Paul Deschanel

Ex-President of France, who was elected over Clemenceau by greatest majority ever given a candidate for that office following a long, spasmodic illness

PARIS, April 28 (By The Associated Press).—Paul Deschanel, former President of France, died to-day after an illness of less than a week.

The former President's eagerness to be up and doing, notwithstanding his long weakened condition, played an important part in the hastening of his death. He insisted last week on leaving his bed to attend to the funeral arrangements for the late President.

Retirement Considered Tragedy M. Deschanel's retirement from the Presidency because of illness and his effort to recover his position in Parliament were regarded by his friends as the greatest tragedies in French public life in recent years.

Charged Plots by Friends Deschanel began to believe he was being spied upon and conspired against. He suspected not only his political rivals but his friends.

Deschanel was really an obscure person in a place where once he had been one of the foremost figures of France.

The tenth President of the Third Republic had the shortest and least distinguished administration of all, though he began it in unsurpassed brilliancy.

Paul Eugène Louis Deschanel was born in 1857 at Brussels, where his father had gone six years before on being exiled from France by the Government.

Defeated for re-election to the Presidency of the Chamber in 1902, he was placed at the head of the Parliamentary Commission on Foreign Affairs and Colonies and there remained for seven years, steadily adding to his already brilliant prestige.
