

Influence of New York Sun As An Educational Medium

The Sun is proud of its exalted position in the estimation of educators.

It is the medium of the educated. For nearly a century The Sun has preserved a normal attitude toward human affairs in all the fields of endeavor, and its staff of men who have achieved degrees in the great institutions of learning have been able to give the benefit of their calm knowledge and wide experience to every one desiring light on the training of the young, and it will continue to do so for another century.

Those who seek proper education for their children have been intelligently advised by the New York Sun Information Bureau, and managers of established and new educational institutions making known their curricula through the advertising columns of the School, College and Camp Bureau have been so gratified by the returns that now the New York Sun is the official medium of the Schoolmasters Association of New York and the Camp Directors Association of America.

Every Sunday the New York Sun publishes a school news page. Matters of interest and advancement in one institution are made known to the other educational institutions and to the reading world, and as The Sun attracts the class that cannot tolerate anything but the best in education there results a valuable dissemination of good information among the best institutions, anxious parents and guardians.

Your letters concerning schools or colleges or to get information about studies or training of any description are welcome, and each letter will receive a prompt reply and all the detailed information at our command.
