LITTLE THINGS THAT COUNT BIG. Do You Ever Think About Them and Use Them? A bee does a good deal of effective business with a very small stinger. A grain of sand can make you completely blind. The boxer's best blow is a punch that travels only a short distance. The busiest thing in the animal world is the little ant. The most forcible words in the English language have only one syllable. The big things of life are frequently done in a minute of time. It's the little things that really count most in the long run; in the day's work. Whoever invented the classified advertisement knew how much worth while a little thing could be. He knew it could be made the medium of sale, of exchange, of purchase, of all sorts of commercial and personal negotiations. Its few words make it quickly and easily read. Its small size makes it easy to buy. In a real classified medium like the Sun-Herald the results of Classified Advertising are prompt and profitable. Results come at once and in large number. Put your classified advertisements in the Sun-Herald. The 'phone number is Greeley-6000. Special clerks will answer your calls and give you personal attention.
