

FINANCIAL AND COMMERCIAL.

There were three distinct and separate movements in the course of prices on the Stock Exchange to-day. Quotations throughout the list of securities declined very rapidly in the first fifteen or twenty minutes of trading under a violent continuation of the selling pressure which was brought to bear against the market on Saturday, and this succeeded in the time stated in depressing prices from one to three points in the active stocks. A little later came the announcement of the failure of a Stock Exchange house whose unstable position has long been a matter of common gossip in the financial district, and the market then rallied as it generally does on such occasions in pursuance of the cheerful reasoning that the bad news affecting the market is "out" and that the worst about the situation is fully known. Quotations were carried on by the market and before midday all the day's earlier losses and more than these were recovered. It was clear, however, that the rise was due more than anything else to the retirement of commitments by operators for the fall, for after it culminated and following a short intervening period of dulness prices once more fell off to the day's low level and in one or two instances to points below this. At the close prices were once more a little stronger, but not declines of over a point in the prominent issues were common. To the general participation in these "swings" in the market to-day there was only one notable exception, the Consolidated Gas shares. The stock in question advanced even in the early part of the day when the market was weak, and at one time was more than five points above its close on Saturday. Its price declined a little in the afternoon, but was still such at the close as to cause the stock to be quoted at a gain of 2 1/2 points for the day. The cause for this presumably was the confidence of certain investors that in the litigation now pending to determine the character of the decision made by the State Legislature heavily reducing the price of gas in this city the Consolidated Gas Company will be successful. But as an appeal will undoubtedly be taken to the Supreme Court of the United States by either party to the controversy from the decision of the lower Federal court whatever the character of the decision may be the shot of the matter is obviously not near at hand.

Influences affecting the market to-day were not very important one way or the other and seemed to be of a more or less mixed sort. The failure of Messrs. W. L. Stow & Co., to which reference has previously been made, was considered as a slight check, but it was understood that the business done by the house recently was not large. The foreign markets were inactive and more or less unsettled, the favorable effect of a lowering of money rates in the open financial market in London and of a reduction in the official discount rate of the Bank of the Netherlands being offset by the knowledge that the German Government was about to bring out a new \$100,000,000 loan. Here sterling exchange and time money rates were both a little firmer, although the local banks have gained from the Sub-Treasury thus far during the week \$1,934,000, as against \$200,000 in the same length of time last week. The London market appeared to be perturbed by the worded report that the German Government representatives of English houses sold locally during the day, presumably for the account of their principals, about 50,000 shares of stock. There were no new developments today in the much discussed copper situation, but an adverse factor in the market was undoubtedly the convictions obtained against the Standard Oil Company upon the mayhem counts in the trial in the United States courts in the city of Chicago, as detailed in yesterday's newspapers. It was regarded as probable that such an occurrence could hardly encourage in the great capitalists associated with the Standard Oil Company a satisfied or optimistic state of mind. A good deal of attention was paid to-day by Western grain fields, and it is manifest from now on crop news will figure a good deal more than it has done recently in Wall Street discussion. It is generally admitted that a good deal of damage to the winter wheat crop has been done in Texas, Oklahoma and other portions of the Southwest by the green bugs and other insects harmful to the growing grain and that there are some indications that these pests are working northward. The States that have been mentioned, however, cover only the smaller part of the winter wheat producing territory, and the injury that has been done is fully recognized in the Government's generally favorable report of the winter wheat conditions on April 11. It is said, however, that the crop over the West in general has suffered considerably since the first of the month from lack of moisture and that in the northern section plant life is suffering from unseasonably cold weather. On the produce exchanges to-day the price of wheat advanced, although not so greatly as it had the day before, and it was clearly the prevailing sentiment in these markets that the rise in grain prices had discounted a good deal of crop damage, real or supposed.

The monthly report of Henry Nordlinger & Co. refers to rumors that the Brazilian Government would cease to buy coffee and to the exhaustion of money supplies and inability to obtain more money. The firm says it believes the Government is amply provided with funds, having purchased about 5,000,000 bags of coffee, and that the purchase of at least 13,000,000 bags, prove to be nearer later or figure than the Government would have a difficult task on its hands in supporting values and could successfully purchase the coffee for Government account. But the firm's own information differs from that which is generally accepted. It says: "The highest estimate we have is 6,000,000 bags for the next three months and 3,500,000 to 4,000,000 bags for the next Rio crop."

Coffee on the spot was dull at 8 1/2c for Rio No. 7. Futures closed unchanged to 10 points higher. Sales, 20,000 bags. Haver advanced 1/2c. Hamburg was unchanged to 1 1/2c higher. Rice was unchanged to 1c higher, unchanged at 17-35c. Receipts, 10,000 bags, 787,000. Santos was unchanged; receipts, 48,000 bags. Stock, 27,130. Prices here as follows:

Higher Again, With May the Principal Feature—Lighter Receipts—Frost East of the Mississippi River. Bull manipulation aided by bad weather and lighter receipts carried the day against disappointing Liverpool advices and the Wall Street news. Leading bulls took hold of the May option and put it up even with last despite the fact that the bears have been predicting that May would drop to a discount of 25 points under July. That may yet happen. But keeping close to the values of the present year, May with a good deal of strength it may be that it is being bolstered up merely to facilitate selling. That is the theory of some. Others opine that the bulls mean business and that they are taking delivery and that they may shortly have interesting times ahead. They have a good while to cover in, however. But in the meantime there are undoubtedly some strong features in the situation. The cotton market is not yet out of the woods. The H. B. Clavin Co. find no necessity of holding their annual sale. Generally they have cleared a big margin on the sale of this time of the year to get rid of their surplus supplies. But the consumer has kept the grass cropped close this season. Then, again, the strong spot situation is undoubtedly a bracing factor. Though Liverpool, surely continued under pressure of local and other selling, partly it appears by American operators, the market is a sharp demand for the better grades at the South. Moreover the weather was cold and improving in the Central West. The few sections and drought continued to prevail in Texas. The Houston and New Orleans markets were quiet. The arrivals at the ports were anything but burdensome. Local and other shorts were covering in the East and the South were buying October. The great trouble is the lack of outside speculation. The market has had that there is no knowing what it might do in existing circumstances.

THE BOSTON MARKET. BOSTON, April 15.—The market for copper shares opened dull and generally lower. There was little pressure to sell and it rallied fractionally. The remainder of the session was a quiet affair, prices being affected by the nature of orders coming into the market. Public interest is small. The close was quiet in most cases. Losses for the day: Centennial 10 1/2, Wolverson 5.

THE CUBAN MARKET. The volume of trading in Cuban securities to-day was about the same moderate proportions as that done in the last few weeks. The market was quiet, but prices, although they moved irregularly. Several of the prominent shares exhibited a firmer tendency, and in some cases a sharp advance. On the other hand, there was a sharp break in the price of the Standard Oil of New York shares. The market for Cuban securities to-day was about the same moderate proportions as that done in the last few weeks. The market was quiet, but prices, although they moved irregularly.
