

MECHANISM THAT FOLLOWS A MOTORMAN'S EVERY MOVEMENT.

An Electric Recorder That Shows the Position of a Train and the Amount of Power Used to Drive It...

Mr. C. C. Martin, Chief Engineer and Superintendent of the Brooklyn bridge, has expressed regret that the power house of the bridge was not situated and arranged that the people who pay for the bridge might see the machinery that operates it...

A lot of work had to be done before these engines could be put into use, and so, although the work was begun months ago, their trial runs were not made until Saturday, Jan. 23.

Changes had to be made in the building, and a number of new motors had to be added to the plant of the steam-making room. Just beyond the new engines and against the west wall of the power house are some of the most interesting of the appliances connected with this electrical plant.

LADIES' WINTER JACKETS. Our Last Offering.

The few remaining Jackets, about 300 in number, in four lots, at the lowest prices ever quoted:

Lot 1—\$2.00. Lot 2—\$4.75. Lot 3—\$6.25. Lot 4—\$7.75.

Cash or Liberal Credit. Terms to suit everybody. Everything must go regardless of cost. Bargains of all kinds—but only one kind of price—the best.

JAMES MCENERY, 86 and 88 Myrtle Av., Cor. Lawrence St., Brooklyn.

A CAPTIVE OF GERONIMO. The Experience of Aniceta Chavez Among the Apaches.

"During the last Apache war, ended ten years ago, there were two cases where white children were taken prisoners by the Indians and afterwards recaptured and restored to their friends."

"Both had better luck than poor Charlie McEnery, carried off fifteen years ago by Chief Canato's band after he had killed his father and mother. He was held captive among the Apaches for many months. It was largely on his account that Gen. Crook made his famous expedition down into the heart of the Sierra Madre, the story of which the late Capt. Bourke related in his book, 'An Apache Campaign.'"

At the last moment, when at the point of being rescued, he was killed by the Apaches or converted to their faith, who took measures to restore him to his friends."

"The first of the children captured and rescued in the last Apache war was Santiago McKin, whose experience among the Indians was told a few weeks ago in THE SUN. The other was a little ten-year-old Mexican girl, Aniceta Chavez. On June 20, 1880, a detachment of Mexican troops surprised Chief Geronimo's band, a band of two hundred Apaches, in Sonora. So sudden was their attack that the Indians fled, scattering to cover and at last making their escape. As the soldiers searched the scene of the fight for the wounded and the plunder, they discovered a little girl, ragged and barefooted, hiding among the rocks. She was a child of Mexican blood, and when she was made known to the soldiers, she was named Aniceta and friendly, she told them her name and story."

"She was Aniceta Chavez, who had been adopted into the family of a ranchman named Peck living near Calabansa, Ariz. On the night of April 27, when Geronimo made his bloody raid into the Santa Cruz valley, he killed her father and mother, and she was carried off into captivity. He thought she should be a surprise to a thing as to where her life was due primarily to her father's name, but she was compelled to surrender to the United States troops he might secure better terms by having a prisoner to divert the attention of the soldiers. So the girl was hurried along with her mother and compelled to witness the other murders and to witness the slaughter of the Peck ranch. It was hard work for her, but she was determined that her life depended on it. Several times that day the Apaches would have killed her, but Geronimo would not suffer it, though he allowed them to abuse and beat her to their hearts' content. But she was only at the beginning of her troubles. From the Santa Cruz valley the Indians swung back to the Sierra Madre, and their march through mountains and deserts pursued ceaselessly by troops on both sides of the river, they were compelled to stop for two nights in the same place. Their one meal a day, which they ate at night, was made of the roots of the yucca, but it was not too closely followed, the hand scattered. Usually the Indians had plenty of horses to ride, but they did their fighting on foot. They had excellent field glasses, captured from the United States army, and they were very expert in traveling. One Indian rode in advance of the band, and he was a danger to the rest of the band, for he was a specially good horse, and he was in the rear to signal to the others. Usually the Indians had plenty of horses to ride, but they did their fighting on foot. They had excellent field glasses, captured from the United States army, and they were very expert in traveling.
