WALL STREET.

On Change today cotton was active and strong. The advance in price was not sustained, however, and a partial reaction ensued toward the close. Breadstuffs were in superabundant supply and the market heavy and lower.

FOREIGN EXCHANGE MARKET.

The foreign exchange market gave way under a freer supply of commercial bills, drawn principally against exports of cotton and five-twentieths—the quotations of the latter in London advanced a small profit on their shipment—and the leading bankers reduced their nominal rates to 100% for sight sterling and 109% for sixty day bills, the actual business being at a slight concession from these rates.

MONEY IRREGULAR.

The rate on call during most of the day ranged from five to six per cent for loans on stocks and from four to five for loans on government securities. Towards the close of banking hours there was a slight active demand for 91% per cent and in several instances the borrowers paid seven per cent.

GOVERNMENTS STEADY.

The government list was quiet except for the 67's and ten-forties, which moved in opposite directions, the former declining and the latter advancing. The decision of the Secretary of the Treasury permitting an equal issue of circulation on the five-twentieths and ten-forties has started the national banks to withdrawing their five-twentieths on deposit at Washington (which cost in great part 67's) and substituting the ten-forties, the exchange permitting them to realize the difference in the market prices of the two issues.
