company, in a spirited argument on the tipping evil at an official hearing on the question...

"You cannot stop tipping," argued Mr. Dean, "when the public can get better service by tips. It is human nature to bid for good service..."

"Mr. Dean, would you want to take part of your salary in gratuities?" Commissioner Eshleman asked. "Yes, if they were received under the same conditions that obtain in the service of the Pullman Company," was the answer...

"Then our standards of patriotism are vitally different," rejoined the commissioner. "A man is entitled to what is right and what he earns. Your idea is revolting to me..."

Edward B. McLean Loses Suit. Newport, R. I., June 11.—A jury in the Superior Court returned a verdict to-day for \$227.50 and interest in favor of Charles J. Barrie, former stable manager for Edward B. McLean, in his suit against Mr. McLean for money alleged to be due him. Barrie sued for \$1,200...
