

A SING SING CONVICT KILLED

HE WAS A LONG-TERM MAN AND WAS TRYING TO ESCAPE.

Charles F. Vincent and James Welch, Cell-masters, Had Planned the Attempt—Welsh Got Through the Window, but Vincent Was Caught—He Made a Hot Fight with Keeper Post—Sergeant O'Ryan Shot Welch in the Leg as He Was Running Away.

There are few of the long-term men among the 1,500 convicts imprisoned in Sing Sing who do not boast that they would rather be killed in attempting to escape than serve out their sentences.

Charles S. Vincent, who was serving sixteen years for robbing a bank at the Westchester, entered the prison in September, 1883, and although he began to declare that he would get out or die in the attempt, the other convicts simply smiled. All long-term men said that, but it took a nervous man to carry out the boast.

Charles S. Vincent, who was serving sixteen years for robbing a bank at the Westchester, entered the prison in September, 1883, and although he began to declare that he would get out or die in the attempt, the other convicts simply smiled.

Five days ago Vincent was in the same cell with a convict named Thomas Welch. This cell was No. 853 on the third floor in the main part of the prison. The cell doors and the doors of the cells face the windows.

Between the cell doors and windows are the corridors, surrounded by railings, and there is a narrow passage between the railings and the window. At night the corridors are patrolled by four heavily armed guards.

On Sunday morning, Vincent and Welch were used to pry off the back plate. It was easy for force between the bars and the window. Vincent had arranged pieces of a mirror in their cell so that they could see the approach of the guard before the feet of the guard.

At six o'clock the two men worked in the dark. Vincent was on the floor and Welch was on the wall. Vincent was on the floor and Welch was on the wall.

The next second Post whipped out his revolver and Vincent sprang at him with a tiger's roar. Vincent sprang at him with a tiger's roar. Vincent sprang at him with a tiger's roar.

Welsh fled to the window and pushed his head and shoulders through. Vincent followed him. Vincent followed him. Vincent followed him.

PASSING FORGED CHECKS.

A Sharp Victimizing Keepers of Seaside Resorts.

Chicago, Aug. 22.—Today brought to the notice of bankers here a carefully planned scheme of forgery. The names assumed by the sharper is B. J. Whitlop. The places of operation are Boston, Providence, and New York. The checks are drawn on the Atlas National Bank of this city, and as far as has been discovered, are made payable to J. B. Stevenson, by whom they are endorsed.

From the evidence obtainable it seems that they are first cashed by some seaside hotel keeper, and then passed through the bank of which the duped hotel keeper is a customer. The checks are drawn for reasonable small amounts, but follow each other in such rapid succession that if Whipple has not soon under lock and key the sums of money which he may obtain from the trustful are likely to run up into high figures.

On Friday a check for \$500 was unearthed. Yesterday there was another for \$100. Each check was made in the name of the Atlas National Bank, and their worthlessness was at once discovered. One came to the Atlas from the Illinois National Bank and the other from the First National, each having passed through the corresponding houses of those institutions.

These checks were dated Aug. 6, so that the forger has already three weeks' start, and it is highly probable that he has availed himself of any opportunity which has presented itself. Whipple has supplied himself with a quantity of checks, and has secured an impression of the certificate stamp. The certificate stamp, and this is the only mark of detection, is a simple one, and it easily leads to detection.

For J. B. Stevenson, he appears to be a myth. There is no such name in that portion of the city where the forger is believed to reside. All the bank managers declare that this scheme is a new one so far as the certificate stamp is concerned.

THE TRANSPORTATION EXHIBIT.

What Has Been Done for Rapid Transit Will Be Shown at the World's Fair.

Chicago, Aug. 22.—The department of transportation at the World's Fair will be one of the most interesting of all the exhibits. Everything that has been done in the construction of rapid transit systems will be exemplified. The exhibit will cover twenty-six acres of ground. Not only the United States, but England, France, Germany, Switzerland, and Russia are contributing handsomely.

England will send some of the first steam locomotives of the world, and also a model of the London Underground. Switzerland will show how the Alps have been tunneled and how passengers are conveyed through their fastnesses. The Pennsylvania Railroad will show a model of the Pennsylvania Railroad, including the station and ticket agent. The Vanderbilt system will show a model of the Vanderbilt system, including the station and ticket agent.

The Baltimore and Ohio has appropriated \$1,000,000 for the construction of a new line of rapid transit. The Baltimore and Ohio has appropriated \$1,000,000 for the construction of a new line of rapid transit.

The general counsel for the Texas and Pacific Railway Company in this city received yesterday from the attorney for the road in Dallas, Tex., the following despatch: Judge McLean has held up a long and opinion unyielding the right of the bondholders to bring suit, and grants all relief prayed for by complainants. He in effect holds the entire act unconstitutional. A complete victory for us.

The decision referred to was rendered in the suit brought by the Mercantile Trust Company of this city, trustee of the second mortgage bonds, to test the constitutionality of the Texas Railroad Commission act. Under this act the commissioners fixed rates of interest on the bonds, and the result was that the value of the bonds was reduced to a very small amount.

One of the most important provisions of the Texas Railroad Commission act provides that the rate of interest on the bonds shall be fixed by the commissioners. The result was that the value of the bonds was reduced to a very small amount.

The Jersey City Street and Water Commissioners yesterday held an executive session of two hours' duration, as a result of which several employees at Belleville were reappointed by resolution. This is designed to remove objections raised by Mayor Wanser. The fact of the reappointment was announced, and it was decided to call the Board of Finance to convene in a resolution to substitute six return tubular boilers for those now in use.

BUNCH KILLED IN A SWAMP.

THE NOTORIOUS TRAIN ROBBER DIED SHOOTING AT DETECTIVES.

He and a Companion, Haggood, were Cornered in Pearl River Swamp, Between Louisiana and Mississippi, on Honey Island, Where They Had Been Hiding for Several Months.

NEW ORLEANS, Aug. 22.—Eugene Bunch, the train robber and outlaw, is dead, riddled by the bullets of the detectives who have been on his track for two weeks. Bunch in the last four years had robbed the railroad and express companies of nearly \$100,000. He moved to Washington, La., close to the Mississippi river, and he hid there, especially as his money had won him many friends. But the detectives were on his track all the time for the railroad and express companies felt that they were not safe long in the swamp.

The detectives had been quite close to him several times, but he was kept informed of their movements, and always escaped them until yesterday, when he was caught in the Pearl River swamp. The detectives had made it so hot for Bunch that he could no longer stay in the swamp, and he finally made for Honey Island, in the Pearl River swamp. This island is in the middle of Pearl River, and between Louisiana and Mississippi. For years it has been a notorious hiding place for outlaws and fugitives from justice.

Bunch kept every foot of the island as well as Bunch, having visited it several times in search for criminals. The detectives, five in number, led by Jackson, started out from Franklinton yesterday morning toward the island. They were on horseback, and the greater portion of the distance was made in this way. They learned that Bunch had been at the "old muster ground," eighteen miles from Franklinton. The farmhouse there was surrounded, and after opening fire the detectives broke into it only to find that Bunch and his companion, Haggood, had fled toward the Pearl River.

The detectives followed the fugitives toward the river, and the latter were seen to make a slow march through the heavy underbrush, walking Indian file and creeping under the branches of the trees. The detectives were careful, as an ambush was feared. After walking through the swamp for a time they reached a clearing, and Bunch and Haggood were seen in an open hammock. Bunch and Haggood were seen in an open hammock.

When the horses were reached the body was placed on one and the party started toward the river. Bunch and Haggood were seen to make a slow march through the heavy underbrush, walking Indian file and creeping under the branches of the trees. The detectives were careful, as an ambush was feared.

MR. WAHINGTON'S LIGHT.

A SIGNAL BEAM SHOT OVER FORT-LAND, 35 MILES AWAY.

The Shaft of Light Was 90 Miles High at Fortland, and Yet It Could Be Directly Seen at Fort-Land, 35 Miles Away.

MOVIE WASHINGTON, Aug. 22.—Each day brings forward the big electric search light which Electrician L. H. Rogers has placed on this summit in going to revolutionize the system of signalling. Letters and telegrams from various parts of New England arrive every day telling of the practical value of the light as a means of transmitting communications when wires are not at hand or have been severed by one cause or another. The distance between this station and Portland is about sixty-five miles in a bee line, yet even at that distance a message was flashed through the air, which was read by a flashlight at Fort-Land, 35 miles away.

ACTOR DABOLL KILLS HIMSELF.

He Committed Suicide in a Massachusetts Town by Taking Poison.

HOLLYWOOD, Mass., Aug. 22.—Actor W. S. Daboll, whose impersonation of the thief in the original "Ermine" company made him famous in the theatrical world, committed suicide here this afternoon by swallowing a dose of poison. He has been spending the summer at the residence of Wellington Slocum, at the residence of Wellington Slocum, at the residence of Wellington Slocum.

Mr. Daboll was born in Providence, and was 35 years old. He leaves a wife and two children here and two sisters in Providence. He has been on the stage some fifteen years, but in early life intended to be an Episcopal minister. For an hour or so before taking the poison he had taken poison and bade her goodbye. When asked what it was he replied, "No matter."

STRIKERS STILL VIOLENT.

THEY AND THEIR SYMPATHIZERS TRY TO STOP THE MOVING OF TRAINS.

Conflicts with the Soldiers—Two of the Rioters Shot, but Not Seriously Wounded, and Some Receive Bruises—The Western New York and Pennsylvania Switchmen Refuse to Handle Freight from the Central and Are Discharged, and Most of Them Join the Strikers—Grand Master Arrives in Buffalo—He Says Emphatically That the Firemen Will Not Go Out Unless the Engineers, Conductors, Trainmen, and Telegraphers Agree to Join Them—A Conference of the Chiefs of All the Railroad Organizations on the Question of a General Strike.

BUFFALO, Aug. 22.—Two men have been shot and no less than twenty more have been stabbed with bayonets in the streets of Buffalo yesterday afternoon, and the shooting and the stabbing are still going on. There is not now, nor has there been, any organized riot. These cases are isolated ones. They took place in parts of the city widely separated from each other. The trouble that made them necessary arose from the fact that the lawless lawlessness of the strikers and of their friends. It illustrates the necessity of the presence of the troops to protect the lives and the property of the peaceful and law-abiding citizens of the city. If the troops were withdrawn to-morrow there is hardly a doubt that the lawless lawlessness of the strikers and of their friends. It illustrates the necessity of the presence of the troops to protect the lives and the property of the peaceful and law-abiding citizens of the city.

THREE BATHERS DROWNED.

Two of Them Met Death While Trying to Save the Life of the Third.

RIVERVIEW, Aug. 22.—Albert Van Voorhis, aged 30, his wife, Mary E., aged 24, and her sister, Hannah F., aged 27, were drowned this afternoon while bathing in the Hackensack River. Mr. Voorhis was a chemist in the employ of Gideon E. Moore of 235 Pearl street, New York. He and his wife, Miss Wells, Mrs. Waterbury, and two children, formed a party to pass the day on the shore.

Mrs. Van Voorhis, stepping into a hole where the water was very deep, cried for help, and her husband, although unable to swim, ran to her assistance, followed by Miss Wells. The drowning woman seized her would-be rescuer, but he was unable to support her, and she began to sink. Mrs. Waterbury can swim, and tried to drag the three exhausted people into shallow water, but almost lost her own life in the attempt.

All the bodies were recovered. Miss Wells and Mrs. Waterbury live in Jersey City. The bodies were recovered. Miss Wells and Mrs. Waterbury live in Jersey City.
