

The Sun AND NEW YORK PRESS. WEDNESDAY, JUNE 25, 1919. MEMBER OF THE ASSOCIATED PRESS.

Subscriptions by Mail, Postpaid. One Year, \$10.00. Six Months, \$6.00. Three Months, \$3.50.

Books and the Book World. The Associated Press is exclusively entitled to the use for republication of all news dispatches credited to it or not credited to it in this paper and also the local news published herein.

When, Where and How? An Associated Press despatch from Paris yesterday reported an agreement among "international law experts."

A Billion Bushels of Surplus Wheat for Europe. If the world wants American wheat in such quantities as the world never wanted before it is right here in this country in such quantities as it never was here before.

Lessons for Europe in the Pershing Stadium. In Pershing Stadium in Paris some 1,500 athletes of the Allied and American armies have been competing in field sports.

New Italian Peace Delegates. A new delegation headed by the recently chosen Foreign Minister, TOMMASO TRITTONI, will represent Italy at the Peace Conference.

When Members Refuse to Yield. It is a closed affair as to the fact of the repeal of the daylight saving law, but nothing can close the interest of a puzzled folk in the alleged reasons for the repeal.

Debilitating Effect of Prosperity in Missouri. Zero Peck will not be able to make a crop this year on account of a few horse trades he made early in the spring.

Curiosity of an Iowa Altruist. About 3 o'clock Monday afternoon, when the sun was shining brightly in front of Watter's store, and thirty minutes later I returned and found it gone.

Opposite or Correlative? To the Editor of The Sun:—Should the following be regarded as opposite or correlative? "He kept us out of war; he kept us out of peace."

consume 700,000,000. That would leave 550,000,000 bushels. Canada is going to have a relatively big surplus. It might be no more than 100,000,000 bushels, but probably it will be nearer 200,000,000 than 100,000,000.

Can three-quarters of a billion of bushels of North American wheat on this side of the globe be sold to consumers on the other side of the globe? Or put it in this more accurate way: Canada surely can sell every bushel of surplus wheat she has—surely will sell it to the United Kingdom.

When Canada is sure to sell hers, when Australia must sell hers, when Argentina must sell hers—and among them, as we say, they will go to market in Europe with upward of 400,000,000 bushels—can our Government sell our, say, 600,000,000 bushels in the same markets on the basis of \$2.25, Western price?

Erna Cornell's Statue. Cornell University is ERNA CORNELL'S monument. His fame requires no other memorial. Yet it is fitting that the semi-centennial of a great institution's founding should be signalled last week by the erection of a statue of its creator.

Children are practical creatures, prone to put things to their original purposes. The temptation to a child to put explosives in his empty grade might be strong. Once loaded, the grenade surely would become a "bomb or bombshell"; and there is the law of the State making the possession of the weapon a felony.

Public schools are not the only institutions that are intending to close within the week. Almost with the declaration of peace will arise a popular curiosity in the matter of terms. When it is officially declared that hostilities are finally concluded there must be a general discarding of expressions that have become habitual in our vocabularies, such as "the war," "the present war," "this war," and countless other designations whose significance has been lost by their overuse.

The dramatic collapse of the Orlando Government seems in the great measure due to the Premier's own misunderstanding of the actual conditions in Italy and to his too close adherence to what has been called the "imperialistic ideas" of his Foreign Minister, SONNINO. It is said that ORLANDO gave too much prominence to the question of Fiume, his severest critics declaring that much of the agitation over the annexation of that city was artificially inflated.

It is a closed affair as to the fact of the repeal of the daylight saving law, but nothing can close the interest of a puzzled folk in the alleged reasons for the repeal. Much light is cast upon the subject by official reports of the last debate in the House, and nothing is more revealing than certain eloquent sentences therein noted. Debate is brought about in House and Senate by the same form of question, "Will the gentleman yield?" and usually the gentleman yields, if for no other reason than to prove to Record readers that the speech was actually delivered and is not merely a leave-to-print affair.

It is noticeable, reading the *Conventional Record's* report of this debate, or, strictly speaking, series of monologues, in the main, that advocates of repeal stubbornly refused to yield even under persistent pressure. "The farmer," exclaims a passionate orator, "under this law loses an hour of daylight in which to cultivate his crops that you city dwellers may not starve."

The whole Adriatic controversy is apparently to be reopened at the conference before the final settlement with Austria. That a solution will be as easily reached as might be inferred from the outlines of the new Government policy is not so clear. There is still a strong feeling in Italy in favor of the Italian control of the Adriatic and in making concessions both NTRI and TRITTONI will find themselves charged with following out the repudiated policies of GIOLITTI. The principal argument that has been made against NTRI is that he will be guided by the influence of the former Italian boss and that he will still continue "Giolitti's lieutenant."

Two large wedding cakes ordered from a Boston caterer (rare event) they deposited in the summer dining room. The bride's cake was made at home by mother after many comparisons of recipes with the bride's maid, who borrowed for the baking, as new ones could not be trusted for such a ceremonious cake. I remember the lengthy discussion regarding wine, finally taboos.
