

# REFRIGERATION by Electricity

The keeping of foods fresh and wholesome, Winter and Summer, is of increasing interest, with the prices of perishable foods soaring ever higher. Kelvinator Refrigeration Without Ice is an application of that peer of servants, Electricity, to cold-making. There is not an ounce of ice used in a refrigerator equipped with KELVINATOR, yet the temperature is maintained many degrees lower than is possible by ice. The electric cold is dry, crisp, unvarying.

Ice man, ice pan work and slop is a thing of the past for the home using Kelvinator Refrigeration Without Ice.

For table use cubes of pure, clear ice are frozen in pans that fit into space in the cold tank in the icebox. The cubes are easily removed from the pans and you may always be sure of a supply.

Wash day muss, slop and labor stops when the EASY VACUUM ELECTRIC WASHING MACHINE is installed. The average size wash is but a few minutes' work for this efficient machine. It operates on a scientific plan based on practical hand-methods evolved by centuries—improved and perfected by electric power.

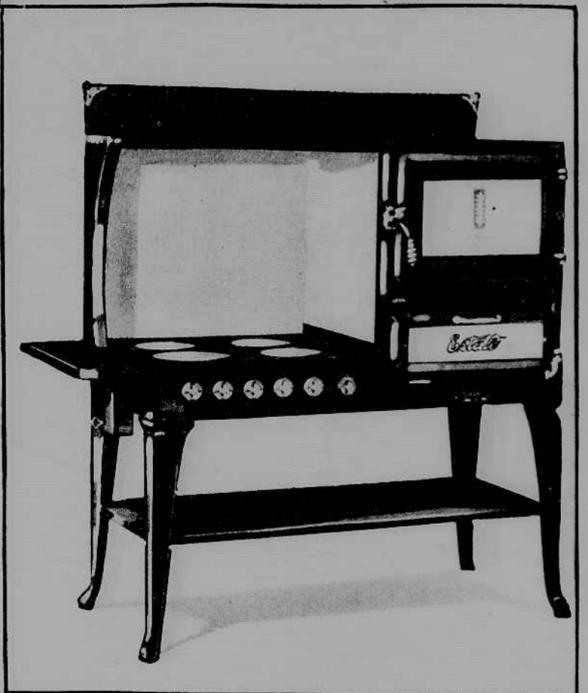

Two vacuum cups, rotating and moving up and down, force hot soapy water through the mesh of the fabric, taking out every bit of dirt. Anything from a filmy waist to a heavy blanket can be washed clean and wholesome.

# Electricity and its Model Aids Solve the Four Big Household Problems

THE Four Big Household problems have, at last, been satisfactorily solved by Electricity.

Keep your foods in an electrically operated refrigerator without ice—cook them on an electrically operated range. You can do the washing and cleaning and all of the important tasks of the most exacting household with the aid of these practical electrical labor-saving appliances. To do these tasks it is but necessary to turn the switch. The electrical servant is a specialist. It performs its tasks well. There are no uncertainties of the work being done. Without noise or upset to the comfort of the home, the day's tasks—the weekly duties—are performed with efficiency, speed and economy.

# COOKING by Electricity

Foods cooked by electricity are invariably tender and tasty because they retain their savory juices free from gas contamination. The practical model illustrated here is the ESTATE ELECTRIC RANGE NO. 84. It embodies many features not found in other types. Note the elevated bake oven and broiler; the high shelf over cooking top; the white enameled door panels and splashers; the thermometer in the oven door. It also has a white enameled broiler pan. We have other special types and makes to suit your individual needs.

Cooking by electricity is at par with other electrical activities. Clean, sanitary, dependable, electric cooking is matchless cooking.

Dust settles everywhere. It falls second by second, minute by minute. In twenty-four hours it has laid a film on the brightest woodwork, ba eboards and parquet floors. It buries itself in hangings, draperies and upholstered furniture, and if not immediately removed will destroy the fabric.

The America Electric Vacuum Cleaner is the housewife's right-hand weapon to clean without labor. The powerful suction of the America will remove every atom of the finest dust. Its divided, non-clogable brush removes lint, string and other matter from the nap of the rugs and carpets without injury to them.

Let us give you full details of these Four Big Family Helps. Call at our Display Rooms for a demonstration. Write or telephone us for the name of a dealer near you, who will be glad to tell you about them, and, if you like, he will sell them to you on the deferred payment plan.
