

NEW MEXICAN MINING BILLS

SHUTS OUT FOREIGN CORPORATIONS, NOT CAPITAL.

Measure still in the hands of President Diaz. At present it is still in the hands of President Diaz and has been the subject of the cabinet.

Mexico City, June 20.—The proposed new mining law which contains what is known as the anti-foreign provision may not be submitted to Congress at its next session. The measure is still in the hands of President Diaz and has been the subject of the cabinet.

It is the general belief in official circles here that President Diaz will not exercise his prerogative to decree the adoption of the pending measure. It is reported that he and Minister of Finance Jose Y. Limantour are opposed to the anti-foreign provision of the bill.

It is the general belief in official circles here that President Diaz will not exercise his prerogative to decree the adoption of the pending measure. It is reported that he and Minister of Finance Jose Y. Limantour are opposed to the anti-foreign provision of the bill.

There is a general feeling on the part of the Mexican people at the time has now arrived when they are capable of developing their native resources without the aid of foreign capital. They have witnessed the making of fortunes by American capitalists who have stood idly by without taking advantage of the multitude of opportunities that abounded on every hand.

Mr. Molina expresses the hope that the bill if introduced into law will not cause a falling off in the investment of foreign capital in Mexico. It is conservatively estimated that not less than \$300,000,000 of American money is invested in mining and smelting operations in Mexico.

The output of the Bismuth mine, near Chihuahua, has been sold by Frank J. Hobson and associates to Obadiah Sands of Chicago. The mines are situated close to the Pinguico property. Mr. Sands is organizing a company to develop the mines.

A strike of rich ore recently occurred in the mine of the Santa Elena property, near Guasmas, Chihuahua. The vein is five feet in width and the ore runs 212 ounces to the ton.

The Motezuma Copper Company has completed a new shaft at its mine near Guasmas, Chihuahua. The shaft is 1,700 feet deep and has reached the contact at a depth of 1,000 feet.
