

NEWS OF THE MINING WORLD.

THE NEW RAILROAD INTO MEXICO WILL BOOM THE MINING BUSINESS.

A New Process of Reducing Refractory Gold Ores—Promising Strikes in Several New Regions—Unfold Millions Yet to be Dug Out of the Cascade Range in Oregon.

SILVER CITY, N. M., July 7.—The railroad into Mexico is at last a certainty. By the terms of the contract 145 miles from Deming south must be completed within a year. Work has been commenced at Deming and will be pushed with all possible rapidity into the Sierra Madre Mountains, where the richest mines of Mexico are situated. This also assures the building of large smelting works at Deming to treat these ores as well as the smelting area at Southwestern New Mexico and southern Arizona. A large number of miners are ready to go into Mexico to locate claims, and already some are looking up claims near the line of the new road. An important discovery has been made about forty-five miles from Deming across the border, and several thousand feet along the lead has already been located by the discoverers. Some very rich ore has been taken out and the discoverers are confident that they have a bonanza. The building of the new road will revolutionize mining in the Sierra Madre.

The Silver Mining Company of Lake Valley has a large body of good ore in sight, but is not taking it out. About seventy-five lenses are at work, but the company does not allow them to work in the best part of the mine. The company will soon start up the large lida-tion works at Lake Valley, and then the mine will be worked on a large scale. William Burke, Albuquerque reporter having made a valuable discovery of native silver on the Navajo Indian reservation, but the Navajos do not appear to be inclined to allow white men to work mines on the reservation, and it is not likely that even the discovery of a valuable silver lode will induce the Navajos to live in making investigations. Glowing reports of the mineral wealth of the Navajo reservation are frequently brought in by adventurous miners who elude the watchful Indians, but many prospectors who have gone into the reservation have never returned, and it is not fair to presume that the Navajos are inclined to be peaceable, but they do not look favorably upon the encroachments of white men, and their ideas are likely to be respected in this matter for many years to come, unless they are removed or the Indians are being driven out of the reservation. This has been urged for some years in order to allow miners to enter the reservation.

At San Pedro the output still continues to increase, and although reports from that district have been somewhat exaggerated, it is among the best producing districts of the territory. The output from the Lucky mine, the principal mine of the district, is shipped to Locomo for treatment and the owners of the mine are making a rich harvest.

There is more work going on now in the zinc mines at Hancock than at any previous time. Both carbonate and sulphate ores are being taken out in large quantities, and the zinc is shipped at a fair profit. Zinc reduction works are being talked of in the vicinity of the mines, but this will only increase the profit to a slight degree until the zinc is sold at a price higher than at present. As soon as the Bonora, Sinaloa, and Chihuahua railroad connects the zinc mines with the coast, zinc will be delivered at Deming for about one-half the price which is now charged for it, and the zinc mines of the district will be worked on a large scale. The machinery is nearly all in, and the stamps will be dropping zinc ore from the mill in a few days. Pinos Altos has had no trouble this summer about their water supply, and indications of a fine crop of wheat are being seen. Development work on the Minnesota mine at Pinos Altos is resulting very satisfactorily. A fine little mine has been discovered, and the prospect is very encouraging. This mine is on the east side of the camp, and is a little over a mile from the main camp. The early development of that part of the camp will be interesting.

PROGRESS IN THE BLACK HILLS.

DEADWOOD, Dak., July 2.—The Cora Mining Company of California is taking out high grade ore at average rate of 100 tons per day, and is producing silver per ton. It is a fine grain galena ore, the seam being about eight inches thick, and very easily broken. The ore is about 400 feet and is six by eight in the clear. The ore is very flat, and has been crushed sixty feet in the mill. The ore is about eight inches in width. A double shift is employed. They now have about eight tons of ore on hand, and are prospecting for more. The ore is being shipped to Omaha in a few days. The prospect is very bright, and the company is well equipped for the work. The ore is being shipped to Omaha in a few days. The prospect is very bright, and the company is well equipped for the work.

MININGS IN IDAHO.

IDAHO CITY, Idaho, July 2.—Lolly Oakes and Joseph Oakes are opening a splendid mine on Grimes Creek, a short distance above Centerville. The mine is about 100 feet deep, and a depth of thirty feet shows a vein of galena that assays \$120 in gold, \$60 in silver, and \$60 in copper. The mine is about 100 feet deep, and a depth of thirty feet shows a vein of galena that assays \$120 in gold, \$60 in silver, and \$60 in copper. The mine is about 100 feet deep, and a depth of thirty feet shows a vein of galena that assays \$120 in gold, \$60 in silver, and \$60 in copper.

MININGS IN WASHINGTON COUNTY.

At Mineral City, in Washington county, three miles from the underground construction, one of which is nearly completed. The mine is about 100 feet deep, and a depth of thirty feet shows a vein of galena that assays \$120 in gold, \$60 in silver, and \$60 in copper. IN THE REAL ESTATE FIELD.

SOME INTEREST IN TENEMENT SITES IN THE ANNEKED DISTRICT.

There is also the perennial demand for downtown business property—There has been some exchanging also, but the business is pretty general for all that. The general features of the real estate market are much the same. There have been no significant or important changes. Values remain pretty much as they were, and the movement, both at auction and by private sale, has dwindled to limited proportions. The intervention of the Fourth of July holiday naturally had some influence on a market just entered into its midsummer lull.

CHUCKS OF JOHN SILVER.

TEWSON, June 27.—A rich strike is reported at the Chicks of John Silver. The property is owned by Mrs. Lazard of Tombstone. An expert was sent out by the Chicks of John Silver to look up the strike. A vein of chloride ore was found that will assay up to \$100 in silver in a day of work.

MINING IN COLORADO.

DENVER, Col., July 3.—The Star of the West, a Colorado mine, is producing over 800 tons a month, the average value of which is over \$25 a ton. The mine is producing over 800 tons a month, the average value of which is over \$25 a ton.

A BALD KNOCKER FEED.

Four Hundred Men in Pursuit of Bill Miles, the Murderer.

OSARK, Mo., July 7.—The murder of Sheriff G. E. Branson and his deputy, Al Fink, has created some excitement in the whole country. The whole country is up in arms and in pursuit of Bill Miles. A mail carrier direct from Forsyth arrived to-day and brings an authentic account of the killing.

The Sheriff and his deputy, who were friends of the Bald Knocker, attempted to arrest the murderer of Sheriff G. E. Branson and his deputy, Al Fink. The brothers are noted for their hatred of the Bald Knocker, and were peaceable young men until the bloody Knocker feuds developed five years ago. Last August a citizen of Forsyth, named Harry, gave important evidence against the Bald Knocker, and received a letter from the brothers constituting themselves his protectors. Harry's business was ruined, and Capt. Nat Kinney, the Bald Knocker chief, was appointed receiver.

The brothers asserted that Berry was the victim of a conspiracy. One day in August Jim Miles, the oldest brother, walked into the store. No one was there but Kinney. There was a short quarrel, then two shots, and Kinney was a corpse. Miles fled, and the brothers were indicted, and their case was to have been tried at Springfield in the fall.

Bill Miles, brother of Harry, was in Circuit Court, and was a strong friend of the dead Knocker. He was a peaceable young man, and was a member of the Knocker club. He was a peaceable young man, and was a member of the Knocker club. He was a peaceable young man, and was a member of the Knocker club.

DR. WATERS A SUICIDE.

He Could Not Breathe Again at 65 and Built Up a Practice. Dr. Joseph W. Waters, who lived in an attic room of the lodging house, 30 College place, committed suicide there early last evening. He had kept his room all day. At about 10 o'clock he was going to bed, and he sent some tea and toast up to him. An hour and a half later he went to the room to take away the dishes and found Dr. Waters lying dead in bed in his night clothes, with his spectacles on. His hands were folded across his breast and his right hand held a pistol. There was also a powder mark on his breast that looked as if he had shot into his chest. Mr. Koker notified the church street police, and they were called to the room. The police found on the table two letters addressed to Dr. Waters, one from the Mutual Life Insurance Company, 32 Nassau street, and one from the Mutual Life Insurance Company, 32 Nassau street, and one from the Mutual Life Insurance Company, 32 Nassau street.

A DELAYED MARRIAGE NOTICE.

Mr. Kay Lives at His Mother's House, and Mrs. Kay Remains with Her Family. A notice was printed yesterday announcing the marriage on May 9 of William H. Kay of 168 South Second street, Brooklyn, to Ellie Brandage of 217 Lorimer street. The ceremony took place at the residence of the Rev. Dr. Spruell of the Noble Street Presbyterian Church, at 217 Lorimer street. Mrs. Kay's house is at 168 South Second street, and the bride's house is at 217 Lorimer street. The ceremony took place at the residence of the Rev. Dr. Spruell of the Noble Street Presbyterian Church, at 217 Lorimer street.

A Peeping Tom Receives a Load of Duck Shot in His Head.

David Hannaburg, a young carpenter living in Rhinebeck village, was caught looking in the windows of the house of Philip Pail at about 10 o'clock on Saturday night, and was shot in the head by a party who was watching him. The man was shot in the head by a party who was watching him. The man was shot in the head by a party who was watching him.

The Boulangerist Indictment.

PARIS, July 7.—It is said that the indictment against Gen. Boulanger, advised the arraignment of Gen. Boulanger, Count Dillon, and the other members of the High Court of Justice for conspiring against the safety of the State.

Members of Parliament Arrested.

LONDON, July 7.—Thomas P. Gill and Joseph H. Cox, Nationalist members of Parliament, were arrested in London to-day. They were charged with being in charge of a meeting at Dr. Drogda's in charge of a meeting.

The Pope's Successor.

BREMEN, July 7.—The Rome correspondent of the Independence Bells says that the Pope at the recent consistory advised that Cardinal Lavigne be selected as his successor.

SEA BREEZES AND SUNSHINE.

HOW A PRETTY LITTLE WOMAN ENTRAPPED A PERfidious HUSBAND.

A Mother Drowned at Manhattan Beach—Victims Plentiful at All the Resorts—The Thermometer Actively Engaged in Making People Uncomfortable. Yesterday was the star day of the season at Glen Island, so far as numbers and accidents were concerned. More than 12,000 people went up on the boats, and about 3,000 crossed over the ferry from New Rochelle. It seemed as if nearly every square foot of the island and its tributary park was covered. Many people took to the water because they were simply crowded off the land. During the afternoon the core near the pier was black with human heads bobbing about. The honesty of Glen Island frequenters was established beyond question yesterday, for \$1,500 in United States bonds was lost in the grand old during the afternoon while it was crowded with people, and the finder promptly surrendered it to the police. It reached the owner within an hour after he missed it.

Glen Island was treated to a dramatic scene upon real life, which was well worth the ride up there to see. It happened just as the Sam Slocum arrived at the dock, at 4:30 P. M., with a large crowd of people. A handsome, shapely little woman in a black silk gown, and a very plain, stern-faced Irish woman, had arrived several hours before with a crowd of people. They were waiting for the police business, and then sat down on a bench to wait for the police. Sheriff Branson called them for carrying weapons. Sheriff Branson called them for carrying weapons. Sheriff Branson called them for carrying weapons.

This dialogue which had taken place on Saturday in the home of an examiner on the right of the island, and it was a very interesting one. "I'm going up to Peekskill to-morrow, Mollie," he said to her. "Where you going?" "To Glen Island?" "No, I'm going to Peekskill to-morrow, Mollie." "Where you going?" "To Glen Island?" "No, I'm going to Peekskill to-morrow, Mollie." "Where you going?" "To Glen Island?" "No, I'm going to Peekskill to-morrow, Mollie."
