

OFFICIAL.

STATED SESSION.

majority had adjourned over until to-morrow. The President said that he had no evidence to enable them to make a report, and he hoped it would not be taken from them in this way. They were agreed upon it, and he hoped the Chair and the Board would sustain the committee.

By Alderman ALVORD—Petition of Charles B. Hart, to have part of Fourteenth street lighted with gas. To Committee on Lamps and Gas.

By Alderman DOHERTY—Petition of Francis M. C. O'Brien, for the regulation, paving, &c., of Eleventh avenue between Forty-eighth and Fifty-ninth streets. To Committee on Roads.

By the same—Petition of Francis Lee, for compensation for damages sustained by change of grade of Ninety-ninth street. To Committee on Law Department.

By Alderman TIEMANN—Petition of James Murphy and A. Flower, for privilege to lay the Eighth avenue railroad. To Committee on Streets.

By Alderman BARKER—Petition of John Firnie and others, for a sewer in Cross street. To Committee on Sewers.

By Alderman TIEMANN—Resolved, That the captains of police of the several wards of the city, directed to report to the Street Commissioner, on every Monday of each week, the openings made in the streets and sidewalks, and to specify in their said report what purpose the said openings have been made, whether for repairing sewers, or for vaults, ovens, or coal slides. Adopted.

By Alderman BOYCE—Resolved, That the Commissioner of Repairs and Supplies be, and is hereby, directed to have the repairs on the sewer in Green street, between Barclay and Broadway streets, repaired within four days after the passage of this resolution. Adopted.

By Alderman TIEMANN—Resolved, That it be referred to Committee on Streets, to inquire into and report some plan for the improvement of the street between Barclay and Broadway streets, at the corners of Barclay and Greenwich streets. Adopted.

By Alderman BOYCE—Resolved, That the Commissioner of Repairs and Supplies be, and is hereby, directed to have the repairs on the sewer in Green street, between Barclay and Broadway streets, repaired within four days after the passage of this resolution. Adopted.

By Alderman TIEMANN—Resolved, That it be referred to Committee on Streets, to inquire into and report some plan for the improvement of the street between Barclay and Broadway streets, at the corners of Barclay and Greenwich streets. Adopted.

By Alderman BOYCE—Resolved, That the Commissioner of Repairs and Supplies be, and is hereby, directed to have the repairs on the sewer in Green street, between Barclay and Broadway streets, repaired within four days after the passage of this resolution. Adopted.

By Alderman TIEMANN—Resolved, That it be referred to Committee on Streets, to inquire into and report some plan for the improvement of the street between Barclay and Broadway streets, at the corners of Barclay and Greenwich streets. Adopted.

By Alderman TIEMANN—Resolved, That it be referred to Committee on Streets, to inquire into and report some plan for the improvement of the street between Barclay and Broadway streets, at the corners of Barclay and Greenwich streets. Adopted.

Mr. BARKER—The previous question is before the Board. Mr. BOYCE—An adjournment is always in order. The motion was put, and lost by the same vote—12 to 6.

Mr. BOYCE rose to speak to the previous question, and the President said he was out of order—it was not debatable. Mr. Bouton asked whether all discussion was to be so out of it.

The President said, according to all parliamentary usage, if a question should be so out of order, it is not in order, and the previous question is put, and is not debatable. The question was put accordingly, and carried in like manner—12 to 6.

Mr. BOYCE requested the Board on the adoption of the resolution to be changed; the gentleman rose, and the vote was changed accordingly, and the numbers declared to be 13 to 5.

Mr. WELLS, apparently suspecting the object of the last stroke of policy, immediately moved a reconsideration of the vote, and the Board adjourned until this (Friday) evening.

Compliment to Wm. Sidney Smith, Esq. Below will be found an interesting correspondence between a committee of our citizens deputed to tender a public dinner to the Secretary to her British Majesty's Consul at Havana, now in this city, for his many, and humane, and noble conduct towards our unfortunate countrymen, known as the Cuban prisoners.

DEAR SIR—A large number of the citizens of Louisville, who remember with a warm and abiding affection your generous efforts in behalf of their unfortunate countrymen, made prisoners in the late Cuban expedition, and who are desirous to testify to your noble conduct on that occasion, and have appointed the undersigned a committee for that object.

Mr. BOYCE rose to make a few remarks why the petition should be granted. Firstly—That a previous Corporation had already granted to certain parties the right to hold the railroad, and they had agreed to do so. This grant the faith of the city was pledged to, and it should be held inviolate.

By Alderman BOYCE—Resolved, That the Commissioner of Repairs and Supplies be, and is hereby, directed to have the repairs on the sewer in Green street, between Barclay and Broadway streets, repaired within four days after the passage of this resolution. Adopted.

By Alderman TIEMANN—Resolved, That it be referred to Committee on Streets, to inquire into and report some plan for the improvement of the street between Barclay and Broadway streets, at the corners of Barclay and Greenwich streets. Adopted.

Miss Hannah's European Items. The Liverpool Standard writes that a new hat discovered in the city of London, and which has been named after the name of the Queen of England, is a most beautiful specimen of the art of the milliner.

The Queen of England held a drawing room on Thursday the 31st inst. at St. James's Palace. The Queen was seated in the center of the room, and was surrounded by her ladies-in-waiting.

Dreadful Storm—General Harney—Fillibuster. This portion of the country was visited, on the night of the 25th inst., with one of the most severe storms known in this region for many years. It extended over the Gulf of Mexico, for any distance, as we have reason to believe it did, as it raged here, you will soon hear of the loss of several vessels, and I am afraid, of many lives. Several houses were blown over, but they happened to be of that kind the destruction of which caused general rejoicing among the citizens of this place. Several persons were injured, but no lives lost. The corn in most of the fields was also blown down, and much damage was done to the other crops. The rain, for hours, poured down as if it intended to wash away this entire country, but it only gave to the earth what it has so much needed for the past long weeks, a thorough soaking. The farmers are preparing to put in their second crop, and in a few weeks the fields in this portion of the country will be well supplied again with green corn.

General Harney, of the United States Army, left yesterday morning for San Antonio. His stay in this place, which was some two weeks, was caused mainly in order to think that he was here for the purpose of watching the movements of the leaders of the fillibuster army. But such was not the case. He came to the fair, and, as he said himself, he found the climate and country so pleasant that he was forming the idea of purchasing a plantation from his lands, and I think no one had better reason for the General has been on the move constantly for the past three or four years, and is certainly one of the most efficient officers in the army.

By the arrival of the steamer Mexico, we have received the latest news from the fillibuster army. The Indiana Bulletin says an exact measurement has lately been made of the water on General Harney's plantation, and it is found to be a very small one, and a half, and another ten feet. The bar is very narrow, and each side breaks abruptly into a line of twenty-five feet. For several years past the water on this bar has been diminishing, though in the ordinary course of the water it should have a change in level on that which it depends again. The editor of the Bulletin thinks there is no doubt but a small outlet by the general government will give a permanent depth of eighteen to twenty feet on the whole bar.

We believe surveys have been made of some of the best lands in the Texas coast by army officers, but some years ago. The Washington county papers contain a statement of a survey of the land of the late General Harney, and it is found to be a very small one, and a half, and another ten feet. The bar is very narrow, and each side breaks abruptly into a line of twenty-five feet. For several years past the water on this bar has been diminishing, though in the ordinary course of the water it should have a change in level on that which it depends again. The editor of the Bulletin thinks there is no doubt but a small outlet by the general government will give a permanent depth of eighteen to twenty feet on the whole bar.
