LATEST INTELLIGENCE.

By the Magnetic Telegraph. WASHINGTON, May 7, 1846. Mr. SEYMOUR moved a reconsideration of the Florida judiciary bill, as passed yesterday.

Mr. JOHNSON, from Louisiana, reported back the bill for the adjustment of suspended pre-emption land claims, with amendments.

After considering private bills, the Senate adjourned over till Monday.

House of Representatives. The House refused to go into Committee, on motion of Mr. McKAY.

Mr. ADAMS moved to suspend the rules to enable him to offer resolutions calling on the President for further information respecting deserters from the army, and authorizing the President to have arrested, and tried for murder, those who had shot soldiers, if any were shot without trial.

The motion to suspend the rules to receive the resolutions, was lost.

The House then went into Committee of the Whole, and took up the Post Office bill.

Mr. GIDDINGS, of Ohio, rose, he said, to a privileged question. He went on to make a severe speech against shooting deserters, without trial.

No worse murder would be, if a corporal's command had been ordered to shoot members of Congress.

A discussion ensued, in which several members took part.

Mr. DARLACH, of Pennsylvania, is speaking as this dispatch closes.

By the Last Mail. WASHINGTON, May 6, 1846. Congress.

The proceedings in the House to-day, were sufficiently diversified to be a little more interesting than for several days past.

There was a question of privilege which is easily explained. In the libel case before the Circuit Court, between Col. Benton vs. Gov. Thomas, it has been thought by the former that if Dr. Reife, of Mo., a member of the House, and a brother of Mrs. Linn, could be brought before Court, he could be made to testify to such facts as would overthrow the affidavit of facts which Governor Thomas expects to prove against Mrs. Thomas, daughter of Governor Mc-

Dowell, in reference to her alleged seduction, adultery, &c., by the testimony of Mrs. Linn herself. But the doctor was unobtainable, from his privileges as a member of Congress. Consequently, Mr. Dromgoole, of Va.—we say consequently, because we believe he was put up to it—moved to privilege to attend Court, if they should think proper. Here a debate arose, and the motion being finally amended to apply exclusively to Mr. Hopkins, it was carried—Mr. Hopkins himself voting against it. The whole purpose and scope of the amendment, as it is understood, is to be framed as to exclude Dr. Reife. The whole State of Virginia seems bent upon the prostration of Governor Thomas; and there is no conjecturing where the blow will fall, when the House next took up and passed the bill making amendments in importations of Java coffee. In answer to a resolution offered by Mr. Adams, the President says, that two deserters from the army on the Rio Grande were shot, and that four were drowned in attempting to swim the river. There was a debate upon the printing of a long document from Mr. Gordon, late consul at Rio, on the subject of the African slave trade. (See your reporter's minutes of the House.)

In regard to the late movement amongst certain democratic members, looking to an adjournment of Congress in June, to meet again in October, we are requested by several members from the South, to say that the question of adjournment stands near six feet high, figure intelligent, clear head of hair, slightly silvered, cut short, and smoothly combed about his temples. His countenance is pleasant and really fascinating. In the domestic and foreign press, he is loved him; the only wonder is that two so pleasant looking people should fall by the way.

Mr. N. P. Willis is still rusticated among us. He looks as fresh as a water-lily. Shouldn't wonder if he were to appear in the streets of New York, where, after a little—perhaps to the Type Land. He wants something much. Judge Oakley of Illinois is here. Within a day a slight increase of travellers; but the arrivals are nearly reduced to a mere handful, as yet, been completely suppressed, though partially suffocated.

WASHINGTON, May 6, 1846. The premonitory symptoms of a fierce and bloody conflict with Mexico have at last manifested themselves. By the mail of this evening, we learn that a party of our troops that were out in search of Colonel Cross, had been attacked by a party of Mexicans, by whom Lieut. Porter and three of his men were killed, and the remainder, except five who escaped, taken prisoners.

The reason assigned for this defeat, in a small way, is rather curious, and somewhat calculated to excite one's risible faculties, if the occasion did not call for the expression of our feelings. "The men's powder was wet!" This is really too bad. By a simple operation of the rule of three, we can calculate to a T the loss which we would have to sustain, if the whole of our brave little army were to engage the enemy "with their powder wet," when four out of about twenty were killed, and ten of them taken prisoners. We should then have about fourteen hundred left to tell the tale that their powder was not dry. Let us carry the calculation a little farther still. How would it be with us, were we at war also with England, and had no other rulers to govern the country than the present local administration? Why? It is plain that we could do no more than to wait, and let the Mexicans do as they pleased. Why? It is plain that we could do no more than to wait, and let the Mexicans do as they pleased.

Yes, Mr. Polk is "Young Hickory," with a vengeance; he is a twig, perhaps, of the old stock—under-ground, which bends to every breeze, and still remains a twig. Why? It is plain that we could do no more than to wait, and let the Mexicans do as they pleased.

Yes, Mr. Polk is "Young Hickory," with a vengeance; he is a twig, perhaps, of the old stock—under-ground, which bends to every breeze, and still remains a twig. Why? It is plain that we could do no more than to wait, and let the Mexicans do as they pleased.
