AMERICAN GRAPHPHONE CO.
 COMMON STOCK DIVIDEND NO. 10.
 A dividend of 1 1/2% has been declared on the stock of this company, payable on November 11, 1904, at 3 P. M., and will close on November 21st, 1904, at 3 P. M.

ELECTIONS AND MEETINGS.
BUFFALO, ROCHESTER & PITTSBURGH RAILWAY COMPANY.
 The annual meeting of the stockholders of this company for the election of thirteen directors and three inspectors of accounts, will be held at the office of the company, 100 Broadway, New York City, at 2 P. M. on Monday, November 21st, 1904.

MONEY AND EXCHANGE.
 Money on call, 2 1/2% per cent. Last loan, 2 1/2% per cent. ruling price, 2 1/2% per cent. Time money quoted at 8 1/2% to 10% per cent. for thirty days to six months. Commercial paper is quoted at 7 1/2% to 8 1/2% per cent. for ninety days to six months. Bills receivable other than bank, 5 1/2% per cent.

FINANCIAL AND COMMERCIAL.
 THURSDAY, NOV. 10.
 In its later dealings yesterday the stock market was confused and irregular, even though strong. To-day the market drifted, although its undercurrent showed no abatement of firmness. Total transactions were much less than they were yesterday, so that the market was notably quieter. There were one or two occasions, indeed, when the trading almost ceased. These occasions were at times when a momentary declining tendency of prices seemed to culminate, and the fact was considered a "good sign" by believers in higher prices. The day's course of market values made one more very clear, however, and that is that while public interest in speculation or investment in securities may be enlarging there is no starting inrush of it. Professional operators who have calculated on a "flood" of after election buying by outsiders have missed their guess. Most of the large commission houses report that customers are buying those who wish they prefer to buy stocks rather than to sell them, are still content with small profits and are not indulging in the pyramiding purchases familiar to boom times. The attitude of the public toward the stock market is, in other words, one of prudence and caution, and so far this has not been at all changed by the market's opening to-day under the stimulating influence of higher quotations for our stocks in London, caused, no doubt, by the failure of the Bank of England to raise its minimum rate of discount, by the strong weekly return made by the bank and by a generally more hopeful feeling abroad regarding the political outlook. The price of bar gold again fell in London to-day, and the demand for gold fell accordingly. There seems to be materially less, but there was some disappointment in the foreign markets over the failure of the gold output of the Rand for October to come up to the preliminary indications of its yield, and opinion seems to be about equally divided as to whether an advance in the Bank of England discount rate within as near a period as the next fortnight is likely. It is estimated that London houses bought here during the day about 60,000 shares of stock on balance, and their purchases were of no small assistance in sustaining prices. After its opening outburst of strength the market steadied, large transactions taking place in nearly all the active stocks without changing their price. Liquidation in the United States Steel shares was especially noticeable, and the forces of this depressed the price of the shares about a point in the early afternoon. The railroad stocks were also as a rule inclined toward weakness. In the last hour the market rallied so that net declines and advances, generally small, were scattered throughout the list. The rebound in price was led by buying of the Tennessee Coal and Iron, Sloss-Sheffield and American Fuel and Iron shares, and others of the second and third class iron and steel producing corporations. It may be that the uncertain feeling that the market displayed to-day was due to the disappointment of certain speculators over the failure of the public to enter the market immediately after the election in the manner that had been looked for, to renewed suspicions of the market's stability, caused by a huge scale of market manipulation, or that the clearing house sheets of one Stock Exchange firm showed that this house was responsible for a tenth of all of yesterday's large transactions or to a little apprehension regarding the money situation. More gold was engaged to-day for shipment to Cuba, and it is authoritatively stated that \$100,000 will be sent to that island on November 10th. Whether half of the Japanese loan of \$50,000,000 can be financed in this country without gold exports seems questionable. The end of the year with its usual inevitable demands for money is approaching, and a Government call upon the banks for a large sum is known to be near. Call money rates to-day touched 3 per cent., as they did about a month ago, and although very little money was raised for the figures of the week, money was loaned at 2 1/2 per cent., than has been the case for a long time. Very little thought was taken to-day regarding the Government's November crop report, as it was a foregone conclusion that the report upon the condition of the staples concerned would alter but little, if any, the figures as given for the preceding month. The report, published as usual long after the close of business, estimated the corn crop at 2,454,531,000 bushels, as against 2,483,700,000 bushels estimated last month.
