

J. H. TILLMAN AS A FALSIFIER.

HE MISREPRESENTED MESSRS. FRYE AND HENDERSON.

Received the South Carolina Senate and Newspaper Men as to a meeting... -Quoted the President of the Senate... -Spoke of the House in His Support When They Had Decided Otherwise

COLUMBIA, S. C., March 23.—Lieut.-Gov. James H. Tillman is in public disfavor again because of his misrepresentation of the President of the United States Senate and the Speaker of the House of Representatives.

The latest incident is expected to crush the political ambitions of Tillman, who up to this time has been feared as the strongest man in the field for Governor.

The primary cause of the present trouble was so insignificant a thing as a chicken bill. It was a bill to make domestic fowls come under the provisions of the General Stock Law.

Senator Graydon, however, persisted in withdrawing his appeal, and the incident was closed without the question of rules being settled.

SCANDAL IN THE PENN CHURCH.

Parishioners Surprised at Appeals to Americans for Funds.

Special Cable Dispatch to THE SUN. LONDON, March 23.—The Vicar of Penn summoned his parishioners to get their consent to an application to the faculty to permit the renovation of the church roof. The parishioners were astonished when they heard paragraphs from American papers read stating that Americans had been called upon to rescue the Penn Church, and that if \$4,000 was subscribed the vicar would put up a brass tablet stating that the roof and tower had been restored by citizens of Philadelphia and other Pennsylvanians in memory of the great founder of their State.

The vicar when questioned refused to make a statement regarding the accounts, but said he was ready to pay the whole cost if the permission was obtained. He had not consulted with Earl Howe, the patron of the living, or told him that his church was in a state of decay.

The parishioners adjourned the meeting for the purpose of having an architect inspect the church. The vicar then said he withdrew his offer and would return the money to the donors or with their consent devote it to another object.

BELGIUM'S FEAR OF RIOTS.

Socialists Did Not Cause Much Trouble Yesterday, but Danger Not Past.

Special Cable Dispatch to THE SUN.

BRUSSELS, March 23.—Despite the apprehensions that were felt, the Socialist universal suffrage manifestations throughout the country to-day were orderly. Twenty thousand persons paraded the streets here.

A second dynamic outrage in the Post Office at Louviers to-day did some damage. The explosion is believed to have been part of a Socialist plot to intimidate the Government. Suffrage riots were anticipated, and the gendarmes and the army were ready to move at a moment's notice.

The King's departure for the south during the manifestations, owing to a bad throat, is regretted, as the Socialists accuse him of timidity. The Government is uneasy and is preparing for grave troubles upon the resumption of the Parliamentary session after Easter.

CHOLERA UNDER CONTROL.

General Situation in the Island of Luzon More Encouraging.

Special Cable Dispatch to THE SUN.

MANILA, March 23.—Five new cases of cholera and three deaths from the disease were reported here to-day. Five persons who are suspected of having the disease are under observation at Malolos, Province of Bulacan. The general situation regarding cholera is considered to be encouraging.

The Governor of La Union Province reports that out of the population of 100,000 persons only twenty-two are confined in the municipal jails. Not a hostile shot has been fired in the Province in twenty-two months. Foreigners travel everywhere and meet with no molestation.

PACIFYING PHILIPPINES.

Austria-Hungary Decides That Trade Is Safe There Now.

Special Cable Dispatch to THE SUN.

VIENNA, March 23.—Austria-Hungarian data note great progress in the pacification of the Philippines in 1920, and it is stated that there is no reason to fear a recrudescence of the revolution on a scale calculated to interfere with trade and commerce.

CECIL RHODES STILL LIVES.

Seemed Weaker Yesterday—Was Sleeping at Midnight.

Special Cable Dispatch to THE SUN.

CAPETOWN, March 23, midnight.—The condition of Mr. Rhodes has remained unchanged since 9 o'clock, when it was reported that he was, if anything, a shade weaker. He has, however, been sleeping for an hour and a half and is still asleep.

TRADE OF THE PHILIPPINES.

Imports for Nine Months Ended Sept. 30, 1920, \$21,818,212; Exports, \$18,560,708.

WASHINGTON, March 23.—The total value of merchandise imported into the Philippine Islands during the nine months ended Sept. 30, 1920, was \$21,818,212, as against \$17,187,991 for the corresponding period of 1919, and the exports of merchandise during the nine months ended Sept. 30, 1920, amounted to \$18,560,708, as against \$13,883,200 for the same period of 1919. These figures show an increase of 27 per cent. for the imports and 6 per cent. for the exports.

WOMAN CHASES ALLEGED ROBBER.

Fights With Him and Saves \$5 Out of \$18 He Got in Her Store.

Mack S. Morgan, who is employed in Abraham Levinson's delicatessen store at 793 Third avenue, went to the cash drawer yesterday afternoon and took out \$18. She put on her money bag and demanded that he put on his money bag. When he refused she fought with him and managed to grab \$5 out of his hand.

The hat, which was taken to the Fourth-fifth street police station, bore the initials "J. M. J." It was identified last night as that of Joseph McCormick, 32 years old, of 43 West Thirty-fourth street, by his brother James of the same address. James said that the man had been employed in a wall paper factory at Thirty-seventh street and Fifth avenue. When Morgan was searched at the East Fifty-first street station the other money was found on him. They looked him up on a charge of theft.

SECRETARY LONG'S GREEN BAG.

It Is His Constant Companion and in It He Carries Official Papers and Other Things.

WASHINGTON, March 23.—Secretary Long, who will retire from the Cabinet in May, has become a familiar figure to Washington. He is seldom seen without a green bag, which he carries with him wherever he goes. The bag is a simple one, made of green cloth, and is filled with his official papers and other things.

MORPHINE FOR MADGE ADAE.

Policeman Guarding Chorus Girl in Hospital.

Tenderloin Story That She Had Expected to Marry Broadway Comedian. She Had Heard Crying and Then Was Found Unconscious—Will Recover.

Madge Adae, 19 years old, who until very recently was in the chorus at Weber & Fields, is a prisoner in Roosevelt Hospital, charged with attempting suicide. She is in a private room and is guarded by a policeman from the West Thirty-seventh street station.

Miss Adae has been living for the past two months in a theatrical boarding house at 214 West Thirty-fourth street. Her brother, C. F. Adae, is a policeman at the same station. He was attached to the Revenue Service here several years ago and married Lillian Green, an actress, who died from typhoid fever in Roosevelt Hospital last July. Lillian Green had starred in "My Lady," which had a long run at the Victoria Theatre. Madge Adae was in the chorus there. She and her brother were said to come of a prominent family in Cincinnati.

Saturday afternoon Madge came home to Thirty-fourth street and went straight to her room on the second floor. A maid in the house told the police that she heard the girl crying in her room. At 6 o'clock that evening Madge was found unconscious with an empty morphine bottle beside her.

Policeman Murphy, who was on post in front of the house, reported to the West Thirty-seventh street station that the young woman was in the habit of taking morphine and had only taken an overdose. He said the people in the house had told him this. The doctor, Dr. J. H. Taylor, and Michael were sent to investigate the case and they reported it at 11 o'clock as an attempted suicide, whereupon the patient was made to give information.

There was an attempt in the Tenderloin to connect the girl's despondency with the announcement that she had married Sam Bernard, the dialect comedian of the Weber & Fields Company, that he was to marry Miss Florence Deutsch, daughter of a cigar manufacturer of 116 East Ninety-third street, in May or June. Those who circulated this story could produce nothing in support of it and it is denied by the girl's intimates.

Miss Adae was quite ill all Saturday night and Sunday morning and for a time the doctor thought she would die. Yesterday afternoon she rallied and last night she had regained consciousness. It is said that she will recover, and the doctor ordered the private room for her and when questioned by Roosevelt authorities about her family said that they would notify the relatives if she recovered. At Weber & Fields it was said last night that Madge Adae had been a member of the company up to five weeks ago, that she was very popular and that she had many friends.

Carl A. G. Adae, the broker, of 89 West Twenty-sixth street, is a second cousin of Madge Adae. He said that her mother was Mrs. Howard Adae, who lives in Avondale, a suburb of Cincinnati, and that she was a kind and generous woman. The mother is well-to-do.

I received a letter from my daughter only last Thursday and she then appeared to be cheerful and happy. There was nothing to indicate depression of mind or that there was anything wrong. I am sorry for this, but if it is true, which I do not know, between my daughter and Sam Bernard there was good friendship and she was very popular and that she had many friends.

Handkerchief Coverd Theft. But Young Mr. Hansen Got The Thief After a Fight in a Bronx Car.

Herman Hansen of 620 East 152d street, and William Meher of 1818 Crane place, in the Bronx, got on a Webster avenue car at 177th street last night and stood on the car platform. He pulled out his handkerchief as if to blow his nose, but under the seat of the car he had hidden a small bag containing \$18.50. The thief, who was a young man, saw Hansen's handkerchief and took it. Hansen saw this and fought with the thief, who was a young man, and got the handkerchief back. The thief was taken to the police station and charged with theft.

TO SURVEY ALASKA GOLD FIELDS.

Party About to Start to Explore the Northern Slope of the Alaskan Range.

WASHINGTON, March 23.—Under the \$60,000 appropriation recently made by Congress for the investigation of the mineral resources of Alaska some interesting developments are expected by the Geological Survey. One of the parties which will leave Washington the last of this month has for its objective point the base of Mount McKinley, the highest mountain on the continent and which, so far as any record shows, has never been viewed except from a distance. A report which appeared in THE SUN in 1904 gave the first information of Mount McKinley that people in this part of the world had, and not until 1908, when Mr. Spurr of the Geological Survey got the nearest view yet had of the mountain, could its real height be determined. The height was estimated by him to be 20,400 feet.

The party about to start will explore the northern slope of the Alaskan range, making such expeditions into the mountainous regions as is possible, and so mapping the country that future expeditions will find a broken trail. Mount McKinley will then be open to the tourists who have made mountain climbing a specialty. It is not likely that any of the party will make an effort to reach the summit of the snow-capped mountain. It is proposed that this party, under the direct supervision of A. H. Brooks, leave Seattle about May 15, going by steamer to Tynok, on Cook's Inlet. From that point it will go westward by Beluga River until it strikes the coast of the Alaskan range, and from that point the party will cross the mountains by the pass at the head of Skwentna River. From this pass the route will lie along the northern slope of the Alaskan range, and should the season be far advanced when the party reaches the Tanana, near the mouth of the Cantwell, it will be necessary to make the route by the Tanana and the pack trains and proceed down the Tanana by raft to its mouth. Should the season not be far advanced, the party will be able to obtain valuable information of the now-little-known gold fields of the lower Tanana if it proves feasible to take the northern route. This will carry them through the Birch Creek gold districts and they will reach the Yukon at Circle City.

The announcement was made at the headquarters of the Geological Survey, which is now in the city of Washington. The party will be led by A. H. Brooks, the geologist; D. L. Raaburn, the topographer, and five camp herds, with a pack train of twenty horses to carry the outfit, will make up the party.

Should the season be far advanced when the party reaches the Tanana, near the mouth of the Cantwell, it will be necessary to make the route by the Tanana and the pack trains and proceed down the Tanana by raft to its mouth. Should the season not be far advanced, the party will be able to obtain valuable information of the now-little-known gold fields of the lower Tanana if it proves feasible to take the northern route. This will carry them through the Birch Creek gold districts and they will reach the Yukon at Circle City.

ON HER KNEES TO THE POLICE.

LOVER HUSBAND TO THE RESCUE OF WEEPING BRIDE.

Romance That Reached From Amsterdam to the Tenderloin Police Upon the Arrest of the Borrowful Jeanne Vranken.

Mrs. Jeanne Vranken, whose husband says he is Capt. P. Vranken, formerly of the Eighth Belgian Artillery, was brought to the Tenderloin police station last night on a charge of intoxication and disorderly conduct. They are a distinguished-looking couple, and they say that they not only look so, but are so.

Mrs. Vranken's troubles began at Young's restaurant at Thirty-sixth street and Sixth avenue. She had been in the restaurant and had asked for something to drink. They told her that they didn't sell liquor there and she went out.

When she got out she missed the companion to the large pearl and diamond earring which she still had in her left ear and she began to talk in excited French. A crowd gathered and Policeman Smith came up.

He found the earring hanging on her coat, gave it to her and advised her to go away in the cab which had brought her there. She wouldn't go and he took her to the police station.

She couldn't speak English. She got down on her knees in answer to a telegram fully signed the sergeant to release her. The cabman said he had brought her from a French table d'hôte. She wouldn't tell her name.

The matron finally got something out of her. She said that she married the Captain four months ago against the wishes of the families of both, that both had consequently been disinherited, that both of them still had hopes of money but that her husband had now grown tired of her and had taken
