When we see him, damn muss es sein; we see such a man, damn muss es sein; we see such a man, damn muss es sein; we see such a man, damn muss es sein...

Dr. Beck read this message to the gathering and at once there was a great cheering, which could have been heard out in Fifty-ninth street.

A few minutes later the Prince arrived. He looked pale and thoroughly tired, but rather fresher than the members of his staff and the American officers who accompanied him...

When the racket quieted down Dr. Beck proposed a "salvander" for the Prince. "Great was the rattle of the glasses and the clump of the soles of the shoes..."

Whack! whack! whack! went the rapiers on the tables and the beer glasses sounded loud acclaim to the princely toast.

After a head full of university degrees and a stomach full of university club dinner you cannot have much appetite for a German university Kommer, your Highness...

There was a great uproar of applause which lasted until the leaders of the Kommer had called for order. Other speakers were Dr. W. H. Roth, Dr. Ripper, Dr. A. C. Ramsdorf, George Haven Putnam and Prof. Learned of the University of Wisconsin...

"I wrote Dr. Pierce regarding my case, and received a prompt reply, free."

"I endured nearly four years of suffering," writes Mrs. E. M. Myers of Washington, W. Va., "caused principally from improper medical attention after the birth of a child, and resulting in a complication of diseases. Had a terrible cough and an incessant pain and soreness in my lungs."

MARCONI TO AUTOMOBILISTS.

TAKE A WIRELESS APPARATUS ALONG, SAYS THE INVENTOR. Then You Can Send for Ball and Order Your Dinner Kept Hot—He Did Not In Emergencies—Good Roads, Signs and Road Holes Discussed at the Dinner.

Signor Marconi was one of the guests last night of the Automobile Club of America at its third annual dinner, held at the Waldorf-Astoria. He told the members how convenient the wireless telegraph would be for the man in the automobile to send home for help in case of a breakdown or for fuel in case of arrest.

The inventor was evidently speaking from the heart in making these suggestions. He told of some of his own adventures while experimenting with an automobile equipped with a wireless telegraph instrument for the purpose of seeing how useful the combination would be in warfare. Incidentally, the inventor made the confession that he didn't know much about the theory of his telegraph.

A statement by Albert H. Shattuck, President of the club, denouncing the road hog when aboard an automobile, met with more approval than all of the other after-dinner remarks. Mr. Shattuck said on this point:

We are ashamed that it has been necessary for the State to pass such stringent laws to prevent the abuse of the highways by the owners of automobiles. This is a crime in common and that the owner of an automobile has no more right upon them than any other citizen. The more we are pushing a baby carriage has far more right than we do to defend for a moment the driver of an automobile who drives his machine carelessly over the middle of the road and blowing his horn as an intimation to the rest of the world that he got into the ditch of his own free will.

President Shattuck then announced that on May 30 there is to be a 100-mile non-stop race from New York to New Orleans. It will be a race somewhere near this city for records for one mile and for one kilometer.

Enough money has been appropriated for highways by the past administration to pave all the roads in this city with gold, but I don't find gold. I don't find even asphalt. However, the highway department has a budget for the future. In my opinion the great contribution is good roads and good signs.

W. Pierpont White of Erie, chairman of the Standing Committee of the Erie County Board of Supervisors, outlined the system of road control by counties and towns, gave the statistics of road building and then made the following suggestion for the future interests of good roads:

The essential supremacy of New York depends upon its being able to maintain the cheapest rate of transportation across the State. It has long been known to physiologists, chemists and food experts, that the starch portion of the entire wheat flour and barley is transformed into the active and very choice sugar by the action of intestinal digestion in the human body.

A widespread interest has been created among good lives, as to the composition of Grape-Nuts, the popular food.
