

Penn Relays Disregard Olympic Baton Passing Rules

EXPERTS CRITICISE PENN RELAY RULES

Point Out That Olympic Methods Have Not Been Adopted as Expected.

DRAW FOR POSITIONS MADE

Oxford Team in Middle of Track, but Position Matters Little in Four Mile Race.

Disappointment was expressed yesterday by athletic experts over the rules set out to govern the relay races at the meet of the University of Pennsylvania on April 25, which this year became of international importance because of the entry of a team from Oxford University, England.

The announcement was made some time ago, that for the first time at this meet the passing of the baton from one runner to another would be insisted on, instead of merely requiring the men to touch hands. This was regarded as a good move toward educating American runners in the style of racing demanded at the Olympic games, and was welcomed accordingly by all those interested in the success of the United States at Berlin.

The stipulated baton for the Pennsylvania meet calls for a round piece of solid wood of other lighter material, ten inches long by one and a quarter inches in diameter. At Stockholm the baton was hollow and was fully sixteen inches long. The latter is the more important detail as the extra length allows the men to pass from one to another with greater facility and surety than if the stick were smaller.

The next item to which objection is taken is that calling for the drawing of a line across the track twenty feet in front of the starting line. Between these lines the baton must be passed from one man to the other, and the qualification of the distance between the starting line and the obligatory passing line was twenty meters, or about sixty-six feet. This is a considerable difference from one man to the other, and the qualification of many teams which would be able to survive the test of international competition.

An appeal will be made to the athletic authorities of the University of Pennsylvania to readjust these rules so that they will comply as nearly as possible with those of the Olympic committee and the International Athletic Federation.

Drawings for positions in the different races have been made by E. M. Abbott, clerk of the course for the relays, and taken by the place of Dr. George W. Orton, who retired because of his appointment as coach at the University of Pennsylvania.

Although the positions drawn by the teams are not as vital in the relay races as in the shorter distances, there is more interest in that event this year because of the entry of the Oxford team.

Correll, always formidable in distance races, has drawn the pole for the four miles, while Oxford is in sixth place, with five teams inside and four outside. Those who have studied the performance of the Blue say that it will make little or no difference as to where their man is placed at the start, for it is believed that the first Oxford man will be so far ahead at the end of the first mile that the succeeding men will be able to take the baton from the track without running the risk of a foul.
