These States will be kept until after the next Presidential election.

Mr. Trumbull said Mr. Johnson was mistaken in supposing that this was a measure hostile to the Executive. It was simply an amendment to carry out a constitutional power of Congress to prevent a practice which has been known to exist since the first session of the Senate.

Mr. Sherman said he believed Congress had the right to limit the power of the President to appoint. The pending proposition was, however, very harsh, and he believed before giving his assent to it, the Chairman of the Committee should report a bill to regulate the subject of removals and appointments, he would support it if it was judiciously framed.

Mr. Henderson said he had partially proposed a bill of the nature referred to by Mr. Sherman. He had come to the conclusion that the President had no constitutional power to remove any one from office.

Mr. Johnson said he had partially proposed a bill of the nature referred to by Mr. Sherman. He had come to the conclusion that the President had no constitutional power to remove any one from office.

estate beyond life shall be repealed so far as it relates to the seizure and forfeiture of enemy's property.

Mr. Hilly, of California, offered a resolution, which was adopted, reciting the allegations in responsible public journals that in the enforcement of the revenue laws of Boston and New York friends had been convicted on the ground of sex.

Mr. Conkling, of New York, presented the petition of Mrs. Batts and sixty-five other women of Hopkinton, Massachusetts, asking an amendment of the Constitution prohibiting the States from disfranchising citizens on the ground of sex.

On motion of Mr. Elliot, of Massachusetts, the Committee of the Whole on the State of the Union, was discharged from further consideration of the river and harbor improvement bill, and the bill came before the House at considerable length.

Mr. Donnelly asked Mr. Elliot to yield for an amendment to the section authorizing surveys to be made.

Mr. Elliot had no objection to that, and the following points were added to the section authorizing surveys to be made, namely, the Sombra River and the Cannon River, Minnesota, the Lake and mouth of Elkhorn Creek, Oregon, N. Y., and the St. Croix River, above the Lodge.

The previous question was seconded, the amendments agreed to, and the bill passed.

Mr. Blaine rose to a personal question, and asked to have read a letter from Gen. Fry, which he sent to the Clerk's desk.

Mr. Blaine stated that he wished to have this letter read for the double purpose of vindicating himself from the charges made against him, and of giving to the broad American sense of fair-play, an opportunity to a worthy officer to be heard in the forum where he has been assailed.

The Clerk then read the letter of Gen. Fry, in reply to the strictures of Mr. Roscoe Conkling, of N. Y. The letter is addressed to Mr. Blaine, thanking him for repelling the charges and insinuations of Mr. Conkling.

Mr. Blaine's assertions in regard to personal difficulties between Mr. Conkling and himself were completely justified by the facts. Gen. Fry then goes on to state that he had no personal connection with Mr. Conkling.

Mr. Conkling expressed the hope that all the documents would be read.

Mr. Roscoe moved that ten thousand extra copies of the correspondence be printed, which was referred to the printer.

The accompanying documents, rather voluminous, were read by the Clerk.

Mr. Conkling said he could assure the House with the utmost sincerity, that for everything in the extraordinary communication just read, which savored of imputation on him, he was doubly consoled by the fact that he had written the letter in the belief of its being a vindication which would be good for the people and wholesome for the public ends.

Mr. Conkling said he would ask some member to move for a committee to investigate the subject.

FIRES.

In New Haven, Conn. About 1 o'clock this morning, one of the buildings of the New Haven Clock Company was discovered to be on fire.

The fire continued until about 3 o'clock, when it was extinguished. The loss is estimated at \$200,000.

In Pittsburgh, Pa. A fire broke out yesterday in the soap manufactory of Kier, Adams & Co., on Liberty street.

The fire continued until about 3 o'clock, when it was extinguished. The loss is estimated at \$100,000.

In Leavenworth, Kansas. Eight or ten buildings on Shawnee street, occupied as clothing stores and saloons, were burned on Saturday morning.

The fire continued until about 3 o'clock, when it was extinguished. The loss is estimated at \$25,000.

THE FENIANS.

A Committee of Investigation.

PHILADELPHIA, APRIL 30.—A large meeting of the officers of Fenian Circles was held in this city yesterday. A committee was appointed, under the chairmanship of District Centre Andrew Wynne.

The committee was charged with the duty of investigating the charges made against the Fenian officers in the recent meeting of the Fenian Council.

LOCAL NEWS.

NEW YORK AND THE VICINITY.

MOVING DAY AND ITS TRIBULATIONS.—To-day may be termed the anniversary of domestic disarrangement; the day when the troubles and vexations attendant upon house-keeping reach the culminating point—the approach of which every housewife dreads, and earnestly looks forward to with pleasure.

Nobody but those who have to change "headquarters" can conceive of the thousand and one little annoyances, the worry and vexation there is attendant upon the operation of changing one's residence.

Pat families will tell you their experience—that a difficulty he had in getting the bedstead to pieces; how he knocked the skin off his hand; what a job he had to pack the furniture so that it would not get scratched; how, when it was safe for the carman, that individual did not arrive at the appointed time, and that he began to fear that the "man with the truck" had been bought off by some other mover; how, when the carman appeared on the scene, and he (Mr. P.) was just ready to move out, Mr. Jones, who had taken the house for the ensuing term, arrived bag and baggage, and insisted on "moving in"; how the furniture got mixed up, and what a row there was; how, at last, all the "duds" were loaded on the truck, and when said truck moved off he followed at a respectful distance behind, to see that all went right; that, all of a sudden, the wheel of the cart went in a rut and tilted off a barrel filled with crockery ware; how the carman picked it up and said "there ain't nothing broke," which, on an after-examination, proved most exactly correct; that when he reached the new house the old tenants were not quite moved out; that they asked him if he would like to have "several articles which they thought of leaving behind, and which might prove useful," etc.; how he accepted and afterwards had to pay \$3.00 to have the "articles" carted to the dumping ground; how about 10 P. M. "he got through"; how necessary he had found it during the day to take a little something to keep him from getting nervous, until the hour above mentioned he felt more jovial, and began to think "he'd got through better than he expected"; how Mrs. P. called him a brute and declared she was disgusted with him, adding, in a general way, that she was "never so tired and miserable before in all her life"; how all the family had to sleep on the floor the first night, and were annoyed by insects that were evidently not mosquitoes; that he had to get up at daybreak and help fix up the stove; that the pipe would not fit; that after much sweating and considerable blessing of the apparatus, he left it in disgust and went to business without any breakfast, after having exercised himself into a ravenous appetite by spanking the seven children all round. All the above and much more every individual can relate as his experience of moving. But what a relief to get comfortably fixed in the new dwelling, and be conscious of the fact that the domestic appliances are not to be disturbed necessarily for another twelve months! And how happy the individual that has not to move at all! The streets were pretty well filled yesterday with trucks loaded with furniture, and a great deal of "packing up" of goods was going on indoors, and this morning no doubt most of the latter will be seen on the sidewalks and in vehicles, although it is thought that moving will not be so general on this day as on previous occasions.

THE CHOLERA—REPORTS TO YESTERDAY.—No New Cases.—Dr. Swinburne reported to the Board of Health yesterday that the vessels in quarantine were in good condition, and that the work of cleaning and fumigation was still going on. The passengers on board the Virginia and England are well and cheerful, and since the latter left Halifax, there have been no symptoms of cholera having appeared.
