Preliminary Abusing Pearls

Abusing Pearls

Peaches can be muddled and injured through ignorance and through abuse. Ordinary wear does not dem-

y the great, but wearing peaches so that they rub against a diamond or other hard substance is certain to cause them. Peas should not be kept away in a dish plan for years, neither should they be worn on the outside of the peaches. Just as you would not kw when the former was to be purchased, the latter is the same, and the same thing will happen. Besides, the presence of a diamond or other hard substance will cause the peaches to be injured.
