

HUGE BOOM IN COPPER IS ON.

LAKE DISTRICT PEOPLE HAPPY BECAUSE MARKET IS RISING.

Sensation at Johnnie, Nev., Caused by New Discoveries of Ore—Over a Hundred Claims Taken Up in Two Weeks—Richest Gold Mine in the World.

HOTSPRING, Mich., Oct. 13.—The extremely strong and active copper market of the present is almost the sole topic of conversation in the Lake district, and all of the brokerage offices are crowded during the exchange hours, while the average inhabitant is all smiles, and happy in the belief that he is certain to be raised in each of the few past booms. The inhabitants of the Lake district, and for that matter all others who invest and speculate in copper, are happy because the market is rising, for they are bullish.

The Michigan remains much the most promising of the Outouman county mines and is earning a handsome profit on the present market price of its shares, though the production remains upon a restricted basis and the mine will not have an opportunity to rise to its full possibilities until the completion of the new mill when the leased stamp supply stock to two heads in its own mill, doubling the present output. The Michigan at the present time is earning at the rate of about \$200,000 a year on the production of a single stamp, and the new mill will be doubled as soon as the new mill is in commission, the mine having been developed systematically for three years past with a view to feeding two stamps. The management very wisely has charged the underground development for future requirements direct to operating expenses instead of to construction account.

For the calendar year 1905 the Michigan earned net mining profits of \$100,000. From 1904 to 1905 the Michigan produced copper being sold at an average of 15.89 cents, leaving a profit of \$100,000. The Michigan stock, which was stamped at the Mass mill, at a charge of 50 cents per ton. The new mill will stamp rock for 25 cents per ton, and as the Michigan rock averaged nearly 24 pounds of fine copper a ton of rock stamped in 1905, the saving effected by the new mill will be fully one cent per pound on copper metal.

SALT LAKE, Oct. 10.—In grading out for the new triple compartment operating shaft at the Ohio Copper & Iron Co. property, the other day a body of copper ore was encountered and its extent was such that it became necessary to change the grade to another point. As it is the new shaft will probably go through ore for the first 100 feet, when, according to calculation, it will have been passed through. On the 80-foot level of the Ohio property the copper ore bodies have been driven through along the strike for more than 400 feet and six cross cuts show the ore bodies to have a width exceeding 140 feet, with the faces of the cross cuts still in line. The ore tests on a large scale of ore are not being made in the company's mill with a determination of knowing just what the quantity in the large new mill plant that the company is going to erect.

What is known as the Little Bell contact has been cut in the Day-West mine at Park City. The company ran a long drift on the 300-foot level of the mine and a large immense porphyry dyke for the purpose of prospecting the ground on the south side. A large carrying rich ore was cut and raised in this fissure has now reached the contact, where conditions are not to be identical with those prevailing in the adjoining Little Bell property. The strike is the equivalent of making a new mine in Day-West ground. A new ore body has been opened in the Eagle and Blue Bell property of the Bingham Consolidated company at Little. It is on the 1,000-foot level at a distance of 400 feet north of the shaft and is described as being one of the most important discoveries ever made in the mine. The ore runs well in solid and carries some silver. It is from this mine that the Bingham company draws for most of the siliceous rock needed to flux the sulphide ores mined at its Bingham property.

The sensation of the week in the matter of strikes has been the developments made in the Colorado Copper & Iron Co. property, mention of which has been previously made. Last Saturday ore was brought up from the present level of the mine, mainly silver, horn silver, silver bromides, galena and crystalline quartz. The new discoveries have never been seen at any mine in the State and the richest of the rock would undoubtedly show values running up into the thousands of dollars. Ore representing what is called the second class of the high grade streak, which is over two feet thick and carries over 150 ounces silver and 87 per cent lead. The ledge is eight feet thick and the remaining six feet of ore is contained as having a market value of \$60 to \$75 per ton. The shipments from the mine for the last week aggregated something over 2,255 tons, from the Tintic district nearly 6,000 tons were shipped.

claims, the Emily and Millview, and acquired all outstanding interests in the Gem and the Emerald. The latter is situated between the Badger State of the Boston and Montana Company and the Power and Elm. The latter is situated between the Boston and Montana Company and the Power and Elm. The latter is situated between the Boston and Montana Company and the Power and Elm.

JOHNIE, Oct. 10.—Discovery of copper has caused a sensation here and within the last few days a number of claims have been taken up. The copper is in the northeastern part of the district and in the southern part of the district. The latter is situated between the Boston and Montana Company and the Power and Elm. The latter is situated between the Boston and Montana Company and the Power and Elm.

GOLDFIELD, Oct. 10.—The high tension campaign of the Johnnie Consolidated mine is a mild puzzle to the engineers. The mine is situated between the Boston and Montana Company and the Power and Elm. The latter is situated between the Boston and Montana Company and the Power and Elm.

SULLIVAN STOCKS BIG WINNERS

\$875.00 EARNED \$665.00 IN SIX MONTHS

116 Per Cent Profit on Indian Camp 86 Per Cent Profit on Jumping Jack 20 Per Cent Profit on Stray Dog

The Sullivan stocks, promoted in February, March and April, are now standard securities, heavily traded in on the San Francisco, Salt Lake and Goldfield Stock Exchanges and on the Jersey City curb, and command premiums as follows:

Table with columns: Company, Date of Promotion, Price Paid by Public, Today's Market Value, Profit (Per Cent). Rows include JUMPING JACK, STRAY DOG, INDIAN CAMP.

1000 shares Jumping Jack at 30. Cost \$300, now worth \$560. 500 shares Stray Dog at 55. Cost \$275, now worth \$330. 1000 shares Indian Camp at 30. Cost \$300, now worth \$360.

Cost \$75, now worth \$1,540.

OUR FALL PROMOTIONS

We Offer for Immediate Subscription Unsold Portion of 250,000 Shares Treasury Stock of Each of these Companies:

Eagle's Nest Fairview Mining Co. . . . 35c Per Share Lou Dillon Goldfield Mining Co. . . . 30c Per Share As-You-Like-It Manhattan Mining Co. . . 25c Per Share

THE STAMP OF MERIT

Each of these companies owns a great gold mining property, situated in the immediate vicinity of other bonanza mines of its respective district, and believed by our famous mining engineer, who has never been connected with a mining failure, to have a tremendous future.

All three are under the same capable, honest management. The directorate of the three companies is the same:

- HON. JOHN SPARKS, Governor of Nevada. JOHN D. CAMPBELL, Vice President. JAMES E. DEGAN, Secretary. GEO. D. FAYNE, Counsel.

These Fall issues have been practically over subscribed, in advance of public announcement, by bankers, brokers and mining men throughout the country, and we have been able to reserve only 100,000 shares of each for investors who shall now make direct subscription.
