

A SQUIRREL COAT THAT WAS THE ENVY OF EVERY WOMAN ON SHIPEBOARD. Miss Rebecca S. Smith, a well known society beauty of Boston, arrives from Europe on the Olympic wearing a sumptuous wrap of squirrel fur worth at least six months' salary.

Right—"TAKE OUR PICTURE," yelp six blooded police dog puppies, and a brother pup obligingly acquiesces with a borrowed Graflex. This splendid litter attracted unusual attention during the sixth annual specialty show of the Shepherd Dog Club of America, held recently on the Widener estate at Elkins Park, Pa.

Left—ANT-LAND'S OWN WOOLWORTH BUILDING—a monster ant-hill some fifteen feet high that has been discovered near Muinga, South German East Africa. The weird mound, built up a grain of sand at a time, represents the untiring and scientific labors of millions of ants over many weeks.

Accidentally dropped from an 8th-story window —it did not break

"I very often happens that myself and a couple of other girls do not get time to go out for lunch, so we hit on the plan of bringing a vacuum bottle full of hot beverage to drink with a luncheon brought from home. The vacuum bottle in question was standing on the sill of an open window in the rest room of the First National Exhibitors Circuit, 6 West 48th St. (8th floor), by which firm we are employed, when one of the girls, without noticing it, leaned against the window, thereby throwing the bottle out. In its fall the bottle hit an extension one story high and from there bounced into a court which was one story below the street level—therefore, the fall really consisted of nine stories instead of eight.

"When the bottle was recovered and returned to us, although it seemed none the worse for the fall except for a slight dent in the body of the bottle and another in the cover, we expected, of course, that the inside was shattered to pieces. To test it we filled it the next day with hot chocolate, and found to our surprise that the chocolate was still hot in the middle of the day when the bottle was opened. I might mention that the bottle referred to had been in service a matter of nine months previous to its eventful fall." Miss Sadie McIntosh, 510 West 147th St., N. Y. City.

It was a Stanley Vacuum Bottle. Not even the terrific impact of a fall from an 8th-story window could break its walls of steel!

The Stanley Bottle is made entirely of steel. It eliminates for all time the expense and inconvenience of broken glass. It can never break.

Naturally the Stanley is more expensive than the ordinary vacuum bottle, but there are no expenses for repairs or replacements. The first cost is the last cost.

Every Stanley Bottle is lined with blue Amalite, a pure mineral coating which is fused into the steel—making a surface like porcelain.

Sold in one and two-quart sizes at all the better stores. An attractive gift for man or woman. Prices (East of the Rocky Mountains), black standard finish: quart size, \$10.00—2-quart size, \$15.00.

Stanley Insulating Company, Great Barrington, Mass. New York Office: 43 Exchange Place.
