

DEFECTS IN THE NEW YORK. THE CRACK CRUISER WILL HAVE TO BE OVERHAULED.

Her Shortcomings First Pointed Out by the Inspection Board and Corroborated by a Report from Admiral Benham. The Cracks in the Ammunition Hoists and the Defects in the Engines Were Faulty.

WASHINGTON, April 20.—Secretary Herbert will make another investigation of the condition of the cruiser New York on her arrival at New York, and a careful inquiry will be instituted into the causes which have led certain officers on board to a statement with reference to the armament of the vessel which was not intended should be made public.

The ship is undoubtedly in a demoralized state, growing out of the severe rebuke administered by the Inspection Board, and the condemnation caused when the latest of her reports were given for the vessel, the latest of which comes from Admiral Benham, and was while the Admiral was in command of the station.

In this report Admiral Benham corroborates all that was said in the Belknap report made before the departure of the ship, and says that the crew and officers seem still unfamiliar with their duties, and that certain parts of the armament are in a state of disrepair.

The Board also reported that serious defects existed in the turret of the big ship, and that there seemed to be some foolish blunders around in the turret, and that the arrangement of the turret was defective.

There seem to have been some foolish blunders around in the turret, and that the arrangement of the turret was defective. The turret was found to be in a state of disrepair, and the arrangement of the turret was defective.

With all these changes, however, it is said that little improvement was found, and that the turret was found to be in a state of disrepair, and the arrangement of the turret was defective.

3,000 MINERS TO SHUT DOWN. THE GREAT COAL STRIKE TO BE BEGUN AT NOON TO-DAY.

The Leaders Say That 125,000 Men Will Get Work at Once and That 100,000 Are Expected to Follow—The Kansas and Colorado Men May Not Go Out, but the Others Have Promised to Do So.

CLEVELAND, April 20.—Speaking of the big coal strike ordered for to-morrow noon, a prominent Masillon operator says: "It will be the greatest coal miners' strike the world ever saw. It will not last later than next week, but it may be satisfactorily settled within two weeks. Probably 3,000 coal mines in the United States will be abandoned, and nearly a quarter of a million of miners will be idle. Of these mines 300 are in Ohio and 30 in the Masillon district. A majority of the operators believe that the strikers will have the right of the matter. But there is a minority which has proposed an amicable settlement, having the power that minorities occasionally secure."

COLUMBIA, April 20.—President McElride of the United Mine Workers made the following estimate of the number of miners that will go out at noon to-morrow, and their distribution among the States: Pennsylvania, 60,000; Ohio, 20,000; Iowa, 5,000; West Virginia, 6,000; Tennessee and Kentucky, 5,000; Missouri, 3,000; Alabama, 8,000; Colorado, 4,000; Indian Territory, 2,000; total, 132,000. These figures include, he explains, only those miners who have already declared their intention to go out. He feels that others will join in the strike to-morrow, and on or before May 1 he estimates that the movement will be joined by 20,000 miners in the coke region of Pennsylvania and 25,000 miners in southern Illinois, Missouri, and Kansas.

Eventually, he says, the anthracite miners will join in the strike, numbering 100,000. Encouraging letters were received from Organizers Tom Parr, in West Virginia, and Cameron Miller, in Indiana, this morning. Secretary P. A. McElride led to-day the President of the United Mine Workers, and the heads of the present and conduct the strike.

There is a probability that another fight will occur at the coal mines at Krebs, N. T., when the "hotbox" coal strike is put down. The strikers are now on the way from Texas, and the 5,000 miners who went on strike from Texas are now on the way from Texas, and the 5,000 miners who went on strike from Texas are now on the way from Texas.

At a mass meeting held here by the miners of the district it was unanimously agreed to suspend work to-morrow, and to hold a strike on Saturday, April 21. FARKHURST ON LOCAL POLITICS. Somebody Must Stand Aside, He Says—He Is After Another Police Captain.

After the members of the City Vigilance League who nearly filled Chickering Hall had listened to nearly two hours of talk against Tammany Hall last night, Dr. Farkhurst, who is President of the League, made the prediction that it would put up a candidate against Tammany for the Mayor next fall.

"I cannot give you a prepared speech to-night," he said, "because I have been writing what I call another of those little letters to one of our anti-Tammany friends, the Republican, of time and time, and it isn't finished yet. Tammany Hall," he said, "is no more part of the Democratic party than a man's corns, or warts, or cancers are part of his body, and you and I want to be when the citizens of New York can get rid of Tammany Hall. If they put up next fall three candidates for Mayor I am perfectly satisfied that the Tammany man will win."

"I have a way in this important matter. Are the Democrats willing to vote in a body for a Republican candidate for Mayor? If they are, I will propose to organize a party of our own, and I will propose to organize a party of our own, and I will propose to organize a party of our own."

Dr. Farkhurst said he wanted a band of young lawyers to join the League, to defend the League in court, and to defend the League in court, and to defend the League in court. He said he wanted a band of young lawyers to join the League, to defend the League in court, and to defend the League in court.

LANDED IN HER NIGHTGOWN. STORY OF A PATIENT DISCHARGED FROM NORTH BROOKER.

Found Afloat and Scarcely Clad in the Street, Although Her Address Was Known—Taken Home by Kindly Strangers—She Had Been Cured of Small-pox in Six Days.

Allice Morton, a young English woman who was an inmate of the Wetmore Home for Friendless Girls, 40 South Washington square, was this morning found afloat in the street, near the corner of the street, and taken home by kind strangers. She had been cured of small-pox in six days.

Early on the morning of Friday, the 13th, in Miss Morton what he regarded as symptoms of small-pox. Word was sent to the Bureau of Contagious Diseases, and Dr. A. Blauvelt confirmed the diagnosis and had the patient removed to the Reception Hospital as a suspect. Shortly afterward it was declared that the girl had the small-pox and she was transferred to the Health Department's hospital on North Brother Island.

She was found yesterday afternoon the girl was found afloat in the street up town. She was clad in her underclothing, a woolen nightgown, stockings, canvas shoes, an old shawl, and a hat. She was very much exhausted, and her face was pale. She had been cured of small-pox in six days.

THE BLUEFIELDS SITUATION. Capt. Watson of the San Francisco Tenth Hold of Affairs as Soon as He Arrived.

NEW ORLEANS, April 20.—The Picayune publishes the following from its Bluefields correspondent under date of April 13: "The American residents of Bluefields have been subjected since the 12th day of February last to a broken yesterday morning by the official information of the arrival of the United States cruiser San Francisco, about 8 P. M. on April 11 the San Francisco dropped anchor in the office of Bluefields, and after a short stay, the United States ship Magdielene. The usual courtesies were then exchanged between the commanders of the respective vessels. At 10 that night the Magdielene steamed away for Colon, and the San Francisco remained in Bluefields for six days. At 9 A. M. yesterday Capt. Watson, attended by his staff, came ashore and was received by the local officials. A conference was then held with the United States Consul, S. C. Brada, which lasted up to 11 P. M. The United States ship was accompanied by the United States ship Magdielene, and the United States ship Magdielene, and the United States ship Magdielene.
