Not Forgetting Details

A costume is only correct or complete if all its accessories are consistent and in harmony. So many things to consider! Yes, and neckwear is not the least of these details. Many of the new suits demand a vestee and frills where they are most effective. Fabrics new, novelty vestees and Medici collars are smart notes which Paris advances.

Shoes, oh, so French! Shades of almost any kind of leather to match or "go with" your spring dress. Stockings—but did you ever see such striking designs?

Veils for the Spring Chapeaux

At least one hat must have a veil—an all-over draped veil which has a design of chenille dots, scroll work or a novelty pattern very, very new. The new spring two-in-one veil forms a hat trimming and a face veil at the same time.
