

NEW ETHICAL CULTURE HOME.

DR. FELIX ADLER LAYS THE CORNERSTONE OF THE SCHOOL.

The Mayor There to Take Part in the Ceremony as an Old Friend and as an Official—History of the Movement Founded by Dr. Adler, and its Objects.

The cornerstones of the new building of the Society for Ethical Culture, which when completed is to occupy the entire block on Central Park West from Sixty-third to Sixty-fourth street, was laid yesterday in the presence of some 2,000 spectators by Prof. Felix Adler, the founder of the society.

The ceremony was a most elaborate one, music being furnished by Samuel Franko's orchestra, the members of the Arion Society and the children's chorus of the Ethical Culture schools.

The spectators sat in a large stand which had been erected at the Sixty-third street corner of the lot which is to be the site of the new building.

Dr. Adler, the founder of the society, made a few introductory remarks, after which Mayor Low was introduced. The Mayor said in part:

There are both public and private reasons why it is a singular pleasure for me to be here to-day. More than thirty years ago Dr. Adler, the founder of the society, was graduated from Columbia College in the same class.

But there are public reasons as well why the Mayor of New York city should be present on this occasion.

The Ethical Culture schools have consistently stood for this end in education, to bring what is best in art, in literature, in science, in institutions, to bear on the life of the child, to the end that each generation may rise higher than its predecessor in the social scale.

The great body of citizens who are taxed so heavily for the support of public education will not easily tolerate the expenditure of the public money for making educational experiments.

After the Arion Society had given some music Jacob H. Schiff spoke. He said in part: The city of the highest commendation are the efforts made and the results attained by the comparably speaking handful of men and women who have made this quarter of a century under the leadership of one whom we proudly name among our most illustrious citizens.

The Ethical Culture schools have consistently stood for this end in education, to bring what is best in art, in literature, in science, in institutions, to bear on the life of the child, to the end that each generation may rise higher than its predecessor in the social scale.

Ethical training, without which intellectual training is a peril rather than a benefit, is confessedly the weakest spot in our educational system.

We believe that every effort should be made to maintain the school as a common meeting ground for the people of all religions, creeds, and all other denominations.

The school is not a sectarian school, but a common school, excluding only the abnormal, whether they be the degenerate rich or the degraded poor.

We wish to cultivate in our pupils the habit of service, but we wish especially to attach them to their city and to the commonwealth. We wish to cultivate in our pupils the habit of service, but we wish especially to attach them to their city and to the commonwealth.

The ceremony of laying the cornerstone followed. Dr. Adler putting in the first mortar with the silver trowel.

The Society for Ethical Culture was founded twenty-four years ago by Dr. Felix Adler, who had just resigned a professorship in Cornell University.

The ethical culture movement started in 1878 and they were the first kindergartens in the city.

ROCK ISLAND TRAIN ROBBERS.

Bandits Get a Large Haul Near Davenport, Ia.—The Dynamite.

Davenport, Ia., Nov. 22.—The fast Chicago, Rock Island and Pacific train No. 11, was held up two miles west of Davenport at 11:40 o'clock last night by a gang composed of from twelve to fifteen men.

The express car was blown to pieces with dynamite, and the gang, after securing the contents of the express safes, fled. The booty secured is thought to be large.

The train was stopped as it was slowing up for a crossing inside the city limits, within a mile and a half of the center of the city.

As soon as the train came to standstill some of the robbers stood guard over the passenger coaches, preventing any interference with the rest of the gang.

No notice of the hold-up was received until the train dispatcher failed to locate the train at a junction, where it is always reported. He sent out messengers asking about it.

The police of this city were notified at once and a big squad was rushed to the scene on a special engine. Police from Davenport, Moline and Rock Island are at work on the case.

Railroad and express company officials admitted, when they heard of the robbery and learned that the bandits had obtained all the contents of the safes, that the loss would be one of the heaviest sustained by any express company for a number of years.
