New York, Sunday, July 28, 1850.

Telegraphic Summary.

In consequence of the death of the Hon. Daniel P. King, of Massachusetts, no business of importance was transacted in either house of Congress yesterday.

Our intelligence from Texas is of rather an important character. That State has apparently taken a decided stand in reference to the boundary dispute between it and New Mexico.

We are disposed to believe that the attitude which Texas has taken, is designed with more reference to hastening a settlement of the whole slavery question by Congress, than to any expected collision with the federal government.

At all events, the government should be very cautious in its policy in this matter.

Some two months ago it was announced, with a great flourish of trumpets, that Eaton Island, twelve miles up the East River, had been purchased, and appropriated for the purpose of a grand depository for the manure and filth of the city.

Taking the Census.—The Probable Population of the City of New York—Error in Former Enumerations.

As the census of the city is now being taken by the Deputy Marshals, it may be well to call attention to the former enumerations, and to point out some of the glaring errors committed by the inefficient persons who were employed to take the United States census of 1840, and the State census of 1845.

We divide the city into two sections; the southern boundary of the Ninth ward, on the North river, being Hamersley street, and Houston street, of the Eleventh ward, on the East river.

Table with columns: Lower and Middle Wards, Population, 1840, 1845, 1850. Rows include various wards like 1, 2, 3, etc.

Lower and Middle Wards. Population. 1840. 1845. 1850.

Upper Wards. Population. 1840. 1845. 1850.

Total. Population. 1840. 1845. 1850.

Total city. 270,089. 312,760. 371,325.

The Sixteenth ward was taken from the Twelfth ward; the Seventeenth ward from the Eleventh ward.

Since the census of 1845, the Eighteenth ward has been taken from the Sixteenth ward, and the Nineteenth from the Twelfth ward.

It will be seen, from the above table, that, taking the eleven compact wards below Hamersley street, on the North river, and Houston street, on the East river, the increase of the population in the ten years, from 1835 to 1845, was but 27,573, or about fifteen per cent, while the increase for the same period, in the six upper wards, was 73,361, or about eighty-five per cent.

There was a gross error in taking the census of the Tenth ward, in 1840; the Deputy Marshal, who took the census in that year, making the population 29,026; thus showing the increase of the population, in five years, at 8,100; whereas the State census of 1845 proved that the population of that ward had been nearly stationary for ten years, as may be further proved by comparing it with the Eighth ward, where there was only a slight increase. In the census of 1845, there was also doubtless an error in the returns from the Fourth ward, which give the number of inhabitants at 21,000, being an increase of 5,230 in five years; whereas the two previous censuses of 1835 and 1840 showed that the population was nearly stationary.

Although there is a great increase in the houses for emigrants, and accommodations for sailors, in the Fourth ward, we believe that the census now being taken in that ward will show a considerably less population than the returns of 1845 exhibited. The probabilities are also that, in taking the census of 1845, the population of the Sixteenth ward was somewhat overrated, and the same may be the case in a few other wards.

Taking these circumstances into consideration, we are inclined to think that the population of the city was overrated about 10,000 in the United States census of 1840 and the State census of 1845. Without going back farther to examine the enumerations of former years, we may, therefore, state the actual population of the city as follows, at the last three enumerations of five years apart.

Table with columns: Year, Population. Rows: 1820, 1825, 1830, 1835, 1840, 1845, 1850.

Total increase in 10 years. 91,324. This increase exceeds 33 1/2 per cent, and if we estimate the same ratio of increase for the last ten years, the census now in progress will show the present population of the city to be 463,613; but as the ratio of increase has been considerably greater than this, in consequence of the large amount of emigration, we may put down the population of the city, at 430,000, of whom a majority will be found in the upper wards, or on the line running through Hamersley and Houston streets.

Population of the Principal Cities and Towns of Massachusetts.

Table with columns: City, Population, 1840, 1845. Rows include Boston, Lowell, Salem, etc.

City Improvements.—The contracts for grading and paving the Bowdoin Park were given out on Wednesday last.

Passports.—It has been the immemorial practice of the Mayor of this city to issue passports, not only to citizens, but to those who have declared their intention to leave the city.

Marine Affairs.—Steamship Ohio, Captain Schenck, sailed today for Havana, touching at Charleston, Savannah and New Orleans.

Brougham's Lyceum.—Mr Brougham has found, in the wide circle of his friends, several public spirited gentlemen, who have taken an interest in his views.

Mr Brougham and the Stage.—The name of Mr. Forrest has frequently been used recently, in connection with a theatre in this city and one in Boston.

The funeral solemnities in honor of Gen. Taylor, in Boston, will take place on the 10th of August.

Arrival of the Turkish Embassy.—Our correspondent at Turin informs us that the Turkish envoy and his suite, who, as we have before stated, is to visit this country, to investigate its resources and character, has embarked on board the storchip "Eric," now on her homeward bound voyage.

Now that distinguished persons, such as General Paiz, Garibaldi, Janny Lind, and others, are to be present with all possible demonstrations of regard, let us not forget that there is a great reason for a display of hospitality towards the Turkish envoy and his suite.

The next twenty-five years will bring about great events, in which the government of Turkey and our own land will mutually assist each other, by an enlargement of good feeling and by closer bonds of intercourse.

Must give the Moslem strangers a generous welcome.

Movements of Distinguished People. ARRIVAL OF GENERAL PAIZ AT PHILADELPHIA.

General Paiz, who arrived at this port last evening, in twelve days from St. Thomas, General José Antonio Paiz, the distinguished Mexican President, accompanied by his wife, and a suite, came passengers by the Fairmount. Gen Paiz has come to seek, on our shores, the liberty he so vainly sought and suffered for in his own country.

The distinguished South American in a man of apparently sixty years of age, of portly figure, rather below the middle height, with a full head of black hair, and a mustache slightly tinged with grey.

Meeting of Tailors in the Park.

Last evening, at five o'clock, a mass meeting of tailors and others was held in the Park, in pursuance of the following call, advertised in yesterday morning's Herald:

Workingmen Attend!—To the Park! To the Park! To the Park! To the Park! To the Park!

All persons interested in behalf of the laboring classes are requested to meet at the Park, on Saturday, the 27th inst., at five o'clock P. M., for the purpose of holding the movement of the Journeymen Tailors of Philadelphia, in their demands for justice.

There was also a placard posted on the walls to the same effect, besides another one of a rather inflammatory nature, headed "The rights of labor against the rights of thieves and idlers."

At five o'clock, two large bodies of tailors marched and then other from Hill-street, in Hooper's street. The majority appeared to be Germans, and there was a large proportion Irish. The native Americans appeared to be few.

It is said that the tailors in this city number 7,000 men, and of these the Germans are 5,000, so that between the tailors and the spectators attracted by curiosity, the numbers assembled were pretty considerable, and entitled the meeting to be called a mass meeting.

Mr. John Comerford, a boss man, and a member of the Congress of Trades, was appointed President. He was followed by W. H. Miller, Esq., and Thos. K. Ashley, were appointed Vice-Presidents.

Mr. Allen and F. J. Otterson were chosen Secretaries. Mr. Allen read the following resolutions, which were adopted with enthusiastic shouts of applause:

Resolved, That we deem it the duty of every man, woman and child to support the laboring classes, and to do so, we pledge ourselves not to purchase any article of clothing from, or in any way direct custom to, those who employ tailors who refuse to pay their scale of prices.

Resolved, That we deem it the duty of every man, woman and child to support the laboring classes, and to do so, we pledge ourselves not to purchase any article of clothing from, or in any way direct custom to, those who employ tailors who refuse to pay their scale of prices.

Resolved, That we deem it the duty of every man, woman and child to support the laboring classes, and to do so, we pledge ourselves not to purchase any article of clothing from, or in any way direct custom to, those who employ tailors who refuse to pay their scale of prices.

Resolved, That we deem it the duty of every man, woman and child to support the laboring classes, and to do so, we pledge ourselves not to purchase any article of clothing from, or in any way direct custom to, those who employ tailors who refuse to pay their scale of prices.
