

CHICAGO GIRL IN TOWN.

WITNESSES ENTHUSIASM BROKEN UP BY NEW YORK WAYS.

Chicago girls are trying to become accepted in New York. The streets of New York are full of them. They are everywhere. They are everywhere. They are everywhere.

AT THE TEACHERS' COLLEGE.

The Glee Club Concert and the Attractive Course of Lectures.

The most important event of Teachers' College during the last week was the Glee Club concert. This was the first given at the college. The members of the club had been practicing assiduously for months to make it as perfect as possible.

A MARRIAGE THAT FAILED.

EVOLUTION INTO A TARTAR OF A SHY INDIAN BRIDE.

Parting of Billy Morse and Isabel Bear-Walking-Over-the-Hill. When the bride and groom were last seen together, they were in the Half-Breed-Taming of an Indian Shrew.

A VOLCANO FOR A WEEK.

The Big Hill Built in Seven Days, After Which All Potatoes Were Grown.

Prof. T. G. Bonney of London has just written an account of a volcano which appeared on N. 5 in the Science Series published by G. P. Putnam's Sons, New York. The distinguished geologist first gives an account of "a living volcano," using the phenomena observed at a large number of volcanoes to explain volcanic action.

ART OF WRITING JOKES.

THE SUPPLY LIKELY TO LAST SOME CENTURIES STILL.

Production Easy after the First Thousand of Food Jokes in an Hour on a Waager-System of Shaping One Idea to Suit All Customers—Good Points of the Calling.

"This makes the third request for my autograph this month," remarked the favored short-story writer, breaking the seal of a dainty square envelope in the presence of a friend whose profession was that of humorist and joke writer.

ask your Doctor

about

"FEED THE BLOOD"

TABLETS

And he will tell you:

That Ferratin is of scientific origin, the discovery of the eminent pharmacologist, Professor Schmelzberg of the University of Strasbourg;

That it is the identical form of iron contained in all our food, as recorded in all recent Medical Annuals, and in Text-books on Medicine, Physiological Chemistry, etc.;

That it is absorbed and utilized in the blood as the oxygen carrier—to feed every tissue of the body;

That it has stood the test of Hospital and of private medical practice; and

That it is now recognized as the specific IRON TONIC and BLOOD FOOD, to be taken in all cases of blood poverty and debility from any cause.

Promote Appetite, Increase Flesh and Weight, Build up the System, and Restore Good Health.

Every physician knows exactly what Ferratin is.

A FOOD

(not a medicine) recommended by physicians as a TONIC to create strength and to provide nourishment to the entire system in all cases of DEBILITY, for BLOOD POVERTY, and during CONVALESCENCE from IA GRIPPE, from Wasting Fevers and Diseases of all kinds; also for

Infants and Nursing Mothers, Young Children who lack vitality, School Children, pale and thin—"no life in them," Anemic Girls just budding into womanhood, Nervous Women at all ages, Young and Old Men, who are "RUN DOWN" in health from lack of exercise, from sedentary occupations, and from other causes.

50 Tablets in a box. SOLD BY ALL DRUGGISTS.

GOOD ROADS LEGISLATION.

Decided Improvements Made in Various States in the Course of the Year.

There has been a noteworthy advance in the construction of good roads in the United States and in the improvement of those not heretofore qualified for recognition is good. The National Highway Commission, established in 1892, was organized to create a general interest in the improvement of public roads, determine the best methods for building and maintaining them, secure the legislation, State or national, that may be necessary for their support, and conduct or foster such publications as may serve the public interest. This league was the outgrowth of the agitation for good roads which began in 1888 and has been greatly promoted by the popularity of bicycles. During the fiscal year of 1888 the object lessons in road building carried on by the Department of Agriculture have been diffused over a wider extent of territory than heretofore. Object lessons roads have been built near Baltimore, and near York in Harford county, Md. After completing this work the agent in charge, Mr. Harrison, was transferred to the State of Minnesota, where he is carrying on the work of instruction both by address at public meetings and by means of an object lesson road upon the State Fair.

The Agricultural College of Rhode Island at Kingston has added to the other subjects of discussion and instruction that of technical training in progressive modern road building. The report of the Federal expert shows that considerable headway has been made in the line of practical instruction. The feeling of the States is that the State Highway Department should be authorized to decide which roads, if any, are to be improved, and which roads are to be abandoned. The State Highway Department is authorized to decide which roads are to be improved, and which roads are to be abandoned. The State Highway Department is authorized to decide which roads are to be improved, and which roads are to be abandoned.

FILLS OF FASHION.

The details of dress are very important and nothing can furnish a much wider range in variety than the present display of neckwear. Every conceivable sort of collar band and necktie is shown in the shops, but here, as in everything else, one must consider the unbecoming differences. Lace scarfs nine inches wide and long enough to fill a hat seem to be worn by the waist or more generally becoming, perhaps, and they are made of needle-run lace, or of the material of the necktie, or of a chiffon, also decorated with applications of lace. Taffeta silk collar bands with tucks and cords are worn by the waist, and something quite novel is a stock of satin with a crossing scarf gathered with cords in the center. The new neckties are bordered silks embroidered with the borders with polka dots are very effective, made of the material of the necktie, or of a chiffon, also decorated with applications of lace. A Highways Commission has been appointed by the Legislature of Maryland to investigate the condition of the roads in that State, and to make estimates of cost for their improvement. The Hamilton Road bill has been passed by the Legislature of Maryland, and the bill provides for the election of road supervisors in the several townships of the commonwealth, to be elected by the voters of the townships, and to have the same powers and duties as the supervisors of the cities of Baltimore and Annapolis. The advantages of which in durability, smoothness, perfection of construction and general appearance are well known, and which are of great value to the State. To determine their qualities the Bureau of Roadways of the Agricultural Department has made an experimental road 500 feet long in Cayuga county, immediately adjoining the State Fair grounds. The road is in the shape of a loop, and is to be used for the purpose of showing the advantages of the new material. The road is to be used for the purpose of showing the advantages of the new material. The road is to be used for the purpose of showing the advantages of the new material.

THE REJECTING OVER PRESIDENT TAYLOR'S DECISION NOT TO GO TO BROWN.

POTOMAC, N. Y., March 10.—Vassar College and the city of Brown, N. Y., have rejected the decision of President Taylor to remain at Vassar. When the announcement was made by Mrs. Kendrick at chapel the students broke into a tumult of applause. Afterward they marched over to the President's house and sang and cheered until he responded to their enthusiasm by a short speech. The meeting of the faculty called on him during the evening to express their pleasure.
