

FINANCIAL AND COMMERCIAL.

MONY MARKET.

STOCK MARKET. SUNDAY, JULY 29 - 6 P. M. The stock market, during the past week, has not been at all buoyant. Holders of stocks have not been compelled to realize, and they retain possession with a good deal of tenacity. We have no idea that outsiders or insiders will at a moment be forced to realize, but that time is not far distant. The banks are as prosperous as a June, and the brokers know not what moment they may be called upon. They must keep their cash accounts well balanced, and their resources well in hand for the emergency. We have known demand loans called in so suddenly, and at such times, as to prevent the owners of the hypothecated stocks from realizing, and the buyers were compelled to make the best of it, and sell at public auction. The brokers are well posted up in these things, notwithstanding which they cannot resist accepting loans on such terms. The stock market is weak. Prices are sustained by purchasers on time, buyers' options. Holders are looking out for something favorable to turn up, but will revive speculation. Such hopes are vain. The cause of the present dulness is the inflated condition of the market. Stocks have reached their maximum value, and so speculation can carry them any higher. A decline of five per cent would give us activity again, as there would then be, in some stocks, a margin for a rise.

The arrival of the Pacific has not excited for buyers to build upon, except a few orders for some first class railroad bonds, which were daily executed. A rise of some one per cent was effected thereby, in Illinois bonds of '75, and some 1 1/2 per cent in the Freedmen issue. All other things present the same full or bloated expansion, and the tendency of the market since has been decidedly downward.

The resignation of Mr. Talman from the Erie Board of Directors, produced some fluttering amongst the holders of that stock, and it has fallen about 1/2 per cent. Mr. Talman stands very high in this community as a man of sound judgment and unblemished character; and the company can ill afford to lose his services. His retirement is unfortunate at this time. The Cumberland Coal Company stock is also falling off in the market, and many speculators are about to sell. The late report of the President does not seem to inspire the confidence which his earlier efforts produced. A few months ago, when the stockholders were invited to call on the office of the company, and examine into its proposals, there was quite a sensation produced, and the stock maintained itself at some 35 and 30 per cent. This was no doubt attracted by the discovery of the Black Band, and specimens of which were exhibited to the enthusiastic capitalists on that and on subsequent occasions. Why the stock should have fallen to 25 per cent, with such an extraordinary addition suddenly made to its power, is one of those mysterious things which it is not given us to comprehend. At the same time there were some intimations thrown out that the company might use its large surplus for the purchase of the Chesapeake and Ohio canal, with a view to continue the railroad in the transportation of its coal and Black Band. If the company has abandoned the idea of owning the canal, perhaps we may find in such a fact one of the causes of the present decline. The condition of the stock at the moment, certainly calls for some well digested report, and we commend the subject to the management. Some movements in the stock of the Niagara Transit Company indicate the approach of a better understanding with the Panama line. Speculation, however, is almost extinct in the shares. Dealers are disposed to let steamboat men alone, past experience teaching the valuable lesson. The market, well supplied with money, waits some new development—some new discovery—some new machinery to go forward upon; without it, it will recede.

A. H. Nicolson's regular semi-weekly auction sale of stocks and bonds will take place on Monday next, the 30th inst., at 12 1/2 o'clock, at the Merchants' Exchange.

The expectation of specie from this port last week exceeded one and a half million of dollars, as will be seen by the annexed table:—

Table with 2 columns: Item and Amount. Includes items like Steamers Pacific, Atlantic, etc., and amounts in dollars.

The following is a statement of the assets of the Trust Empire City Bank, made by the United States Trust Company, of New York, receiver, on the 28th day of July, 1855:—

Table with 2 columns: Description and Amount. Lists assets such as Amount of cash, Bonds and mortgages, etc.

The total shipments of anthracite coal the past week reach the very handsome aggregate of 110,892 tons. For the year, the tonnage reaches 2,379,775 tons, against 2,019,796 tons last year to the same time. The Reading Railroad brought down 51,778 tons for the week ending on Thursday last, and 1,298,442 tons for the year, against 1,151,735 tons to the same time last year. The shipments on the Schoharie Navigation for the week ending on Thursday last were 17,125 tons, for the season to that time 511,038 tons, against 468,074 tons to the same time last year. The shipments of coal from the Lehigh region were for the week ending with Saturday last 41,899 tons, against 40,705 tons for the corresponding week of last year; for the season, 550,295 tons, against 504,436 tons to same time last year. Shipments for the season on the Delaware and Hudson canal are said to show a considerable increase over last year; but, as no statements are published, it is quite likely that the increase is exaggerated. The retail market is dull, and will probably no continue for several weeks. The demand for shipment is very active, the low rates of freight holding out inducements to consignments coastwise.

The shipments of anthracite coal from Richmond during the week ending July 21, were as follows:—

Table with 2 columns: Ship Name and Tons. Lists various steamships and their cargo.

The following is a comparative statement of the value of exports from the commencement of the year to July 26:—

Table with 2 columns: Item and Value. Compares exports for 1855 and 1854.

The above table of exports exhibits about the usual variety. Cotton continues to form the principal article of shipment. A little Indian corn was

forwarded weekly, but it will be some time before breadstuffs are exported to any extent.

The importations last week were not so large as for the week previous. The quantity and value were as follows:—

COMMERCE OF THE PORT OF NEW YORK—VALUES OF IMPORTS.

Table with 2 columns: Item and Value. Lists various commodities and their values.

COMMERCE OF THE PORT OF NEW YORK—VALUES OF EXPORTS.
