

BULLER HELD IN CHECK.

ROTHA STOPS HIM AT A MOUNTAIN PASS NEAR LYDENBURG.

Fighting on Sunday, in which British were at a disadvantage—Accurate Boer Artillery Fire Kept Up All Day—Roberts Sends Help—Ladybrand Garrison Surrounds.

LONDON, Sept. 4.—A dispatch from Ladfontein, yesterday, says that Gen. Buller, on the morning of the 2nd, ordered the Boer army to be moved to the east of the mountain overlooking Lydenburg on Sept. 2. Gen. Buller commanded the enemy, which held the pass throughout the day.

The Boer artillery fire was severe. Upward of two thousand men, comprising the main body of the Boer army, were held in check by the British forces. The Boers were unable to retreat at nightfall. The Boer guns were accurately trained and were fired continuously all day, while the British, being unable to use their position for snipe fire effectively, advanced to the infantry.

Between the lines, and hidden in creeks and overgrown scrub, were numerous Boer sharpshooters. Gen. Buller occupied an exposed position on a ridge at the front. The behavior of his troops under heavy shell fire was excellent. The casualties were not stated.

A dispatch from Maseru, Basutoland, of yesterday's date, says that the British garrison at Ladysburg has been surrounded by the Boer commandos of Grobelaar, Lemmer and Haesebrouck and 200 of Theron's scouts.

The British, including the Boer commandos, have surrounded their military stores to prevent their capture.

Volleyfiring was audible at the time the dispatch was received, which indicated that the garrison was holding out. The silence of the Boer cannon was believed to be due to shortage of ammunition.

Gen. Buller is on his way to Ladysburg to rescue the garrison.

The Boers are assembled in large force in the vicinity of the river.

The War Office has received the following from Gen. Buller: "I have the honor to acknowledge the receipt of your letter of the 2nd inst., and in reply to inform you that the Boer army is now in the vicinity of Ladysburg, and is holding out."

"The Boers are assembled in large force in the vicinity of the river."

"The Boers are assembled in large force in the vicinity of the river."

PRISONS OUSTED AFTER 300 YEARS.

Done at Havana in Gen. Wood's Absence, and He Revoked the Order.

HAVANA, Sept. 4.—At a meeting of the Executive Council of the United States, the order of the President, issued on the 2nd inst., directing the evacuation of the prisoners of war from the island and the good impression which the people and the state of the country had made on him, he announced that it was his intention shortly to visit Pinar del Rio and the Isle of Pines.

Señor Gen. de la Torre, Secretary of Justice, spoke of general revocation of the order of the President, and the substitution of proper orders for the present system of oral trials. At present there is no record kept of the trials of the evidence given by witnesses.

During the absence of Gen. Wood Manuel Sanguily, director of the Institute, ordered that the Dominican friars be shut out of the building which they had occupied for 300 years. He contended that, although the Spanish Government had seized only a part of the university building, nevertheless, all the building, including the part left to the Dominicans, was by right Government property.

Señor Gen. de la Torre, Secretary of Justice, spoke of general revocation of the order of the President, and the substitution of proper orders for the present system of oral trials.

STARTING UP RAND MINES.

SOME OF THE ORE CRUSHERS READY TO RESUME OPERATIONS.

Three Months' Pumping Needed to Empty the Most Flooded Workings—Railroad Extension in Progress at the President's Direction—Back the Battered Outlanders.

FROM THE SUN'S CORRESPONDENT AT PRETORIA. PRETORIA, Sept. 4.—The mines at Johannesburg which are at the prodigious stage are able to start the crushing of ore already developed immediately. Only a moderate number of workers need return as the mills can be operated effectively without a full complement. Development work at these mines will be delayed probably for three months, but this will not interfere with the general running of the mills.

The mines and the machinery are all in good condition and pumping is proceeding. It is expected that the mines with the most water in them will be emptied within three months. One important mine has 1,500 feet of water in it. (The mines which are not now at the prodigious stage will probably have to wait longer for pumping out, as labor will mean while have to be diverted from the producers for the construction of spurs from the Rand to the Verreuzing Railway, and it is far to give the producers the first supply of labor.)

Seven thousand Kaffirs are now employed on the new railway to the mines. It is expected that the various mining bodies will be able to start their work within a few days. Mine owners are adopting this plan and they intend to place immediate orders for the delivery in June of 300 trucks and 15 engines. The question of buying rolling stock is being considered, and it is expected that the 8,000 trucks and 200 engines which are now massed at Salt—a great part of which belongs to the Free State and Colonial railroads—it would take eight months to replace them. This would mean that half of the population would be kept from returning here indefinitely for some time.

The coal consumption on the Rand in ordinary times is 115,000 tons a month. It is estimated that the Rand will require 1,000,000 tons of coal in 1900. Two-thirds of this number are foreigners, and the natives number about 30,000 British are away.

The Imperial Government is now paying natives 30 shillings a month at the mines against 20 shillings a month in the past. It is suggested that the native labor department be reconstructed under Government control with shelters and travelling facilities under special Government protection to induce east coast and other natives to return to the Rand.

The appointment of a new civil government is strongly desired to enable the authorities to study and arrange these important problems, so that there shall be no unnecessary delay in the return of the expelled British workmen, who are now in the country and who are beginning to suffer from the protracted absence of their families.

The revenue office in Johannesburg has been opened for the collection of license fees. It is strongly felt here that licenses protecting unproductive claims should be remitted during the war, as many claimholders are fighting in the ranks of the Colonial corps. It is also considered that prospecting licenses should be greatly reduced in the future and the country thrown open to the enterprise of new and old settlers. The revenue thus obtained would be from a fair share of the results, as in other mining countries, and not from preliminary taxation as heretofore.

NEWPORT HORSE SHOW.

A Record-Breaking Year—The Awards in the Various Classes.

NEWPORT, Sept. 4.—The second day of the Newport Horse Show was a record breaker. It began at 10:30 this morning and with the exception of an hour at noon continued until nearly dark. In the morning the attendance was not large as the classes were not such as would attract much attention, being mostly for delivery teams and ponies, while it ended up with a hunter class, which was the one feature. In the afternoon the attendance was very large, all the seats being taken and the benches uncomfortably filled. The cottagers were all out, and the spectators of the afternoon of the season were there. The two features of the afternoon were the riding of Mrs. T. W. Pierce in the hunter class and the driving of Miss Kathleen Nelson in the pylon pairs. Mrs. Pierce is a most accomplished rider, and the way in which she handled her hunter over the five-foot fences brought forth great applause. Miss Nelson drove her mother's pair, Arab and Stripe, and she, as did Mrs. Pierce, captured the blue ribbon. The winners of awards of to-day's show are as follows:

Heavy Draft Horses—First, Plannig & Maudslayi, 114; second, J. H. Thayer, 113; third, H. V. Holt, 112; fourth, J. H. Thayer, 111; fifth, J. H. Thayer, 110; sixth, J. H. Thayer, 109; seventh, J. H. Thayer, 108; eighth, J. H. Thayer, 107; ninth, J. H. Thayer, 106; tenth, J. H. Thayer, 105; eleventh, J. H. Thayer, 104; twelfth, J. H. Thayer, 103; thirteenth, J. H. Thayer, 102; fourteenth, J. H. Thayer, 101; fifteenth, J. H. Thayer, 100; sixteenth, J. H. Thayer, 99; seventeenth, J. H. Thayer, 98; eighteenth, J. H. Thayer, 97; nineteenth, J. H. Thayer, 96; twentieth, J. H.
