Both Have Surpassed in Speed Anything of Their Size Afloat—Their Great Steaming Radius and Conquering Capacity—The Latest War Ships Like Them. WASHINGTON, July 15.—By the magnificent performance yesterday of the Minneapolis the navy scores its greatest triumph yet achieved in the construction of swift war ships, and beats the record of any foreign power in having two triple-screw vessels which have surpassed in speed the fastest vessels of their size afloat. There is only one other vessel in the world having three screws in the hull, the German war ship Kaiserin Augusta, whose speed has never reached twenty-one knots. The French never ago attempted to construct a vessel with three screws in the hull, but the undertaking was not made with any degree of success. No nationality of the many which are to be found in this city will be less into jubilation than the Spaniards. Except when something comes to bring them before the public, as did the visit of the Infanta Enalia, they are never heard of. The reason for this is their clannishness and their natural reserve. They have their own clubs and organizations, mostly well appointed, and they are very much attached to their own kind. They are very much attached to their own kind.

Milk Cans, pans, churns, bottles, everything which is used for milk, even down to the baby's bottle—these are things for which you need Pearline. With Pearline, they're cleaned more easily, more quickly, more economically, and more thoroughly, than with anything else known. The people who know most about milk say just that. We can't afford to print all the testimonials we hold.

They're free expressions of opinion—in conventions, in papers, everywhere where milk folks have a voice. Their enthusiasm about Pearline is genuine. And it's natural. For all kinds of washing and cleaning, nothing equals PEARLINE. Beware of imitations. JAMES PYLE, N. Y.
