THE WASHINGTON HEIGHTS, COR. BROADWAY AND 125TH ST. 7 ROOMS and bath, \$50 and up.

APARTMENT HOTELS. HOTEL PIERREFONT, 175-185 West 47th Street.

WITHDRAW SAVINGS—BUY STOCKS NOW.

To Every Man, Woman and Child Having Savings in Savings Banks and Trust Companies:

Good Stocks can be bought to-day at 20 cents on the dollar of what they sold for a year ago. Safe Stocks are those stocks which represent the ownership of the great industries of the American people.

Only an industrial cataclysm will prevent them from doing this. Savings banks will go down with the great industries in a great industrial cataclysm.

There will be no industrial cataclysm in America while America is the marvelous country it is to-day. Neither savings banks nor great industries are going to get this year, next year or the years beyond.

Savings bank depositors to-day receive 4 per cent. yearly. Stocks of great industries return 8 to 10 per cent. The people are kept poor and the few rich, because the people get but 4 per cent upon their \$4,000,000,000 of deposited savings.

The manipulation of these \$4,000,000,000 of deposited savings of the people is the instrument by which the System works its pillaging of the people.

The people really own the great industries, but the System controls them. This is the secret of the Standard Oil's \$900,000,000 profits in one industry.

The time has now come for the American people to strike and strike to kill—the System. The weapon is ready. Millions of people in their capacity of stockholders in Union Pacific, Standard Oil and Amalgamated Copper can quickly, inexpensively, legally, without the aid of courts, law-makers, law-administrators or additional laws, take away from the System the control of the great industries.

With the result. First, the restitution of hundreds of millions of stolen loot. Second, large reduction in the price of necessities and luxuries, raw material, wheat, cotton, railroad freights, passenger fares, finished product of metal, lumber, wool, etc.

Third, no reduction in labor's wages. Fourth, the same net return to savings bank depositors, 4 per cent. Fifth, the same net returns to the stockholders of the great industries as now.

The great savings which will bring about this condition will come entirely from the billions which are now stolen from the people by the few—the \$900,000,000 Standard Oil, the \$300,000,000 New York City traction, the \$600,000,000 Union Pacific, the \$500,000,000 Copper, the Metal, the \$300,000,000 Amalgamated Coppers.

I appeal to every intelligent person in America and Europe to study the following table of past prices of the good stocks of the great industries and ask themselves is not the game by which the American people have been robbed plain.

Table with columns: UNION PACIFIC, ST. PAUL, AMALGAMATED, W.N. SMELTERS. Rows: High, Low.

Table with columns: NEW YORK CENTRAL, CHICAGO & NORTHWESTERN. Rows: High, Low.

Now is the time of times and I appeal to every American who reads this advertisement to pass it along to some savings bank depositor of his or her acquaintance.

In fairness I ask each reader to bear in mind that I receive no benefit from this or any like advertisement, for I do not advertise any stock which I control or in a large way own.

Bear in mind I never advise the withdrawal of savings bank deposits for the purchase of any stocks but the best dividend payers, and then only those listed on the world's great stock exchanges, and then only through stock exchange houses, and then only for cash—never upon margin.

If any of my stock speculating followers want my advice in a stock speculation I say: Buy Trinity, not because I largely own it, for it is owned by 6,000 stockholders, located throughout America and Europe, but because I know when the System's throat is reached, as it will be shortly, Trinity's price will multiply five to ten times.

At the declaration of the last dividend they solemnly assured you that the price of the metal was permanent at from 20 to 26 cents, so permanent that they increased the dividend from 6 per cent. regular and 2 per cent. contingent to 8 per cent. regular, so permanent that they increased the miners' wages to a 20 to 25 cent per pound basis, so permanent that they increased the mines' producing capacity and urged other mines in their control (over half the American product) to increase; yet in a month—in a day—in almost an hour—while their solemn declaration of permanency was still on their lips, the price of copper, the metal, slumped to 18 cents, with no takers, and the copper stock market was cut in two.

Before the slump, that is, while they were solemnly proclaiming the stability of stock and metal price, some mysterious persons were selling hundreds of millions of dollars worth of copper metal and copper stocks at prices which compared with to-day's show a profit of over \$150,000,000 for one year's production of the metal and \$600,000,000 for copper stocks.

Either the Amalgamated management committed the most damnable crime of the age or the most damnable blunder, which it is will be made plain to the world in a few days.

To-day this management will cut the Amalgamated dividends, and if, as in 1902, when the same things were done in the same way, both to the metal and to the stock, and by the same people, the 30,000 stockholders become panic-stricken and allow themselves to be blackjacked out of their valuable stock, the crime will be completed; but if, on the contrary, they continue to hold their stock and buy more the death knell of Standard Oil management of the copper industry will have been sounded and that industry will take the place it should have occupied during the past ten years, and the shameful pillaging of the people in copper and copper stocks, which has been made possible only through a trick monopoly, will have forever disappeared.

AS SURE AS THERE IS A GOD... our great country's prosperity, which has continued from the first until to-day, will bring back the price of the good stocks of the great industrials to their highest, yes, beyond their highest, point.

TO THE BOSTON STOCK EXCHANGE: You pretend to at least common honesty. You listed the stock of Heinz's United Copper. You thereby endorsed its legitimacy. I told you at the time, and publicly, that it was a swindle. I have told you repeatedly and by public advertisements that the daily quotations and sales at from \$65 to \$75 per share were absolutely fictitious, that at no time in the past two years could any amount of it have been sold at anything like the quoted prices.

THOMAS W. LAWSON. BOSTON, October 17, 1907.
