

ALL MARKETS MAY BE OURS

SUGGESTIONS BY THOS. A. EDDY FOR EXPANDING OUR EXPORTS.

We need, Mr. Eddy, a Great American International Bank with branches in Far East and America, and an Emphatically Protected Mercantile Marine to Carry Our Goods.

Mr. Thomas A. Eddy of the firm of Flint, Eddy & Co. of this city has written a very interesting article upon "The Significance of our Expanding Export Trade," which has just been published in the Engineering Magazine.

"The increase in our exportation of manufactured goods for 1896," he says at the beginning, "is without a parallel in the history of American commerce." It was an increase of \$4,000,000 over the exports of 1895, and its total sum was \$228,571,000.

The development of mining, of railroad building, of electric plants for traction, power, and lighting purposes, and of engineering in all of its branches, Mr. Eddy says, is in its infancy in the newer countries of the world, and the great work that will be accomplished by the entry into those fields of our manufactures and machinery will be open to those countries in the same manner as American enterprise and American methods.

"That we have not worked hard to accomplish this in the eyes of the world," he says, "is a failure in our eyes. We need an American International Bank, he says, American merchants and manufacturers who wish to do foreign business on a large scale are dependent upon the credit of the banks of their own country.

Mr. Eddy brings out to work hard to accomplish this in the eyes of the world, he says, "is a failure in our eyes. We need an American International Bank, he says, American merchants and manufacturers who wish to do foreign business on a large scale are dependent upon the credit of the banks of their own country.

TO BE A GREAT SCIENTIFIC SHOW.

An Outline of the Academy of Science's Central Exhibitions.

The New York Academy of Science will hold its fourth annual exhibition and reception at the International Museum of Natural History on April 5 and 6. On April 5 the exhibition will be open only to members of the academy and invited guests.

Even the preliminary announcement which has been made of some of the novel things to be shown in these departments makes it evident that the visitors will be kept busy and interested.

Among the things which are to be shown in the astronomical section are a series of photographs of the moon, made recently at the Lick Observatory. These are the largest photographs of the moon that have ever been made.

In the botanical section a large exhibit is promised, which will be shown a number of new forms of plants and many microscopic specimens. Perhaps the most interesting and directly valuable part of this show will be a series of exhibits illustrating the different stages of preparing medicinal plants for market.

There will also be a number of proposed plans and models for the New York Zoological Park.

TO SHOW THE GRAVES OF PATRIOTS.

The Marker Adopted by the Society of the Sons of the American Revolution.

The accompanying illustration shows the marker which the National Society of the Sons of the American Revolution has devised for the designation of the graves of those who served in the American army or navy during the Revolutionary War. The Empire State Society of the Sons of the American Revolution is sending out pamphlets calling attention to the markers.

The markers are carefully guarded by the society. The maker is permitted to sell them only on the society's order, which is furnished upon proper application to Stephen M. Wright, secretary, and each one sold is duly recorded.

The marker is 25 inches long in all, the distance from the ground to the top of the cross being 18 inches. The diameter of the cross is 10 inches. On the back of the cross are sockets, so that the marker can be surmounted by the soldier's rifle.

BIKE TRAINS ON SUNDAYS.

The Schedule for Them Issued by the Elevated Railway Management.

A special notice concerning the running of bicycle trains on Sundays was issued by General Manager Frennelli of the Manhattan Elevated Railway yesterday.

The schedule for these trains is as follows: Stations. A. M. P. M. Northbound. 155th street 7:00 14:40

154th street 7:05 14:35
153rd street 7:10 14:30
152nd street 7:15 14:25
151st street 7:20 14:20

150th street 7:25 14:15
149th street 7:30 14:10
148th street 7:35 14:05
147th street 7:40 14:00

146th street 7:45 13:55
145th street 7:50 13:50
144th street 7:55 13:45
143rd street 8:00 13:40

142nd street 8:05 13:35
141st street 8:10 13:30
140th street 8:15 13:25
139th street 8:20 13:20

138th street 8:25 13:15
137th street 8:30 13:10
136th street 8:35 13:05
135th street 8:40 13:00

134th street 8:45 12:55
133rd street 8:50 12:50
132nd street 8:55 12:45
131st street 9:00 12:40

WOMEN NOT EMBARRASSED

HOW THEY ARE MEASURED UNDER THE BERTILLON SYSTEM.

Capt. O'Brien indignantly denies an Allegation That the Newly Adopted Method of Identifying Criminals Involves an Embarrassing Ordinal for Women Prisoners.

"We have measured a number of female prisoners," said Policeman Webb, "and not until to-day has there been any complaint. The complaint in this case is absolutely unfounded. I did the measuring myself. There was nobody in the room excepting Matron Traversa, and she is the only person other than the prisoner and the measurer who is ever present upon such occasions.

"The badge prisoner wore a long skirt so that her bare foot was only visible to the ankle. The barring of the foot and arm is necessary to enable the securing of accurate measurements. Just what was done with the prisoner in this case" was asked.

"The same as all women prisoners charged with crime undergo; nothing more. First she stood barefooted in an upright position, and her exact height was measured. Next her arms were extended in a straight line from her body with the hands outstretched, taking what is called the span measurement of the body, from finger tip to finger tip, the greatest length generally identical with the height of the body.

"The eighth measurement was that of the left foot extended, and her feet were bared to prevent deception, and she was required to stand upon her left foot, holding the right leg bent at the knee. The maximum length of the foot was then measured. Next the right arm, with the hand flat, was extended horizontally, and the length of the forearm was taken. Then the articulation near the shoulder was measured. It was described, and the length from the lower point of this scar to the elbow joint was recorded.

"The middle and little fingers of the left hand were bent at an exact right angle with the hand, and the length of each was measured. These fingers, in a normal condition, never vary during life, this measurement affords a most important factor in identifications.

"The system used in the case of male prisoners has been completely copied. When the measurements are all taken the police have an exact analysis of the subject's entire outward frame."

TROUBLES CAUSED BY BICYCLES.

Pedestrian Hit in the Face, Scorching Placed, and Heavy Home Broken Up.

Magistrate Cornell devoted most of the morning session in the Essex Market Court yesterday to trying cases where the bicycle was the main cause of the trouble.

Joseph Lawrence, a gripman on the Third avenue cable road, was arraigned for allowing his car to run into Edward Murtha, a member of Engine Company 18. Murtha sustained a dislocated leg and several severe bruises.

Magistrate Cornell scored the company heavily for not furnishing a bell, and said that arrests in cases like that were wrong. He released Lawrence on his own recognizance, and continued the case until Tuesday.

Hocco Caseno of 150 East Eighth street, who tried to ride fast down Third bicycle policeman O'Brien, was fined \$5.

Otto Petchaud of 527 Fifth street, when arraigned for failing to support his wife and child, said that she was not suffering from want, as she had money enough to invest in a bicycle.

Magistrate Cornell scored the company heavily for not furnishing a bell, and said that arrests in cases like that were wrong. He released Lawrence on his own recognizance, and continued the case until Tuesday.

Hocco Caseno of 150 East Eighth street, who tried to ride fast down Third bicycle policeman O'Brien, was fined \$5.

UNHAPPY INTERNATIONAL MATCH.

New Britain Showed Superior Game to the British Navy.

In an action brought by Nova Dayton Sherwood Montagu for a separation, on the grounds of cruelty and abandonment, from Nigel Montagu, a deposition of the mother of the defendant, taken in behalf of her son, has been filed in Supreme Court. The mother, Mrs. Anne Rachel Montagu, resides at 4 Hyde Park Mansions, London, West, and her evidence was taken before Consul-General Patrick Collins in London, as the result of an order made to that effect by Justice Fryer last December.

"Mrs. Montagu says that she met the plaintiff in London in 1893. The plaintiff returned to this country, and Montagu followed immediately and the witness then heard, in 1894, that he had clandestinely married the plaintiff. He was formerly an officer in the British navy, and the mother says that at school and in the navy he had been very caring, being a considerate and manly young man, and she cannot understand how he should now be charged with cruelty.

"After the marriage of the couple they went to London, where they put up at the Victoria, and in the Victoria Park Hotel, at the Continental Hotel, and the mother says: "Then they began a career of great expenditure, and the mother says that she says further: "It was only my intense love for my son that induced me to overlook the systematic disregard of his interests on plaintiff's part and offer him and my son a home until he improved his condition."

"Mrs. Montagu says that from the first she noticed that her son was being influenced by the plaintiff. To carry on the extravagant way of living required by the plaintiff, her son had borrowed large sums of money from his sister, for which loans their father came to this country, and the mother says that in some respects, and brings her back with the arm bared. None of the underclothing is disclosed.

"The mother says that she never heard of any charges of cruelty until the present charges were made, and she takes note that they are laid at Fort George in July, 1896, where the plaintiff was then in the army. The mother says that the attorney for the parties are reticent about the case, John J. Hunter appears for plaintiff and Fields & Deacon for the defendant.

STOCKHOLDER BLU OBJECTS

To Consolidation of J. W. Hinkley's Credit Guarantee Company with a London Concern.

Ferdinand S. M. Blum, a stockholder of the Mercantile Credit Guarantee Company, has obtained from Justice Beach of the Supreme Court a temporary injunction restraining the officers of that company from carrying out a resolution passed on March 23 by a vote of four to three of the directors for a consolidation with the Ocean Accident and Guarantee Corporation of London.

The order, which was secured by Horwitz & Hershey for Mr. Blum, is returnable on April 10. Blum complains that the consolidation is for \$250,000, and was in a flourishing condition at the time the consolidation was resolved upon. The seventh measurement was that of the left foot extended, and her feet were bared to prevent deception, and she was required to stand upon her left foot, holding the right leg bent at the knee.

"The eighth measurement was that of the left foot extended, and her feet were bared to prevent deception, and she was required to stand upon her left foot, holding the right leg bent at the knee. The maximum length of the foot was then measured. Next the right arm, with the hand flat, was extended horizontally, and the length of the forearm was taken. Then the articulation near the shoulder was measured. It was described, and the length from the lower point of this scar to the elbow joint was recorded.

"The middle and little fingers of the left hand were bent at an exact right angle with the hand, and the length of each was measured. These fingers, in a normal condition, never vary during life, this measurement affords a most important factor in identifications.

"The system used in the case of male prisoners has been completely copied. When the measurements are all taken the police have an exact analysis of the subject's entire outward frame."

Real Estate Private Sales.

Nothing has been bought from Emma P. De Groot No. 10 Fulton street, a four-story brick building on a small lot, for \$100,000.

Guaranteed Newark reports the sale of No. 102 and 104 West 10th street, for \$140,000.

Guaranteed Newark reports the sale of No. 102 and 104 West 10th street, for \$140,000.

Guaranteed Newark reports the sale of No. 102 and 104 West 10th street, for \$140,000.

GREATEST ALL THIS COUNTRY

Discoverer of Paine's Celery Compound to Whom Thousands Owe Their Life and Happiness.

"Excepting its handful of magnificent statesmen and its military heroes," says the most recent writer upon America, "the people owe more to Dr. Paine's physician-teacher than to any one man."

"In every walk of life, among the highest officeholders at Washington, in the homes of the best people in the large cities, among the every day folks of the country, families in comfortable circumstances, families that live from hand to mouth, and could not, if they wished, afford the services of any but an ordinary physician—everywhere I have met people who owe Paine's celery compound has been a blessing."

"The story of the life-work of this giant among men has been often told and is familiar to most readers. The likeness above is probably the best portrait of him yet published. It is not a mere tonic; it is not an ordinary nerve-tonic; it is far beyond them all as the diamond is superior to cheap glass."

"It makes people well. It is the one true specific for nervous debility, and has been tried by eminent practitioners for disease arising from a deranged nervous system. Prof. Phelps gave to his profession a positive cure for apoplexy, wasting strength, dyspepsia, biliousness, liver complaint, neuritis, rheumatism, all nervous diseases and kidney troubles. For all such complaints Paine's celery compound has succeeded again and again where every thing else has failed."

"So remedial was ever so highly recommended, because none ever accomplished so much. Today Paine's celery compound stands without competition for feeling exhausted nerves and bringing up the strength of the body. It cures radically and permanently. The nervous prostration and general debility from which thousands of women suffer so long that it finally gets to be a second nature with them—all this suffering and dependency can be very soon removed by recovery feeding the nerves, and replacing the unhealthily blood by a fresher, more highly vitalized fluid. A healthy increase in appetite and a corresponding gain in weight and strength naturally follow the use of Paine's celery compound."

"Paine's celery compound is the most remarkable medical achievement of this last half of the nineteenth century."

Prof. Phelps was born in Connecticut and graduated in medicine at Yale. His untiring labors brought him reputation and prominence among his professional brethren. He was a successful physician, a lecturer on anatomy and surgery in the Vermont University. Next he was appointed lecturer on anatomy at the medical college in Dartmouth College. The next year he was chosen professor of the chair then vacated by Prof. Hobbie, and he held the chair for the most important one in the country, at the time when he first formulated his most remarkable prescription.

"In view of the overwhelming testimony to the value of Paine's celery compound, which has recently appeared from men and women of national reputation, the picture of Prof. Phelps is particularly interesting. The fact is, Paine's celery compound is not a patent medicine; it is not a secret preparation; it is not a mere tonic; it is not an ordinary nerve-tonic; it is far beyond them all as the diamond is superior to cheap glass."

A healthy increase in appetite and a corresponding gain in weight and strength naturally follow the use of Paine's celery compound."

POST OFFICE BUILDING CHANGES.

The Money Order Department to Move into More Convenient Quarters.

A plan for extensive changes in the Post Office building has been approved by Postmaster Dayton. For a long time complaints have been made of the inaccessibility of the money order department, to reach which it is necessary, besides the elevator trip, to walk half a city block around corridors.

The work of making into double rooms the rooms on the north corridor formerly occupied by the Federal Court, will be proceeded with immediately. The ceilings of these rooms are very high, and it has been found possible to make each into two by building a new floor midway between the ceilings and the present floor.

As they are on the second floor, only a few steps are necessary to reach the money order department, this will save the public much inconvenience.

The money order department will vacate room 14, and this room will be taken possession of by the money order department. The employees and letters, who will move from their present quarters, rooms 11, 15, and 19 on the east corridor to room 14 on the west corridor. The employees in the auditor's department, who are at present touching elbows in their narrow quarters on the east corridor, will fall back to the old quarters of the missing letter department.

Highwaymen Caught on Work.

George Walker of 176 Jarvis street, Greenpoint, came over to the Bowery on Friday night for fun. At 3 o'clock yesterday morning Policeman Holbig saw Harry Edwards taking some money from Walker's pocket as the Greenpointer was drunkly driving his horse down the building at 15 Pell street. When Holbig ran back into the street, Edwards slipped the money back into Walker's pocket, but was found by Holbig in the rear of the horse. The money was searched six paces tickets, some \$1000 worth, and the horse was found in the Centre Street Court later Magistrate Mott held Edwards in \$2,000 for trial.

To Celebrate the Sending from Here of the First E. Misadventure to China.

A meeting is to be held in the Central Metropolitan Methodist Episcopal Temple, Seventh Avenue, near Fourteenth street, to-morrow evening, to commemorate the going of the first intrepid of the Methodist Episcopal Church to China. A farewell meeting was held in New York April 3, 1842, when the two missionaries, who then went to China, Dr. C. W. Whites and Dr. J. J. Ross, were present and will be present and give their reminiscences.

In Favor of Both Sitting Members.

The Committee on Privileges and Elections of the Assembly met at the City Hall yesterday and decided the contests in the Twenty-sixth and Twenty-seventh districts of this city in favor of the sitting members, Jeremiah J. Sullivan, Republican, in the Twenty-sixth, and Andrew J. Hannan, Democrat, in the Twenty-seventh. They did not open the ballot boxes.
